

Green Laser Pointer

Instructional Manual

Introduction :

Utilization of the latest laser crystal technology and optics creates this high quality. It emits an intense, brilliant laser beam and has a range up to 1000 meters. Use your laser pointer to aim at any desired targets on projection screens, video monitors, presentation graphics, and any opaque as far as several hundred meters.

User Safety Precautions:

- *Under normal operation, it is safe to the human body.
- *Focusing directly on a laser beam may result in temporary or permanent eye damage. Care should always be taken.

Battery Installation:

- *When inserting the batteries ALWAYS point the laser emission hole away from your eye.
- *Unscrew the pen clip from the pen. Insert batteries positive end upward and tightly screw the pen clip.

Operation:

- *Press the push button to turn it on.
- *Release the push button to shut it off automatically.
- *Operating temperature: 15-35 degree Celsius.
- *This pointer is not designed for long-term use.
- *All laser pointers shouldn't be used constantly, we suggest 20seconds per time, and stop 10seconds, then continue.
- *Constantly turning on will result accumulation of high temperature and sacrifice the lifetime of laser diode.

Caution:

- *Never stare directly at the laser beam.
- *Please keep out of reach of children.
- *Do not drop the laser pointer on hard surface; it damages the pointer components and causes a malfunction.
- *This high-end optic product must be handled with care.

Limited Warranty:

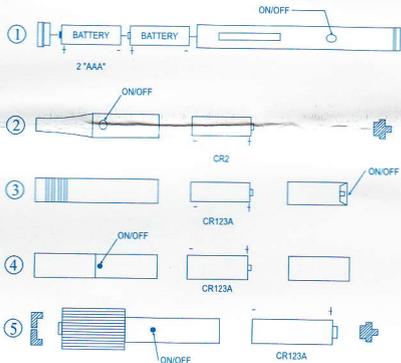

- *The manufacturer warrants this product for a period of ONE year from date of purchase.
- *This warranty is limited to repair and replacement of original parts during the course of normal use.
- *The damage caused by incorrectly application, such as persistently light, is out of warranty.
- *Warranty is only valid with no sign of alteration, damage, and deterioration due to misuse. Any other costs should be considered the responsibility of the owner.
- *Warranty voids if the warning label and serial number are missed or removed.

Specifications:

Wave length: 532 nm

Output Mode: Constant Wave

Output Power: <1 mW. CLASS II Laser Product
<5 mW. CLASS IIIa Laser Product
>5 mW. CLASS IIIb Laser Product.

Service & Return Policy:

To obtain the warranty service and replacement, please keep the serial number and contact with the local dealer:
