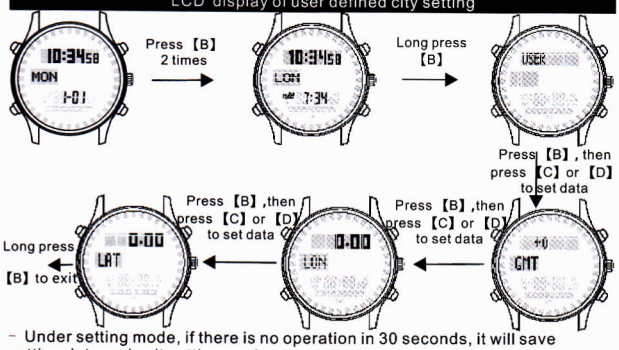
7. Long press button【B】to view the qibla city which you selected. "USER" will be displayed on LCD.
8. Press button【B】to set time zone, longitude and latitude in turn.

LCD display of user defined city setting



- Under setting mode, if there is no operation in 30 seconds, it will save setting data and exit setting mode automatically.

3.8 Compass mode

Under time mode, press button【D】to enter Compass mode.

LCD display:

- Upper: Degree (This degree is measured degree between north to current position)
- Middle: Bearing code (such as NE, SW, ESE etc.)
- Below: Time
- Outer ring: Black point (Always indicating north)

After replace or install a new battery, press【C】, "keep level" will be displayed on LCD. It requests calibrate compass first. Detail calibration method, please refer page 14.

Button function:

- Press button【A】to turn on backlight 6 seconds
- Press button【B】to go back time mode.
  Long press【B】to enter magnetic declination
- Press button【C】to enter qibla compass

  Long press【D】to enter compass calibarion

3.9 Compass calibration :

A. When should we calibrate compass?

Using first time or after replacing battery, press【D】to enter compass mode. It requests calibrate compass first.

To let compass working more accuracy, we should calibrate compass regularly When compass decline degree too much, we should calibrate compass.

B. How to enter into compass calibration?

Using first time or replacing battery, press【D】, it will enter into compass calibration.

To get more accuracy data, under compass mode, long press【D】, it will enter into compass calibration.

C.How to calibrate compass?

When enter into calibration, circle on LCD display will rotate "Cal" will display on the top.

Keep watch level, rotate it clockwise with equal speed and slowly till it exits calibration automatically and enter into compass mode.

If there is no operation in 60 seconds, compass will go to IDLE mode. LCD will displayed "restart". Press【D】to restart compass calibration.

If there is still no operation in 30 seconds, it will go back to time mode.

If calibrating is not successful, compass calibration mode will be displayed on LCD when enter into compass mode. Then we should calibrate it again.

3.10 Magnetic Declination

Under compass mode, long press button【B】to enter into magnetic declination. Press【C】or【D】to set data.

Magnetic declination is defined as the angle between magnetic north (the direction the north end of a compass needle points) and true north. Only a GPS can determine true north by knowing your exact orientation on the earth. All digital compasses measure magnetic north. The declination is positive when the magnetic north is east of true north. The declination is negative when the magnetic north is west of true north. To determine the declination for your location, visit:

http://www.ngdc.noaa.gov/geomagmodels/Declination.jsp

For example, Phoenix, AZ produces the following result: Declination = 10° 59' E changing by 0° 6' W/year (or +10 degrees 59 minutes changing 6 minutes per year). To convert to decimal format: Declination = 10° + 59'/60 ('/°) = 10.98° (rounded to the nearest integer, Declination = 11°). Enter +11 into the display. This will offset magnetic north by +11 degrees (or 11 degrees to the East) to true north. Note that the magnetic declination changes as a function of time for your location. In the above example, the declination changes -6 minutes (or 0.10° per year, or about 1° every 10 years). Thus, time function is insignificant.

穆斯林朝拜表 القبلة ووتش

感谢您购买此款穆斯林朝拜表，它将为您的祈祷带来更多便利！穆斯林朝拜表是专为穆斯林人设计的一款朝拜祷告表。在全球范围内，它可以自动指示麦加方位，自动提醒朝拜时间以及包括回历，世界时间等功能。

此《用户指南》说明了产品功能、工作方法以及操作方法。每一主要章节都说明了一种模式及其视图，并提供这些视图的设置和使用信息，让其最大程度地为您服务。

1. 基本特性:

- 麦加方位自动指示功能
- 祈祷时间自动提醒功能
- 公历显示及回历显示
- 时间：显示时、分、秒、年（2001-2099）、月、日、星期、12/24小时制
- 世界时间
- 整点报时
- 电子指南针
- 指南针校正功能
- 低电提醒功能
- EL 背光
