   - 2) Put the "Part 1" into the nut of the camera and twist it (picture 1) and put the "Part 1" into the handlebar grip then fix and screw it up. (picture 2)
   - 3) Put the rubber pad into the handlebar grip (picture 1), and mount the handlebar grip to the motor handle, then twist the screw up. (Picture 2, 3)
Mounting Description

Install and take out battery
Please use the appropriate lithium-ion battery (above 3.7V 1800mAh), any inferior batteries will severely damage the camera.

1) Open the back cover.
2) Open the battery slot door according to the direction of arrow.
3) Insert battery into the battery slot according to the polarity direction as shown on the battery cover.
4) Close the battery slot door and twist the clasp according to the reverse direction of arrow.
5) Unscrew the cover at the end of the unit and open the battery slot door, according to the direction of arrow (to the right), turn the knob to open the battery cover, and take out the battery.

Important: When the battery is low, the low battery icon will appear on the LCD display. Always upload video footage to your PC prior to replacing batteries to avoid files loss.

Insert and take out storage card

1) Insert storage card
   1) Open the camera back cover
   2) Insert the card according to the direction as shown
   3) Close the cover
2) Take out the storage card
   1) Turn off the camera and open the back cover.
   2) Press the end of the storage card slightly, it will automatically eject.
   3) Close the cover

Notice:
    a) Before using the SD card, please check whether the key lock on it is locked;
    b) Please confirm the inserting direction of the SD card because reversed inserting may cause damage to the camera and the SD card;

Battery charging
Install the battery into the battery slot according to the above methods and close the cover, then connect the charger to the USB port and plug in the power. During charging, the red indicator on, when fully charged, the blue indicator on.

Notice:
    a) In order to improve the charging efficiency, please charge the camera under the shutdown status
    b) Please make sure the AC power is turned on when the charger is plugged.

100MEDIA file in turn, and you can playback your videos or pictures, also
can download your pictures and your videos in MOV/JPEG format.

Note: Plug out the USB cable, the camera will shut off automatically.

Troubleshooting

Troubleshooting

There is no display?
• Is battery properly installed.
• Does the battery need replacing.

After the Action Cam is connected to my PC, it cannot find the New
drive in the "My computer's" folder?
• Make sure each end of the Action Cam USB cable is properly and firmly
  connected.
• Make sure your USB port works. Try connecting other USB device to
  check if USB port has a malfunction.

I can't capture the video footage?
• Make sure there's enough space on the internal memory of Action cam
  of the SD card. The display will tell you how much time left for video
  recording.
• If the SD card you inserted has capacity available, make sure it is not
  locked. It can't take video footage if card is locked.

The remaining time is not accurate?
• The remaining time is not always accurate, it's an estimate.
• The remaining time depends not only on the time recorded, but on the
  color density of the video footage, under conditions with high contrast
  (such as outdoor), the actual time available will be less than under
  low-contrast conditions (such as indoors).

I can't play the video footage on my television?
• Make sure to turn the camera on.
• Make sure each end of the AV cable is properly and firmly connected to
  Action cam and your television.
• Please check if TV has been turned to the AV or HDMI mode.

The image is not clear or dim?
• Check out the lens whether there has any stain or finger print; use the
  Lens cloth to wipe up the Lens before shooting.
