

USER'S MANUAL

SOLAR RECHARGEABLE 3 WATT LED LANTERN

- Swivel handle
- Equipped with a SOLAR cell charger
- Using AC/DC charger for charging (included)
- Using 12V DC car plug adaptor for charging (included)

Operation

- Push the handle button and turn the handle to upper or lower position. Upper pistol profile for pin pointing long range objects, lower lantern profile for searching around.
- Charge the battery prior to initial use. (see CHARGING THE BATTERY)
- Press the switch on the main body to select the desired operation mode.

Standard brightness → High brightness → Power off

Charging the battery

CAUTION: Before charging battery, make sure the Solar cell cabinet is separated from the Spotlight cabinet.

Turn the Solar cell cabinet counter clockwise to release from the Spotlight cabinet.

SOLAR cell charger

- Open the solar panel. For optimum performance, place the solar panel in a location directly facing the sun.
- The red LED on the cabinet will turn on indicate the charger is working, the green LED will be on as the battery is fully charged.
- Time required to fully charge the battery is around 30 hours.

AC/DC charger

- Plug the charger into the wall outlet, insert the charger plug into the DC jack of the Solar cell cabinet.
- The red LED on the cabinet will turn on indicate the charger is working, the green LED will be on as the battery is fully charged.
- Time required to fully charge the battery is around 10 hours.

Car plug adaptor

- Plug the included car plug adaptor into the cigarette lighter socket on your car (truck or boat), insert the adaptor plug into the DC jack of the Solar cell cabinet.
- The red LED on the cabinet will turn on indicate the charger is working, the green LED will be on as the battery is fully charged.
- Time required to fully charge the battery is around 10 hours.

WARNINGS

- Never block lens and reflector during operation.
- Do not shine directly into eyes.
- To reduce the risk of electric shock, unplug the unit and allow to cool before attempting any cleaning.

Important

Never leave battery discharged, recharge battery immediately after discharging.
Recharge battery every 3 months even the unit is not used.
