

**Zsun Cloud Technology**

Apply to SD111 / SD112 / SD113

## Step 1 APP Install

You can get APP software through the following 3 ways:

- A. Apple app store download ( for IOS )  
google play download ( for Android )
- B. zsun self-push technology
- C. zsun website download  
( <http://www.zsuncloud.com/> )

**A . Apple app store download  
/ google play download**

### Android Download Guide

1. Open the google play APP

Google play

2. Input keyword "superdisk", find the product of the APP

3. Download and Install APP

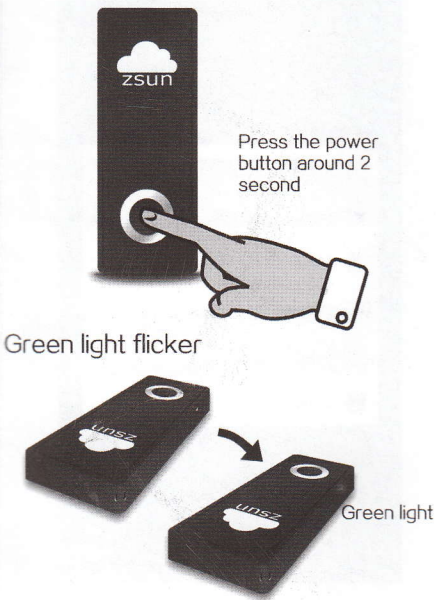

# Apple IOS Download Guide

Go to Apple app store, input keyword "superdisk", click download

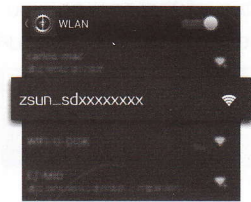

## B. zsun self-push technology

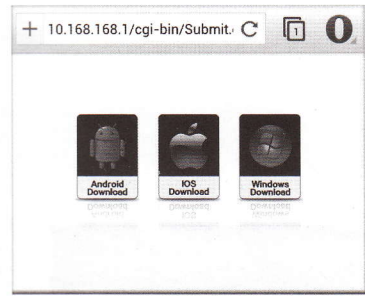

### 1. Startup SD111

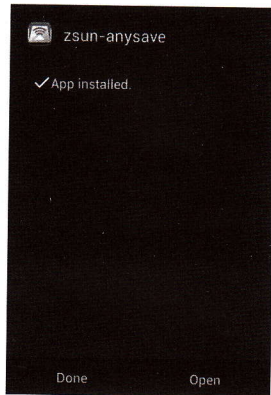

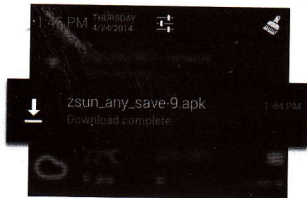

2. Download APP:  
Search WiFi on your cellphone, connect to the SSID "zsun\_sdxxxxxxx"

Open any website in the browser, installation page will automatically pop up as follows, click the suitable APP you want to install.

Open the menu at the top , click download and install the “zsun\_any\_save.apk” file.

## C. zsun website download

1. Go to Zsun website:  
<http://www.zsuncloud.com/>
2. Click on the "technical support", select in the open pages, click the APP you want to install, then open the menu at the top, click download and install.

Download

Download

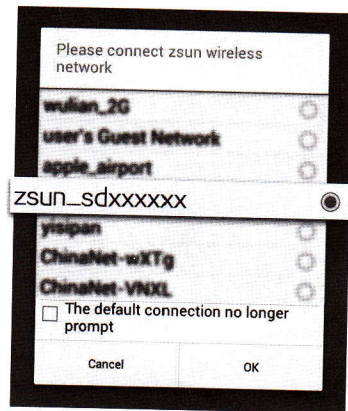

Download

## Step 2 Use APP

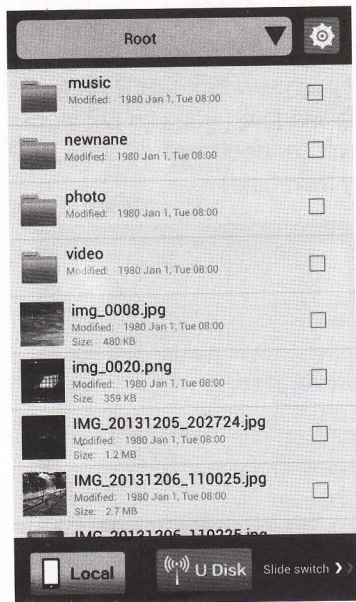

Click the APP (marked zsun logo)

Select zsun\_sdxxxxxx SSID in the pop-up window, ( you can check the “default connection “ to go to APP quickly next time)

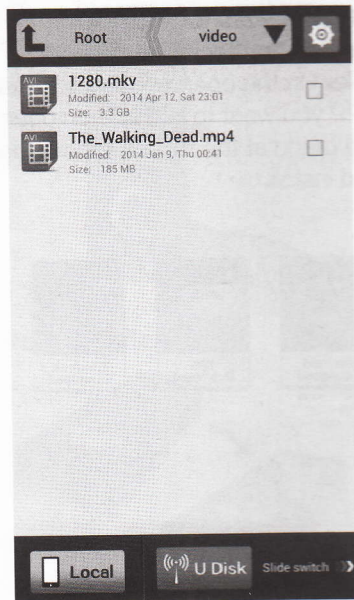

Now you can use this wireless disk !  
Here you can play video, To copy,  
paste files, and connect your computer!

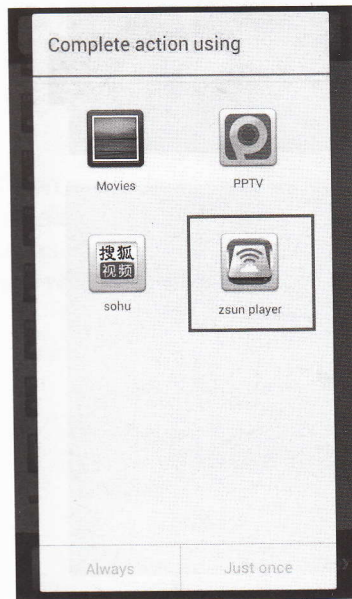

## Play Video

Open the video folder, click to watch  
the video

In the pop-up dialog, select the video  
play video player software. ( zsun  
players is developed by zsun team, it  
can realize the wifi play similar local  
broadcast, strongly recommended! )

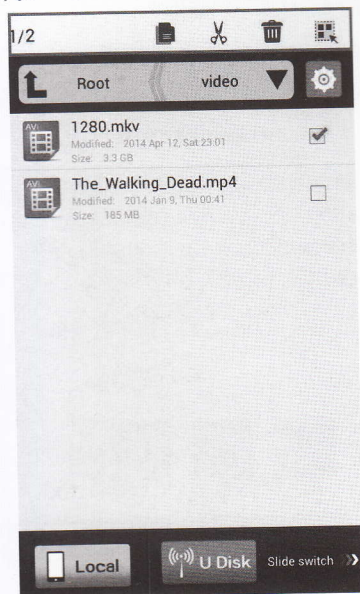

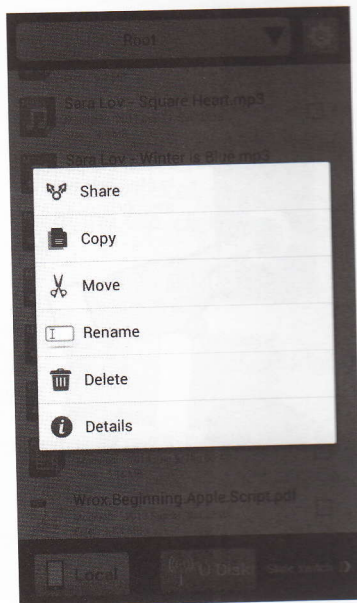

## Manage Files

Select the target file, click on the back box, at the top of the screen, you can copy, cut, delete and selection function.

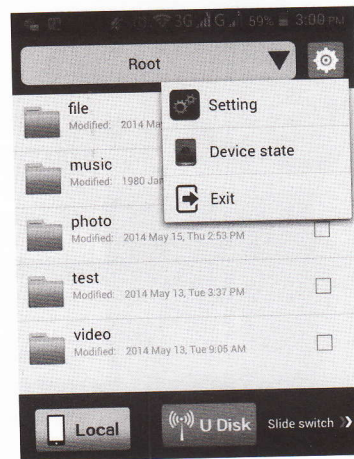

You also can edit the target file by long press, then choose the function such as copy, delete, and rename.

## More Function

Click on function button(upper right corner), then you can set new folder, check device status, exit and etc.

Tips: if you change the SSID and set the password, once you accidentally forgot the SSID or password, please press the power button 8 times continuous within 1.8 seconds, then the SSID and password will be restored to the default setting.

# Wireless Disk Connect to PC

## PC wifi connect to wireless disk

Login zsun website:

<http://www.zsuncloud.com>,

Download and install "ZSunCloud.exe",

switch the wifi to zsun SSID:

zsun\_sdxxxxxx, then you can edit  
your file by PC.

## PC connect to wireless disk (traditional U-disk mode)

Use the cable line to connect wireless disk to PC, open the APP, slide switch to PC connection mode, then wireless disk will change to traditional U-disk, you can write/read by PC.

### ① Open APP, lower right slide switch

### ② Switch to U disk mode

### ③ Connect wireless disk by cable line
