Chapter One

Features

- The main chip used a Quad-Core CortexA9, highest frequency 1.6GHz .

- 2G DDR3,16G Bytes of memory Nand Flash .

- Using Android smart development system.

- Can be installed mass-compatible application software itself APK Android.

- Built-in browser, support for direct browsing.

- Built-in rich video platform Vioxx can be found by searching or you want to install the software video.

- The machine plug 360 high sense of wireless Wi-Fi antenna, sensitivity is better than the built-in antenna.

- Using the latest generation of the fifth-generation 802.11ac protocol Wi-Fi, Bluetooth version 4.0

- Support 720P, 1080I, 1080P (1920x1080) resolution, high-definition video decoding.

- Supports multiple video formats, such as RM/RMVB-HD/FLV/MP4…

- Supports multiple audio formats, such as MP3/WMA/ACC/OGG/WAV …

- Supports a variety of image formats, such as JPEG/PNG …

- Support Dolby Surround Digital audio decoding, direct output left and right channels.

- Support for coaxial digital audio output, connect a digital amplifier to enjoy the perfect sound.

- Support for Wi-Fi, infrared remote control, wireless/USB keyboard, mouse.

- Support U disk, mobile hard disk, micro SD / MMC cards and other storage devices

- Built-in USB (host) port, direct mounting external USB interface device, capable of supporting a variety of drive USB device, such as a camera, a keyboard, a mouse.

- Support for multiple languages (Chinese Simplified, Chinese traditional, English, European languages, Japanese, Korean, etc)

- Support various types of input

Technical Specifications

Extended Interface	Network interface x1
	HDMI Output x1
	Audio Output x1
	Memory card slot x1
	HOST interface x3
HDD format support	NTFS/FAT32
Video decoding	H.264, Real Video, MPEG-1 /2 /4, Div X, etc.
Audio decoding	MP3,WMA,AMR,ACC,OGG Vorbis PCM/ADPCM etc.
Support subtitle formats	SRT、SUB、SMT、SSA
Network interface	10Mbps/100Mbps Ethernet LAN
	Supports USB external WIFI wireless network card that supports specification: 802.11b/g/n
Power supply	Input voltage: AC 100-240V, 50/60Hz access
	Output voltage: DC 5V 2A
Host Power Requirements	5V
Export	(TV) AV output port
	(HD) HDMI HD output window
Dimensions	Standalone: 155 * 96 * 30mm
	Packing: 196 * 165 * 92mm
Standard Accessories	Power Adapter
	Wi-Fi Antenna
	Remote Control
	HDMI Cable
	User Manual
Note: This product specifications and design are subject to change without notice.

# Chapter Five

Common Troubleshooting

      After connecting the cable, why is no display on the TV screen?

        First; please confirm whether the boot; The product is plugged in, press the power key, Until the power indicator light changes from red to blue as compared to the normal boot state; Second; output state confirm whether the product is consistent with the TV input status (whether the TV signal source and the output signal corresponding to the product); Third; confirm HDMI cable is good contact.

      Why online playing a video will appear cushion?

        First; whether there is time for the regular buffer; If so, that is your speed instability. Second; partially or HD sources too bad seed, there is a normal buffer, then the need to consider the application Hou network speed.

      Why can not install software full screen?

        Because part of the software in the preparation of cured display resolution, and this display resolution and machine output resolution is inconsistent, resulting in not full screen.

Warranty Card

Warranty Terms

1. Thank you for purchasing and using our products，This card is the three guaranteescerticate of this product, please complete the information stamped by the dealer before they take effect.

2. Warranty service is limited under normal circumstances, the product quality problems caused by the failure of artificial damage. With this card and valid invoice, you will enjoy the following services:

- Users within 7 days of the date of purchase, hardware failure, you can choose to return, replacement or repair free of charge; From the date of purchase within one month, you can choose a replacement or repair free of charge; From the date of purchase within one year of the effective warranty period, will be covered by a limited warranty.

- 1 year limited warranty from the enjoyment of the service date of purchase of the box.

- External power supply, telecontroller from the date of purchase and enjoy 30 days limited warranty, warranty service within one year; By the maintenance of the Company's products continue to enjoy the original warranty period, warranty service provided by the Company; From the original deadline of less than three months of the warranty, the replacement parts, enjoy three-month warranty from the date of replacement.

- After the repair of defective parts down for the benefit of the Company.

- Users need to keep maintenance card, lost not be reissued.

- This card may not be altered, otherwise, invalid certificate.

- The card does not bear any responsibility, including without limitation incidental or consequential damages or lost profits resulting in expected interest will be due to the use of or inability to use the product resulting from the work stopped or damaged products within the data maintenance, any responsibility for damage to the procedures, such as losing situation.

Non-warranty

1. Content on the warranty card identifies discrepancies and kind of goods or altered.
