4 Peripheral device for BOX

5 CONNECTING Box TO YOUR TV

- 1 Connect one end of HD cable into the HD port on **Box**.
Connect the other end into the HD port on your TV.
 - 2 Plug the power cable into **Box**
 - 3 Turn on your TV and select appropriate source of input.
 - 4 Power up your remote control.
- **Box** is now connected to your TV.

6 CONNECTING BOX TO YOUR HOME NETWORK

You can connect **Box** to your home network with below two methods:

1 LAN Network

- Connect one end of an Ethernet cable (not included) to your router. Connect the other end of the Ethernet port on the back of **Box**.
- **Box** will automatically detect your network and continue the set up process.

2 WiFi Network

- Go to setup menu and locate your WiFi network
- Enter the password with remote control. **Box** will be automatically connected next time.

TIP

- For better streaming performance, LAN cable for internet service is preferable.
- If it is in WiFi mode, please make sure **Box** is placed in an open space and closed to your router.
