Getting started
Loading battery
1. Slide the battery cover switch to open the battery cover.
2. According to the indication, put in an enclosed lithium battery.
3. Close the battery cover.

Using SD / MMC card (optional)
In addition to the built-in memory, your camera can also store data on SD / MMC card. To insert a memory card, gently push the card until the card reaches the bottom of the slot. When a card is successfully inserted, you will see the storage icon showing on the LCD, the built-in memory will be disabled. To remove the SD card, gently push the card and it will pop up, then pull the card out of the slot.

Charge battery using seat charger
1. According to the indication, put in a lithium battery, pull out the plug.
2. Plug the charger to an electrical outlet, and the charge will start. The LED indicates red light during charging. When the battery is fully charged, the LED light will turn green.

**Charging battery using PC**
1. Power on your computer. Connect one end of the USB cable to the computer.
2. Connect the other end of the USB cable to the camera, and the charge will start to take place, the charge light (in the camera) indicates red during charging. When the battery is fully charged, the charge light (in the camera) will go out.

**Note:** Please power off the camera during charging!

**Powering the camera on and off**
1. Press the Power button for one second, the video camera will turn on.
2. Press the Power button for seconds, the video camera will be turned off.

**Note:** The camera will be automatically shut-down due to “Auto Off” setting.

If you don’t use the video camera for a long period of time, please remove the battery.

**Switching mode**
The camera provides five modes to use. After powering on the camera, press the Mode button to select a mode you want to enter. If you want to switch mode afterwards, press the Mode button again.

1. **Video Record Mode** — record videos
2. **Camera Mode** — take pictures
3. **Voice Recorder** — record voice clips
4. **Music Player** — play MP3 music
5. **Playback Mode** — view movies, pictures and listen to record voice

**Basic operations**
1. **Video Record Mode:**
   1. Turn on the video camera; the video icon will show on the top left corner of the on-screen-display.
   2. When at the time of idle state, TFT screen shows the related icon for mode indicator, recording time, white balance, battery status and so on. If you insert a memory card, the monitor will also show the memory card status.
   3. While shooting the video, you can move the Zoom in/Zoom out button to capture the subjects.
   4. Press the Shutter key to start recording.
   5. To stop recording, press the Shutter key again.

**OSD display-recoding video**

![OSD display-recoding video]

- **Video size**
- **Length of recording**
- **Mode icon**
- **White balance**
- **Exposure**

- **Battery life**
- **Storage icon**
Video Menu
When use video mode, press the Menu button to enter set up menu, press down /up button to switch the set up function, then press OK key to enter sub-menu, after entering sub-menu, press the up/down button to select and press the OK key to confirm and back to set up menu. After set up completed, press the Menu button again back to video mode.

Resolution
Divided into 1280×720P, D1, VGA and QVGA, press the up/down button to select, press the OK key to confirm. (High resolution means better image quality, but a larger resolution will occupy more memory storage space, will cause shorter video recording time)

Exposure
+2.0 ~ -2.0 press the up/down button to make the selection, press the OK key to confirm.
Manually adjust the exposure to gain better effect when the preview image appears too bright or too dark. A positive value indicates the image will be brighter than usual; while a negative value makes the image dimmer.

White Balance
Divided into the following 5 options, press the up/down button to make the selection, press the OK key to enter.
- Auto: The camera automatically adjusts white balance.
- Daylight: This setting is suitable for outdoor recording in daylight environment.
- Cloudy: This setting is suitable for recording in cloudy weather or shady environments.
- Tungsten: This setting is suitable for indoor recording with incandescent lamp lighting, or environments with low color temperature.
- Fluorescent: This setting is suitable for indoor recording in fluorescent lamp lighting, or environments with high color temperature.

Setup Mode
In Video Mode/Camera Mode /Playback Mode, press the Menu button, then press right button to enter setup menu, press down button to switch setup function, press OK key to enter sub-menu, after entering sub-menu, use the up/down to select, press OK key to enter. After set up completed, press the Menu button again to exit setup mode.
