VI. Specifications

VII. Cautions

The product should be fixed on the door firmly. Do not close the door too heavily. Note the using environment should be well ventilated and not be wet. Please keep it away from violent daylight, strong magnetic field and dust. When washing its face, do not use chemical thing but clean, soft and dry cloth is strongly advised. Do not keep such a long time for monitor state. Do not press several buttons at one time. Do not make the small metal objects get into the inner part. Do not twist screws for each of them is very important.

Please use it with our company's product. Do not match with other products.

Non-professionals should not demolish inner construction. If need to repair, please contact the distributor of our technical department.

1. Cautions when using battery:

- The battery must be quickly replaced when it is insufficient. Do not use the machine when battery stays a long time in it. Do not leave metal objects inside.
- Do not use battery that burst, deformation, discharge or expired.
- When install the battery, the positive and negative poles should be put in the right position. Different kinds, different brand, old and new should not be mixing used.

2. Cautions when using the battery:

- This product need 3 pieces 1.5V AAA batteries. We adopt the high tech energy saving technology, using large capacity batteries. It can work continuously for more than 20 hours. Standby time keeps more than 100 days.
- On selecting battery, please choose the large capacity alkaline batteries, can reduce replacement cost. Try not to use some defective batteries.
- Alkaline batteries using life is 4-5 times longer than carbon battery, but price is just 1.5-2 times higher. To achieve better use effect, please choose alkaline batteries.

3. Cautions when preserve the battery:

- Using sealing bag and clip bag for preservation. It will be better to avoid contact with air, can reduce the chance of a contacting change. Do not put it into the metal container.
- Keep far away from heat, store in dry and cool place.
- Avoid direct insulation or nears Nearly gas.
- Do not put a battery near the fire or in the fire.
- Do not use battery welded.
