

Bluetooth Headset

User's Guide

1. Introduction

The **Bluetooth Headset** allows you freedom to make and receive calls while on the move or in the office. You can connect the headset to a compatible phone that supports Bluetooth wireless technology.

Read this user guide carefully before using the headset. Read also the user guide for your phone, which provides important safety and maintenance information. Keep the headset and its accessories out of reach of small children.

■ Bluetooth wireless technology

Bluetooth wireless technology allows you to connect compatible communication devices without cables. A Bluetooth connection does not require that the phone and the headset be in line of sight, but both devices should be within 10 meters (30 feet) of each other. Connections can be subject to interference from obstructions, such as walls, or other electronic devices.

The headset is compliant with the Bluetooth Specification 2.0+EDR supporting the following profiles: Headset Profile 1.1 and Hands-Free Profile 1.5. Check with the manufacturers of other devices to determine their compatibility with this device.

There may be restrictions on using Bluetooth technology in some location. Check with your local authorities or service provider.

2. Get started

■ Overview

The headset contains the following parts:

Indicator light (1)

ON/OFF/Answer/end key (2)

Charger connector (3)

Microphone (4)

Earloop (5)

Before you can start using the headset, you must charge the battery and pair the headset with a compatible phone.

 **Note:** Parts of the headset are magnetic. Metallic materials may be attracted to the headset. Do not place credit cards or other magnetic storage media near the headset, because information stored on them may be erased.

■ Chargers and batteries

Check the model number of any charger before using it with this device.

Warning: Use only batteries and chargers approved for use with this particular enhancement. The use of any other types may invalidate any approval or warranty, and may be dangerous.

For availability of approved enhancements, please check with your dealer. When you disconnect the power cord of any enhancement, grasp and pull the plug, not the cord.

■ Charge the battery

This device has an internal, nonremovable, rechargeable battery. Do not attempt to remove the battery from the device as you may damage the device.

1. Connect the charger cable to the headset.
2. Connect the charger to a wall outlet. The red indicator light is during charging. If charging does not start, disconnect the charger, plug it in again, and retry. Charging the battery fully may take up to 2 hours.

3. When the battery is fully charged, the red indicator light turns off and the blue indicator light turns on. Disconnect the charger from the wall outlet and the headset.

The fully charged battery has power for up to 3 hours–6 hours 30 minutes of talk-time or up to 100 hours–180 hours of stand-by time. However, the talk and standby times may vary with different mobile phones, products that use a Bluetooth connection, usage settings, styles, and environments.

■ Switch the headset on or off

To switch on, press and hold the power key. The headset beeps, and the red indicator light is displayed. When the headset is connected to a paired phone and is ready for use, the blue indicator light flashes slowly.

To switch off, press and hold the power key. The headset beeps, and the blue indicator light is flashing twice.

■ Pair the headset with a compatible phone

1. Switch on your phone and the headset.
2. Activate the Bluetooth feature on the phone, and set the phone to search for Bluetooth devices. See the user guide of your phone for instructions.
3. Select the headset from the list of found devices

4. Enter the passcode 0000 to pair and connect the headset to your phone. In some phones you may need to make the connection separately after pairing. See the user guide of your phone for details.

You only need to pair the headset with your phone once.

5. If the pairing is successful, the headset beeps and appears in the phone menu where you can view the currently paired Bluetooth devices.

Disconnect the headset from the phone

To disconnect the headset from your phone (for example, to connect the phone to another Bluetooth device), do one of the following:

- Switch off the headset.
- Disconnect the headset in the Bluetooth menu of your phone.
- Move the headset more than 10 meters (30 feet) away from the phone.

You do not need to delete the pairing with the headset to disconnect it.

Reconnect the paired headset to your phone

To connect the headset to your phone, switch on the headset, make the connection in the Bluetooth menu of your phone, or press and hold the answer/end key

You can set your phone to connect with the headset automatically when the headset is switched on. Change your paired device settings in the Bluetooth menu.

■ Troubleshooting

If you cannot connect the headset to your phone, do as follows:

- Ensure that the headset is charged, switched on, and paired with and connected to your phone.
- Ensure that the Bluetooth feature is activated on your phone.
- Check that the headset is within 10 meters (30 feet) of your phone and that there are no obstructions between the headset and the phone, such as walls or other electronic devices.
- To reset the headset if it stops functioning, although it is charged, plug the headset into a charger, and briefly press the power key and the middle of the volume key. This reset does not clear your settings (for example, pairing settings)

At gas station, oil digging plant, chemical plant or explosion spot, please abide by relevant law or rules, and power off your phone.

Abide by special regulations

Abide by special regulation, and keep your phone power off at phone taboo place may cause interference or danger (such as hospital)

Interference

Any phone may have talk quality interference by radio wave.

Specialization service

The mobile phone watch must be installed and maintained by professionals, unauthorized installing and repairing may cause danger, and will lead to free maintenance service.

Fittings and battery

Only use the fittings and battery approved by suppliers

Use properly

Emergency call

Make sure your phone is power on and at service, input emergency call NO (such as 112 and others), dial to call, tell your position and make a brief of status, and please do not terminate conversation without permission.

Note: as any other mobiles, for the reason of network or signal transfer status may not support all the function of this phone, certain network may even not support 112 emergency calls, so you can not depend on your mobiles totally when there is important communication (such as medical first aid), please contact local network

supplier for information and check

1.3 Battery using

(1) You need to completely charge the battery before use, for a new product. It is better that charge the battery to 14 hours at beginning times, so the battery can achieve full performance

(2) When you charge the battery, the mobile watch have a little fever, but it is installed temperature protection to control the charge of temperature and the charge, usually you need charge for 4 hours

(3) When the battery volume is too low, the screen will show "electricity low" to remind for

charge

Notice:the battery's function(such as standby time and talk time)is different when working due to operation fashion and network system

1.4 Using notice

Your mobile watch is nice design and delicate craftsmanship,it should be protected carefully.The following suggestions will help your machine serve well for many years.

(1)Don't touch screen with sharp objects and keep screen clean.Never use the product when it is damaged,It is normal if the screen startup slowly under low temperature.

(2)Keep your mobile watch other parts and fittings beyond the reach of children.

(3)Please note:you must avoid to spatter water into the mobile phone watch ,if it happen,and not work,it is not covered in the standard warranty policy.

Keep the product dry,keep away from rain,moisture and liquid which may contain corrosive matters,if the mobile is wetted,please take out battery and reput it in after complete drying.

(4)Do not use or store the product at dusty places in order to avoid its parts be damaged.

(5)Do not put the product at hot places.High temperature will shorten the life of electronic circuit board

(6)Do not put the product at cold places,otherwise the mobile will have humidity and damage electronic circuit board.

(7)Do not throw,beat or vibrate your mobile which will damage the electronic circuit board and structure

(8)Do not use corrosive chemical product,cleanser or scour to clean the watch mobile,please dip little suds with a soft towel to clean

(9)If your product or accessories could not work,please send to professional services station,professionals there will provide maintain service for you.

2.Notice before using

2.1 SIM card

Attention:the mobile watch must be power off when you insert or take out the SIM card/T flash card,it is allowed inserting SIM card.

The SIM card should be inserted lightly and making the golden contact area face up and the nick face inside,then turn on the mobile,the mobile will auto search network and turn to standby status.

If you will change another SIM card,should be confirm mobile shut down,then pull out one half of the SIM card lightly,if not the SIM card will be damaged or can no be out.SIM card have your information,including your mobile number,PIN,PIN2,PUK(PIN unlock key),PUK2(PUK2 unlock key)and IMSI code and network info,phone book and messages

Please note:

This mobile support 3V SIM card

Take out/insert SIM card from the slot in the right side of watch mobile after power off for a few seconds.

Please keep your mobile and SIM card beyond the reach of children.

2.1.1 Install SIM card(Insert/take out SIM card)

Note: Before removing the back cover and battery from the phone, always switch off the power and disconnect the phone from the charger or any other connecting device. Always store and use the phone with the back cover attached.

To insert the SIM card into the phone:

1. Remove the back cover by pushing it upwards to detach it from the phone.
2. Remove the battery from the phone.
3. Insert the SIM card:
 - Carefully slide the SIM card into the SIM card slot until the base of the card fits in the base of the slot.
 - Check to ensure that the bevelled corner of the SIM card is on top of the slot and that the gold-coloured area of the card is facing the inside of the phone.

2.2 USB connecting wire

1. Insert the battery:

- Align the gold-coloured contacts of the battery with the corresponding connectors in the battery slot.
- Push the opposite end of the battery until it fits into the battery slot.

2. Place the back cover onto the phone:

- With the extruding piece of the cover facing down, slide the cover until you hear it click into place.

3. Charging the battery

Note: Use only original chargers approved for use with this particular model. The use of any other types may be dangerous, and will invalidate the product warranty.

To charge the phone battery:

3.1 Connect the charger to an AC wall outlet.

3.2 Open the I/O slot cover of the phone.

1>With the triangle symbol on the charger plug facing upwards, connect the power cord from the charger to the I/O slot.

2>The battery indicator bar on the phone starts scrolling and the red light on the charger is lit. It may take several minutes before the battery indicator bar appears on the screen.

Note that you can use the phone while it is charging.

3>When the battery is fully charged, the bar stops scrolling. To stop charging the phone, disconnect the charger from the phone, and then from the AC outlet.

Note: Charge the battery for at least 12 hours before using the phone for the first time.

2.3 Security code

Please input PIN, you can set up if inputting correctly. If setting SIM card as start, you must input PIN password every day for start mobile. Three error for input, you will ask for input PUK (personal unlocking code). PUK code is used and changed the locked PIN code, please contact with the network operations if the PUK code is not provided or lost phone lock.

The function can be used for locking/unlocking, operate or closed when the walkie-talkie password lock. When the walkie-talkie password was locked, if the replacement SIM cards will be switched on imported mobile phone passwords, 4 to 8 digit password for the mobile.
