# User Guide

## I、Basic knowledge

### 1.1 Brief

To keep your mobile phone in good using condition, please read this manual carefully before you use it.

This mobile is the perfect production of personality design and delicate craftsmanship, having flown line figure, comfortable touch feel, perfect combination of convenient hand writing function and keypad, colorful touch screen, dulcet ring tones, cartoon incoming call icons, huge manage function of files, fashionable camera and video function, long time voice record function, MP3/MP4 players, supports MMS, WAP. We are sure our watches mobile will bring convenience and fun to your work and life.

### 1.2 Safety notice

★ If your phone is lost or theft, please notice telecom to ban using of this phone and SIM card. (This function needs the support of network), which can avoid economic loss caused by imitating calls.

★ To avoid misuse of your phone, please take safety measure, such as Setting SIM card and PIN No.

Setting phone PIN

### 1.3 Safety alert and notice

Please do not use your mobile phone watch when you are driving. If have to dial,

please use hand free accessories. Please remember, it is illegal in some countries to having call when driving.

Mobile phone may cause interference to radio devices, using phone on plane is illegal and dangerous, please make sure keep your phone power off during flight.

Power off within dangerous area

At gas station, oil digging plant, chemical plant or explosion spot, please abide by relevant law or rules, and power off your phone.

Abide by special regulations

Abide by special regulation, and keep your phone power off at phone taboo places or any place may cause interference or danger (such as hospital)

Interference

Any phone may have talk quality interference by radio wave.

Specialization service

The mobile phone watch must be installed and maintained by professionals; unauthorized installing and repairing may cause danger, and will lead to free maintenance service.

Fittings and battery

Only use the fittings and battery approved by suppliers

Use properly

Emergency call

Make sure your phone is power on and at service, input emergency call NO, (such as 112 and others), dial to call, tell your position and make a brief of status, and please do not terminate conversation without permission.

Note: As any other mobiles, for the reason of network or signal transfer status

may not support all the functions of this mobile. Certain network may even not support 112 emergency calls. So you can not depend on your mobiles totally when there is important communications, (such as medical first aid). Please contact local network supplier for information and check.

#### 1.4 Battery using

(1) You need to completely charge the battery before use, for a new product, it's better that charge the battery to 14 hours at beginning times, so the battery can achieve full performance.

(2) When you charge the battery, the mobile watch will have a little fever, but it is installed temperature protection to control the change of temperature and the charge, usually you need charge for 4 hours.

(3) When the battery volum is too low, the screen will show "electricity low" to remind for charge.

Notice: the battery's functions ( such as standby time and talk time) is different when working due to operation fashion and network system

#### 1.5 Using notice

Your mobile watch is nice design and delicate craftsmanship, it should be protected carefully. The following suggestions will help your machine serve you well for many years.

(1) Don't touch screen with sharp objects and keep screen clean. Never use the product when it is damaged. It is normal if the screen startup slowly under low temperature.

(2) Keep your mobile watch other parts and fittings beyond the reach of children.

(3) Please note: you must avoid to spatter water into the mobile watch or on its body , if it happen , and not work , it is not covered in the standard warranty policy.

Keep the product dry, keep away from rain, moisture and liquid which may contain corrosive matters, if the mobile is wetted, please take out battery and repute it in after complete drying.

(4) Do not use or store the product at dusty places in order to avoid its parts be damaged?

(5) Do not put the product at hot places. High temperature will shorten the life of electronic circuit board.

(6) Do not put the product at cold places, otherwise the mobile will have humidity and damage electronic circuit board.

(7) Do not throw, beat or vibrate your mobile which will damage the electronic circuit board and structure.

(8) Do not use corrosive chemical product, cleanser or scour to clean the watch mobile. Please dip little suds with a soft towel to clean.

(9) If your product or accessories could not work, please send to professional services station, Professionals there will provide maintain service for you.
