## Cordless Drill & Driver

**Battery Voltage**: 12V  
**Battery Type**: 1500mAH Li-ion  
**No-load Speed**: 0-350/0-1250rpm  
**Keyless Chuck**: 0.8-10mm  
**Max Torque**: 25Nm  
**Max. Screw Diameter**: 6mm  
**Max. Drilling Capacity**:  
- Wood: 15mm  
- Metal: 6.5mm  
**Torque Setting**: 18+1  
**Charging Time**: 1hr  
**Drill Weight**: 1kg

---

**Power 12V**  
**Long-lasting Discharge**

---

**Caution and Safety:**

1. Please recharge the drill in time after Li-ion battery runs out and the drill stops working. Don’t use the leftover power, which might cause the battery zero voltage and fail to recharge. The motor stops working when battery is being recharged. This tool has recharge protection. It will stop working when the temperature is under zero degree.

2. Use only approved charging equipment.

3. Light instructions for charging: When the charger connect the power and ready to charging, the light on the charger shows green. And when it start charging, the light turns red. The light will turn back green after fully charged.

4. Keep the working area clean. Don’t use the tool in the area of rain, over-moisture and combustible liquid and gas.

5. Keep the power wire away from heat, oil, nude conductor and sparks. The adapter needs to be replaced with the new one once the wire damaged.

6. Store in a cool, dry place away from sparks, flame and children.

7. Use the tool properly. Don’t use the tool beyond its working capacity.

8. Don’t use the tool beyond its function.

9. Use standard industrial clothing and wear proper protection glasses in normal use.

10. Li-ion batteries are recyclable.
