

# LED Watch - replacement of battery

---

## Step 1

Find a suitable screwdriver to turn on the 4 pcs of small screws.

---

---

## Step 2

Unscrew and take off the 4 pcs of small screws on the conductive steel sheet.

---

---

### Step 3

Replace with 2 pcs of new CR2016 batteries!  
Then tighten the screws in the same way as  
you disassemble it.

---

---

### Step 4

Please touch the watch face again after 5  
minutes.

---

**Notice:** This article works with touch inductive system, please replace the batteries according to the above-mentioned operating steps within 5 minutes during the period of disassemble and assemble. Otherwise, the sensitive touching system failures to work! You need to repeat to disassemble and assemble operation.
