GPS Portable Navigation Device

User Manual
Please read this manual before you start using this device

Thanks for purchasing our product. Please read this manual carefully before starting to use this device. When you use this device, you are supposed to learn well of this product.

The information in this manual has been verified for its accuracy. But no liability will be applied for the correctness of mapping data or satellite positioning signal by stopping your car for a better and safer driving. It is suggested to search for satellite signal again. To track the new "Satellite Path", this will take quite a long time. To save time for this searching, you may click "GPS Reset" button in menu of "GPS Testing" to clear the previous "Satellite Path".

While the GPS device is receiving satellite signals, you will get signals from different satellites when you are in different places. This is called "Satellite Path", a "Satellite Path" only covers a range of 300 KM. If a "Satellite Path" is defined at place A, then turn off the device and move to another place beyond 300 KM away from A, the device is under another "Satellite Path". At this moment, the device needs to search for satellite signal again. The navigation software and mapping data is provided by a third party. Its copyright is protected by laws. A User can only use on this device, any copying or application of the software for other purpose is not allowed.

No explicit and/or implicit guarantee or assurance will be applicable for the validity, integrity, correctness, accuracy of mapping data for navigation used on this device, nor liability for any loss, damage, and/or any consequence caused by or related to defective mapping data or software used on this device.

The copyright of this manual is owned by the company and protected by laws. Any copy or translation of whole or part of its content, including words, figures, signs, phonetic index, etc., is only allowed for the individual customer's reference, but not for public circulation, or other legal and/or commercial purpose. The company reserves the right for final interpretation of this manual.

General tips for GPS application
The following content is tips for GPS device application and operation. Please read it before starting use of the GPS device, so that you may make a better use of the GPS device.

While the GPS device is working, it receives signal from satellites for positioning. The signal from satellite may not be received, or be weakened in room, nearby some big buildings, or under overhead bridges.

When the GPS device is receiving satellite signals, you will get signals from different satellites when you are in different places, this is called "Satellite Path", a "Satellite Path" only covers a range of 300 KM. If a "Satellite Path" is defined at place A, then turn off the device and move to another place beyond 300 KM away from A, the device is under another "Satellite Path". At this moment, the device needs to search for satellite signal again. To track the new "Satellite Path", this will take quite a long time. To save time for this searching, you may click "GPS Reset" button in menu of "GPS Testing" to clear the previous "Satellite Path".

It will be difficult and taking more time to catch positioning signal from satellite during high speed driving. It is suggested to search the positioning signal by stopping your car for a better and safer effect.

While charging the device, please only use the travel charger or car charger equipped by the manufacturer in its original package. Other chargers may cause damage to this device, and this damage is not covered by our warranty.

Features:
4.3"/4.8" TFT display with touch screen for control and input

Professional portable navigation system, UI design for mobile application, Convenient operation

Most popular Windows OS, World class CPU
SD card of extensible capacity for mapping data, MP4 video, MP3 music, Photo, and personal files
Map for major large and medium scale cities, detailed mapping data, real voice guidance, automatic smooth switching

Built-in high sensitive GPS receiving module and antenna, Faster GPS signal receiving and More accurate positioning
Prompt and accurate positioning applicable for GPS data collection, e.g. Area measuring
Prompt response for both cold and warm start; Re-capture of GPS signal just in 1 second on average, Accuracy of positioning: no more than 10 meters; Accuracy of timing: no more than 1 microsecond.

Embedded Organizer/Calendar, personalized friendly touch panel handwriting control, record and plan personal schedule.

Multimedia entertainment: Flash display, MP3 music, MP4 video, Photo viewing.

Scientific calculation: embedded calculator, a good business assistant.

The FM transmitter designed for use in a car with car stereo is not controlled with volume of the device.

Personalized function setting: Language selection, Backlight brightness adjustment; Power management, Coordination calibration.

A user friendly feature is GPS "hold On". With this feature, you may use the device for other applications, like music, e-Book, except for Flash, by pressing Return button on the device to switch GPS application to background and keep it running without exiting from GPS application during the same time.

**Warnings:**

Please install the device in a right way to avoid driver's sight and airbag to be hindered. Any loss or damage of product, passengers, or other property caused by mistakes of mounting or installing of the device will be not covered within the warranty and not be the responsibility of the manufacturer.

Please not put on earphone and operate the device when you drive or ride a bike to ensure your safety.

Please consult with airline crew for application of the device if you want to use it during flight.

Please keep the device far away from strong magnetic field which may cause damage or malfunction to the device.

Please protect the device from being dropped, shocked or scratched on or by hard objects to avoid possible damages (scratches on the device face, loose contact of the battery, data loss or other hardware part broken) to the device.

Please not use earphone with a continuous and large volume for long time, set the volume at a moderate loudness and use it not for a long time to avoid possible damage to your ear audibility.

Please not use chemical solution or cleaner to clean the device to avoid possible damage to the paint and polish of its surface.

When the device is used as a mobile storage device, please follow right procedures of file management operation to copy or transfer files. The warranty does not cover any mistake, or damage, or loss of files.

It will be better for you to make a backup copy of your personal files in the device into your PC or laptop in time.

It is prohibited to use higher voltage power supply, to bent or squeeze the power cord with big force so as to avoid possible damage and overheat resulting in fire.

Never use wet hands to pull out or plug in the power plug to avoid possible electric shock.

Not use the device in an environment over 80°C, or below -10°C, and with high humidity as well.

The content of this manual is subject to definition, or interpretation, or modification from time to time for improvement on features and function without prior notice.

**Illustrations on screen display:**

System UI(Projector Screen)

Under this UI, click icon down the screen to enter the function page. Then there will be Looped playback of cartoon, click it to entry this function. If you click the icons beside the function icon you can enjoy...
the cartoon. If you click the arrow up the corner you can turn pages to view, which accompanies the cartoon at the same time.

**Secondary UI (Projector Screen)**

In this interface, click the icons on the screen to enter the corresponding functions; and click the arrow on the right bottom to turn the page. There will be an animation effect when turning the page.

**System UI (Green background)**

In this interface, click the small icon to switch to the corresponding page. Then, an animation is played circularly on the screen. Touch the screen or the small icon on the bottom to enter the function, and click the arrow on the right bottom to turn the page. There will be an animation effect when turning the page.

**Secondary UI (Green background)**

In this interface, click the icons on the screen to enter the corresponding functions; and click the arrow on the right bottom to turn the page. There will be an animation effect when turning the page.

Two kinds of theme interfaces are available. To change the theme, change it in the language setup under the system setup.

---

When the battery is at low power level, please charge it immediately to ensure the device work normally.

**Charging:**

Warnings for charging:

1. A new battery may be empty and not charged before you get the device.
2. To achieve the best performance of the battery, it is better to charge it up to 8 hours in the first three times, but not over 16 hours.
3. In normal charging with DC charger, please make sure to charge it for 2 – 2.5 hours to get it fully charged.

A new battery will reach its best performance after a number cycles of charging and discharging.

If the device is not used for long time, it is better to charge it to full capacity every 2 or 3 months during storage.

If not using the device for a long time, it is wise to take out the battery.

**Charger Application:**

**DC Charger:**

Take out the DC charger, plug it into the wall outlet with AC 220V(100V – 240V), then plug in the DC jack into the device DC-in jack.(see the illustration below).

**Car Lighter Charger:**

Please insert the car charger into car cigarette lighter jack, then plug into the USB jack(see the illustration below).

When you use car charger, please start car engine first, then connect it to the device to avoid possible damage to the device due to overloaded pulse current during ignition.

Please pull it out when you stop the engine, and plug it in again after next ignition.

**Power On/Off the device**

In power off status, slide the power switch to "ON" position to turn on the device, then the OSD will be displayed on screen.

**Sleeping & Power-off**

In power-on mode, press the power button on the device for 3-5 seconds
then the sleeping mode or confirmation for power-off screen will display as follows:

```
The device will be power off in 20s.
```

In this UI click the button will be in sleeping mode, click the button will power off, click the button to exit the UI and back to normal operation.

**Waking up from the sleeping**

When in sleeping mode, a short press on the power-on button of the device will wake up the system.

When in sleeping mode, all the procedure in operation will pause but will back to normal status after waking up.

**Mobile TV**

**Introduction**

**Key features**

- Digital TV live-in playback;

Tap "Apply" button to Save all the Settings Change, and close setting menu.
Tap "Reset" button will reset the setting to default value.

Note: Encrypted channel is defined as following:
1. The channel descriptor reports it is an encrypted channel;
2. The channel descriptor reports it is not an encrypted channel BUT at least one multimedia stream is encrypted (either audio or video);

---

**FLASH Play**

This is for Flash file playing.

Operation:

On system main menu, click icon, to get into Flash playing mode, then file selection UI will be shown on screen:

![UI for file selection](image)

on this UI, click button to search Flash files not in selected folder; click button to close this window and exit Flash playing mode; double click, or select then click button to open the selected file.

Control buttons in playing mode:
- Play, in Pause or Stop mode, press this button to play;
- Pause, in Play mode, pressing this button to pause;
- Stop, in Play mode, pressing this button to stop;
- Fast Forward, in Play mode, pressing this button to get fast forward once;

---

**Video Playback**

This feature is for video file playing, with the formats: AVI, MPEG, MPG, ASX, DAT,ASF and WMV.

Operation:

On system main menu, click icon to enter Video Playback application. Display of UI for file selection:

![UI for file selection](image)

On this UI, click button to search video files not listed in the appointed video file folder; Click button to close and exit from Video Playback application; Double click or select and click button to open and play this file.

UI and button definition:
- Play
- Pause
- Stop
- Close
- Next
- Previous
- Full screen display
- Play Progression, drag to a point to start play
Volume tune, click anterior to set into mute status, click it again to resume.

In full screen display, the tool bar at screen bottom will be hidden, you can slightly tap on screen to get it. It will take a few minutes to search files when video play mode starts if this application has not been used for a long time.

**RMVB Player**

This function is special for RM and RMVB files.

Operation:

In the system UI, click the icon to enter the function of Media player, then click the "RM" to enter into the Video Player. And the screen will display as follows:

On the present UI, click the button to search the video files which you have saved before time. Click the button to exit the rmvb player, double-click the file you select or click the button you can open the file.

**UI and button definition:**

- Play
- Pause
- Stop
- Close
- Next
- Previous
- Full screen display
- Full screen Display (Stretch to the whole screen)

**Music Playback**

This is for Music Playback with format of MP3, WMA, WAV.

Operation:

On system main menu, click icon to play music. Screen display is shown as the illustration below:

On this UI, click button to search for music files not in selected folder; click button to close this window and exit music play mode; double click, or select then click button to play this music file. Music play mode is displayed as following diagrams:

**Button and control in Play Mode:**

In music play mode, click button to pause, then it becomes Play Button ; At this time click button, music play mode will return again; click button to stop; click button to jump to the next one, click button to jump to the previous one; click button to switch Repeat mode; click button to set mute, then this button will become , click again to recover.

Exit from Music play

Click button at the upper right corner to exit.

**Bluetooth Function**

The Bluetooth function is used for communication purpose. After the device is connected to a mobile phone with Bluetooth capability, you can operate the mobile phone functions on this system. He can dial or receive a call, view the call record of the mobile phone or perform other functions. Click the Bluetooth icon on the main interface and enter the following interface:
Enabling Bluetooth Function

In the first use of the Bluetooth function, you will see the interface shown above. Only Bluetooth Setting is available. Other functions are all unavailable in the gray-out state. At this time, enable the Bluetooth function. Click Bluetooth Setting to enter the setting interface, as shown in the following diagram:

On this interface, the PIN code is the identification code to connect the mobile phone. To connect the mobile phone, you need to enter this code on the mobile phone before the connection is established. The number can be set freely. Click the keypad icon behind the number and enter the input interface.

Select by ticking the check box ahead of the Enable Bluetooth Function to enable the function. The return to the upper-level menu and the following interface is displayed:

At this time, as the mobile phone is not connected, other mobile phone functions are unavailable.

Connecting Mobile Phone

After the Bluetooth function is enabled, on the Bluetooth function interface, click the Pair icon to enter the Bluetooth equipment matching function, as shown in the following diagram:

If connection has been established in the past, the interface will list all devices that have been connected in the past. Select a device and directly click the Connect button to connect to the device. The connecting process may take a few seconds. Be patient. Click the Delete button to delete all connected records.

In the case of first use, please click the Pair button at the right lower corner to enter the equipment search interface. Start the countdown of 60 seconds, as shown in the following diagram:

```
Please pair or connect the local device through your bluetooth call phone, the default pin code is 8888.
60
Pairing in progress, please wait...
```

At this time, enable the Bluetooth function of the mobile phone to search the Bluetooth device. After it is found, enter the same PIN code as that displayed on the screen of this system and match the device. The screen will also display "You've matched your mobile phone successfully!"

At this moment, click OK to return to the upper-level interface. You'll see that all functions are available now, as shown in the following diagram:

Dial Keypad

On the Bluetooth function interface, click the Dial icon to enter the Dial Keypad:

If connection has been established in the past, the screen display is shown in the following diagram:

At this time, click the number keypad to enter the telephone number to be dialed, and then click the Dial button at the right lower corner to dial the number. Click the Back button to return to the upper-level function.

After the Dial button is clicked, the mobile phone enters the call state. The screen display is shown in the following diagram:
During the call, click the Disconnect button to end the call.

View Call Record of Mobile Phone
On the Bluetooth function interface, click the Call Register icon to enter the Call Record. To read the information of the mobile phone in this function, it may take some time. The screen display is shown in the following diagram:

Then, click the X or button to select previous or next photos; click button to zoom in or zoom out photo; click button for full screen display. In full screen display, tap the screen again to exit full screen display; click button to select display of different percentage. Click the button you can Ctrl-Shift-R or Ctrl-R the photo. is for selecting to set automatic or manual mode to turn page of display.

Exit Photo Display
Click the button on upper right corner to exit.

Schedule Organizer
This is to Add, Edit, Delete schedule, and display the schedule in week, month, enable the user to find the scheduled agenda conveniently.
Operation:
In the system UI, click the icon to open Tools, under which you can entry the Schedule by clicking the icon . The illustration will show like below:

The screen display is in month display mode. The date to be completed for the matters on screen show in red color. Click the date to enter into day display mode; click “Week” to enter into week display mode.

Search by Date
Select and click a date on the screen to enter into Date display mode. Screen display is shown as in the illustration below:

As shown in the picture, the middle empty area is the handwriting area. Click the button on the right side to change the input method, and click "Hide" to close the handwriting input panel; click "keyboard" to return to keyboard input state.

Input "Subject, Place, Content" you want to set; "Date, Time" can be input directly, or use adjustment buttons to set; "Priority, Type" can be selected in drag menu underneath them respectively.

When finished, click "Save" to save the revised schedule, then return back to mode of Search by Month.

Delete Schedule
In mode of Search by Month, click "Delete" button at bottom of the screen to enter into delete mode, all schedule saved in the system will be listed out, screen display is shown as in the illustration below:

In this mode, click drag menu after "Time, All" to choose other list, select an agenda to be deleted, then click button, a dialogue block will pop up, select "OK" to delete this agenda. Click button at upper right corner to exit Delete mode, then return to mode of Search by Month.

Exit mode of Schedule Organizer
In mode of Search by Month, click button at upper right corner of the screen to return to main menu of system.

**FM Transmission (optional)**
This feature is designed for transmitting the sound of this device at a set frequency to your car FM radio receiver, then you can hear from your car stereo system, and get it at volume set by the car stereo system.

Operation:
In the system UI open the Tools then find the icon to activate FM. It will be illustrated like below:

Then you may select "Transmission On" or "Transmission Off", when select "Transmission On", you may also select device speaker on or off. It is suggested to close the device speaker when "Transmission On" is selected.

Press or button, or directly drag the slide bar to set FM transmission frequency, then turn on car radio FM receiver and tune it to the same frequency as the transmission, then you may get the sound from the device.

Status Display:
When FM transmission is on, you may see an icon on the main menu screen:

As shown in the above diagram, the pane on the left of the interface shows the titles of the saved notes. Click a note title to display the full content on the content pane on the right.

Operation Procedure:
In the system UI, click the icon to open Tools, then find the icon and click it to entry Notepad Function. It will show like below:

As shown in the above illustration, the calculators can be used like normal others. Click "Scientific/Ordinary" on the right to switch between Scientific Calculator and Ordinary Calculator; The unit of calculation of the right can be taken according to actual demand.

Exit Calculator Mode
In Calculator mode, click button at the upper right corner of the screen to exit and return to system main menu.

Notepad Function
With the Notepad function, you can record some instantaneous simple information as memo. It is a highly practical function.

Operation Procedure:
In the system UI, click the icon to open Tools, then find the icon and click it to entry Notepad Function. It will show like below:

As shown in the above diagram, the pane on the left of the interface shows the titles of the saved notes. Click a note title to display the full content on the content pane on the right.

Creating a Note
Operation Procedure: On the main interface of the Notepad function, click the button to enter the state of adding notes. The screen display is shown in the following diagram:

The screen shows the soft keyboard when it is in input state.
As shown in the picture, you can choose the input method from the last button at the bottom; click "Handwrite" to change to the handwriting
input state; and click "Hide" to close the small keyboard. The handwriting input state is shown as follows:

As shown in the picture, the middle empty area is the handwriting area. Click the button on the right side to change the input method, and click "Hide" to close the handwriting input panel; click "keyboard" to return to keyboard input state.

Enter the content to be saved, hide the soft keypad, click the button in the lower part of the screen to save the entered content and return to the main interface of the Notepad function.

Edit/modify Notes Saved
On the main interface of the Notepad function, select the note to be modified, and then click the button in the lower part of the screen to enter the note editing state. The screen display and operation are all the same as "Creating a Note". After the modification, click the button to save it, and return to the main interface of the Notepad function.

Deleting a Note
On the main interface of the Notepad function, select the note to be deleted, and then click the button in the lower part of the screen. The screen pops up the dialog box to confirm the deletion. Click OK to delete the note.

Exiting Notepad Function
On the main interface of the Notepad function, click the button on the upper right corner to exit the Notepad function and return to the system main interface.

Alarm (Optional)
The system can give warning of the relevant monitoring devices on road to alert the safety drive.

Operating method:
In the system main interface, click button to enter the early warning system. The screen is shown as follows:

There are four modules: Setting, Style, Data manager, and Simulator. Click the icons on the interface to enter the corresponding functions.

Setting
It is to enable the early warning function and to set some warning parameters, such as warning distance and mode. As follows:

Click "Start Alarm" on the left bottom. The tick in the square frame means the electronic warning system is enabled; "Distance(H)"; Set the warning distance in high-speed drive; "Distance(L)"; Set the warning distance in low-speed drive; "Have Sound": Cancel the warning when there is a certain distance away from the alarm point.

Style
This is to set the type of warning of the warning system, as shown below:

You can enable different types of warning as required in this interface.

Simulator
This is to simulate the alarm state of all kinds of warning items, as shown below:

Click the icon on the screen to experience the corresponding alarm.

DataManager
This function is to add the type of warning and the coordinate manually to perfect the warning data. It is a convenient and user-friendly function. The screen is shown as follows:
If you find the traffic monitoring facilities that the device does not contain when you are driving, you can add them to the database manually. Operations: First, the device should be in the place of monitoring facility, set the warning system to the above interface, and choose a type of warning; then, click “Add” to add it to the database. The warning system will give you an alarm next time you pass by this place.

System Setting
This is for system setting to change default setting of the system to your personal preference.

Operation:
On system main menu, click icon to enter into system setting.

In system setting, there 9 items for setting, click directly each item to change setting for it. Details will be described one by one below.

Language Setting
This is for setting of system language, screen display is shown as the illustration below:

Click the icons of the corresponding language in this interface or choose the interface project, the system will save the setup automatically when the setup is closed, and return to the previous menu. (The system will be required to restart after the interface project is changed.)

Backlight setting
This is for changing backlight brightness of the device screen display, and time to start screen saver when no operation on the device.

Screen display is shown as the illustration below:

Then, drag the slide block to set. Select No Screen Saver, then the screen saver will be disabled. After setting, close the current window to save.

Power Management
This is for setting auto power off and/or power saving mode, and time to start power off and/or power saving when no operation on the device.

In drag menu to select time, select “No” for disabling this feature. After setting, close the current window to save.

Sound Setting
This is for setting of beeping of power on, button operation on screen, and total volume. After entering into this UI, screen display is shown as the illustration below:

Click “Screen sound” in this interface to enable or disable the sound of screen operations. “Open TTS” is to enable the speech broadcasting function. TTS speech engine gives a clear broadcasting of the function name every time you enter into a function. English and Chinese speeches are supported for the moment. You can listen to the sound by clicking the start-up sound directly; and the general volume can be adjusted by dragging the slide directly.

User-defined start-up music
In the present interface, click “customize Sound” then its dialog window will show up, illustrated as below:
"Nand Flash" is the inside memory of the device, "SDMMC" is the SD card. So the start-up music can be selected from both of them. Select one, click the button to confirm, then back to the upper-level interface.

**Time Setting**
This is for setting time of the system. After entering into this UI, screen display is shown as the illustration below:

As shown in the picture, the middle empty area is the handwriting area. Click the button on the right side to change the input method, and click "Hide" to close the handwriting input panel; click "keyboard" to return to keyboard input state.
Enter the desired characters and click "Next" to start searching. Click this button again to search for the next one if the result is not up to the demand.

TTS speech broadcasting
TTS speech broadcasting function is able to read the article you are browsing. Click button to set the parameter of speech broadcasting as follows:

TTS speech speed, tone, and volume are available to be adjusted. Click "OK" to save the setup and close the window when everything is set. Click button to read the articles; the page will be turned automatically when reading.

Car-backing Rear View Function
This function is a fully automatic function. No manual operation is needed.
Equipment Installation:
The receiving device of car-backing rear view is installed on the seat of the navigator. In that regard, before the use of the device, it should be installed on the vehicle mount bracket. The rear view camera should be installed in the professional vehicle refit shop.
This function needs the navigator as monitor. In that regard, when the car-backing rear view function is enabled, do not turn off the navigator. Once the vehicle is engaged in the backing gear, the navigator receives the signals, and automatically switches to the display image of the rear view camera. When the vehicle is not engaged in the backing gear, the navigator will switch to the previous work mode automatically.

Returning to Win CE Desktop
The device can return to the Win CE by pressing one key and implement the PDA functions.
Operation Procedure:
On the system main interface, click the icon and the screen pops
up the confirmation dialog box. Click OK to return to the Win CE desktop. At this time, you can perform relevant operations.

Return to the navigation system from the Win CE desktop:

On the Win CE desktop, click the icon to start the navigation system.

**Video Input Function**

The device supports the video input function. The video signals outputted by another device are transmitted to the device through a video cable. The device can work as monitor. Without any operation, the device will detect automatically the input of the video signals, and will automatically switch the current function to the video display state. After the connecting cable is disconnected, the system will return automatically to the previous work mode.

How to save and allocate files in 3D card:

Usually, the files used by the device are saved in the appointed folders to ensure the access for embedded program of the device. You may save files into other folders or under root directory of the SD card. If the files are saved in the appointed folders, when opening the corresponding application, these files can be seen directly; If not in the folders, then you can not see them for the application, so that you need to click "Search" button, the system will search in all files in un-appointed folders until find it and display the result of search. For the sake of convenience, it is strongly suggested to save the files into the corresponding folders. The function and application of folders in SD card is listed below:

- **eBook File**
- **Video File**
- **Navigation File**
- **Photo File**
- **Music File**

Attention: Navigation software must be saved into GSP directory.
