4.3" Internet Tablet User's Manual

Congratulations on purchasing your Internet Tablet. To get the most out of your purchase, please take time to carefully read through this manual.

4. Multi-Media
Your device supports the following media formats:

Audio file formats supported:
MP3, WMA (non-encrypted), MP2, OGG, AAC, M4A, FLAC, 3GP, WAV

Supported video formats:
AVI (H.264, DIVX, XVID), RM, RMVB, MKV (H.264, DIVX, XVID), WMV, MP4 (H.264, MPEC, DIVX, XVID), MPEC, MPG, FLV (H.263, H.264), HD 1080P max

Supported image formats: JPEG, JPEG, GIF, BMP, PNG

4.1 Music
Your music can be divided into four types: artists, album, all music, and play list. Choose a type to view the list. If you bring one type, continue to narrow your selection, until the music you want to play appears. For example, if you choose artist type, you can see the artist name from A to Z. If you choose one artist, a list will display the artist's albums and album list.

4.2 Video
Tap the video application
1. Tap an entry or list selection.
2. The device will display all compatible video files.
3. Tap the play you want to play.

4.3 Images
View images
1. Tap the image gallery application.
2. This will bring up the image gallery. Tap the file or folder you want to view.
3. Tap the image you want to view, the system will view the image in full screen.
4. When you view images, you can zoom in and out by pinching or sliding two fingers apart.

Edit and setting images as a contact or desktop
After opening an image, tap the image again to bring up your menu and delete icons. Tap again the delete icon will allow you to delete the image. Tapping the menu icon will bring up your image sub-menu. Blukselect. Tap to enable selection mode.
Edit. Tap to edit the image.
Crop. Tap to crop the image.
Set picture. Tap to set the picture as a "Contact image" or "Wallpaper".
Details. Tap to display image details, such as filename, creation date, dimensions, orientation, file size, path, etc.

5. Email
The Email application allows you to access an external POP3 or IMAP email account provider such as Yahoo, Gmail and 163.

Note: Before setting up your email, please ensure that you are connected to WiFi. If you do not already know your email settings (POP3, IMAP, etc.) you can obtain them from your email provider:
1) Tap the Email app.
2) An email setting guide will open.
3) Enter your email account password and password.
4) Tap the next button, choose your email type, POP3 or IMAP.
5) Tap the next button to check the email settings.
6) Enter the account name and the email sender's name, tap finish.
7) If the mailbox is available, it will enter into your inbox.

3) Tap OK.
7.2 Adjust screen standby time
1) Tap the setting icon.
2) Tap display—>Sleep, select the amount of idle time you want to pass before the device enters standby mode to conserve power.
3) Tap OK.
7.3 Setting a screen lock.
NOTE: If you set a password, PIN, or Pattern, and later forget this item, you will be LOCKED OUT of your device. For security purposes, we can NOT recover a lost password, PIN, or Pattern for you.

8. Installation Applications
8.1 Installation
Install the third party application procedure
While the main method of loading applications involves using an app store, if you have an individual APK file, you can use that to install the app.

Save the APK file to your device. We recommend saving APK files to the Downloads folder for ease in finding them:
1) Tap the navigation manager, choose the application you wish to install.
2) Tap Install APK.
3) Follow the installation instructions listed on the screen.

8.2 Uninstall an app
Tap the setting icon.
1) Tap Application.
2) Select the application you want to uninstall, tap uninstall.
3) Tap OK to finish uninstalling the app.

9. Troubleshooting
1) It takes a long time to power up when I power on for the first time.
The first time you power the device on, or after updating the device, it may take as long as 3 minutes to power on as it initializes files. Subsequent power sequences should take less than a minute.
2) Sometimes, the device feels warm to the touch.
When charging, or after a long period of use, it is common for the device to feel slightly warm. This is normal as the battery charges or discharges and is not a cause for concern.
3) My device will not connect to a WiFi.
   a) Ensure that you are in an area with a strong WiFi signal.
   b) Please make sure the password you are using is correct.
4) Cannot surf the Internet.
   a) Please make sure the distance between the device and the wireless router is within 50 yards.
   b) Please re-connect the WiFi.
5) Sometimes, the device runs slowly.
   a) The more apps you have open and running, the slower the device will run. You can enter your application settings to disable or "kill" applications to free up processor and memory resources. In addition, there are many "Task Killer" applications which can do this.
