OPERATION MANUAL

Digital & Clock Time User Interface (Two Sets)
Dear customer,

Thanks for your purchase! Please read this manual carefully, and keep it for future reference.

**Warning**

The disk must be clean. Please clean it if having dust. The disk must be cleaned by soft cloth, then put the disk into the device. Otherwise, the dust will be taken into the machine and it affects the machine to insert and eject slowly or not insert and eject.
Notes on installation

The unit is designed for 12-14v dc, negative ground operation system only. Before installing the unit, make sure your vehicle is connected to 12v-14v dc negative grounded electrical system.

The negative battery terminal must be disconnected before making connections, which can reduce damaging to the unit due to short circuit.

Be sure to connect the color coded leads correctly according to the diagram. Incorrect connection may cause the unit malfunction or damage the vehicle's electrical system.

Be sure to connect the speaker(-) leads to the speaker(-) terminal. Never connect the left and right channel speaker cables each other or to the vehicle body. Do not block vents or radiator panels. Blocking them will cause heat to build up inside any may result in fire.

After the completion of the installation and begin to operate the unit (including replacing the battery), please press the reset button(1) on the front panel with pointed objects (such as ball pen) to set the unit to initial status.

Steering wheel setting

Setup and use of steering wheel:

If your car with steering wheel control, please operate as follows:
1. Under the circumstance of power cut off, find the grounding wire of your car's steering wheel wires. (Note: some cars have three pieces of wires, others have two pieces), then, connect it to the grounding wire of three pieces of steering wheel wires drew forth from the main unit. If your car's steering wheel has three pieces of wires, connect the other two pieces of key wires to the rest two pieces of key wires drew forth from the main unit, you can connect them at will; if your car's steering wheel has two pieces of wire totally, you can connect the rest one to any piece of the rest two pieces of key wire drew forth from the main unit;

2. Supply the power to turn on the unit after you confirm the steering wheel connection wires all correct, press the setup button of upper right corner in the screen to enter setup menu;

3. Press the center of direction setup button in the top of setup menu, the steering wheel setup menu will bound out;

4. After steering wheel setup menu bound out, press text button firstly, you will see sample figure of A and B displayed in information box, this is the initial figure that the main unit get sample to car's steering wheel.

5. Then, press the following key "cancel" firstly to clear all keys. Note: you must press this key to clear all previous setting before every to change setting.

6. And then, you can make the keys learn. after you press the top function key, the information box will prompt "PLS PRESS KEY" to prompt user to press key of car's steering wheel that need to define. when you have pressed the key of car's steering wheel, the information box will display the key figure that you pressed, that means the key has been got sample by main unit, then, you can learn the next key till finish all keys learning.

7. When complete the learning, you need to press "complete" to save the key you have learned and start steering wheel function, if you didn't press "apply" key after finished learning, before you will study will make invalid processing.

8. If you don't want it after finish learning, press "cancel" to cancel it, at the same time, close the steering wheel function.

9. If you think that some keys' sample figures are very close during learning and it's easy to mistake code, press exchange two wires, means exchange previous two pieces of wires from car steering wheel to unit drew forth. If the car's steering wheel just has one piece of wire, please connect the key wire of steering wheel to the other wire of unit, then return to the first step to learn.

10. Maybe there are several keys in car's steering wheel, you can define by yourself, make the key function of steering wheel and key function in menu correspondence, and finish learning. You can ignore it if a key in menu but not in steering wheel, it won't influence normal use. You just need to learn the keys which are in steering wheel's OK.

11. You can also enter setup menu and press "cancel" to close steering wheel function after finish learning steering wheel. After closed the steering wheel will have no function. If you need to turn on steering wheel function, please return to the first step and re-learn to setup.

**System Setup Menu**

You can press Setup key on the remote control to bring up the System Setup Menu when the unit is under the stop/playback mode.

**SETUP MENU Main Page**

Press up/down direction button to select an item, then press ENTER.

**System Setup**

**TV SYSTEM**

According to the Color System of the TV, you can choose the TV System.

- AUTO: Choose this setting if your DVD player is connected to a multi-system TV.
- NTSC: Choose this setting if your DVD player is connected to a NTSC TV.
- PAL: Choose this setting if your DVD player is connected to a PAL TV.
- PAL60: Choose this setting if your DVD player is connected to a PAL60 TV.

The default setting is NTSC.

**SCREEN SAVER**

If the screen saver is on, when your DVD player is in Stop, Open, or No Disc state, or there is a frame frozen for more than 3 minutes, the screen saver will be displayed. This feature can protect the screen from damage.

- ON: Choose this setting to activate the screen saver.
- OFF: Choose this setting to cancel the screen saver

The default setting is ON.

**TV TYPE**

16:9 (Wide Screen): Choose this setting if your DVD player is connected to a wide screen TV. If you choose this setting and you don’t have a wide screen TV, the images on the screen may appear distorted due to vertical compression.

4:3 LB (Letter Box): Choosing this setting if your DVD player is connected to a normal ratio TV. You’ll see the movies in their original aspect ratio (height-to-width ratio). You’ll see the entire frame of the movie, but it will take up a smaller portion of the screen vertically. The movie might appear with black bars at the top and bottom of the screen.

4:3 PS (Pan & Scan): Choosing this setting if your DVD player is connected to a normal ratio TV. You can fill the movie to the entire screen of your TV. This might mean that parts of the picture (the left and right edges) won’t be seen.

**PASSWORD**

The password option is initialized locked, and you cannot set the ratings limit or change the password. In order for the Ratings feature work, the password mode must be turned on. If you want to set the ratings limit, you will need to enter the default password, which is 0000, then press Enter to confirm. To change the
System Setup Menu

password, you will be prompted for the old password, then be prompted for a new. Enter a 4-digit number (this is your password).

Notes: Some time, the password is 6-digit number, the default is 000000.

RATING

The Rating feature is a rating limit system, like movie ratings. It works with DVD discs that have been assigned a rating. This helps you control the types of DVDs that your family watches.

There are two rating options: NO ADULT and KID SAFE.

Select the VIEW ALL option to cancel the rating limit.

The default setting is VIEW ALL.

DEFAULT

Choose this option to resume all the setup options to default settings.

SPECIFICATION

General
Power supply 4.4VDC
Load 4Ω
Max. Power output 50W*4
Tone control +/-8db(Bass:100Hz,Treble:10KHz)
Dimensions
Installation dimension About192*178*100mm(D*W*H)
About169*182*103mm(D*W*H)
Applicable disc
MPEG4,DVD,SUPER,VCD,MP3,CD,CD-R,CD-RW,PICTURE-CD
Video system
AUTO, NTSC, PAL
Installation angle
0-+/-30
Video
16:9 Mail MODE/16:9FULL SCREEN
Video system 1.0Vp-p.75ohms
Video output 500
Resolution 600 Ω (2.0Vrms)
Max. Output 20Hz-20 KHz
Frequency scope
