2 Getting Started

⚠️ WARNING: When using this device, basic safety precautions should always be followed to reduce the risk of fire, electric shock, and injury to persons, including the following:

- Do not use this product near water, for example, near a bathtub, wash bowl, or laundry tub, in a wet basement, or near a swimming pool.
- Avoid using this product during an electrical storm. There may be a remote risk of electric shock from lightning.

2.1 Basic Operation

1. Install support column: screwing support column into the threaded hole in the back of the unit. When the unit is in the horizontal position, the threaded hole is at the lower right as you face the rear of the unit.

★ Note: Screw in the stand by hand until it fits snugly, but do not overtighten it.

2. Install the battery into the remote control with the positive ( + ) side up.

★ Note: Only replace the battery with the supplied battery type. Ensure the plus sign (+) faces up when you install a new battery.

3. Connect power adapter: ①Connect the power cord into the DC input of the unit. ②Plug the adapter into an AC power outlet.

4. Use remote to control the unit and products. The detail of the remote control will be introduced in the later chapters.
2.2 Remote Control

You can place the remote control in a storage bay in the back of the unit products for safekeeping.

*Note*: The sensor for the remote control infrared (IR) beam is at the top center edge of the screen when the unit products is in the horizontal position.

2.4 Navigating the Keyboard Utility

When you set up your unit products, you occasionally will need to enter data into a data field. This is required when you set up a wireless network configuration, a weather reporting location, or a unit products configuration to access user accounts on Internet sites (such as Web video and Flicker). The unit products has a keyboard utility that appears when you need to enter such information into data fields.

(1) Keyboard - Network Settings and Flicker settings

(2) Keyboard - Edit My Memo and search Webvideo
Select your first data field and press OK to select the keyboard.

Use the navigation controls to select the first character you want to enter or "type" into a field. Then press OK.

Continue until you have spelled out the name or word that you are entering into the data field. Then press OK.

Use the navigation controls to select Enter on the keyboard. Then press OK.

Press \ or \ to move among any other data fields and the Continue and Back buttons. Press Continue and press OK when you have completed entering data in all required fields.

Using a PC as an External Media Source

You can use a PC as an external source for photos, music, and videos. The media can be read from the PC while the unit products is at the main menu.

1. Plug in the power adapter and connect it to the unit products to turn it on. Then wait for unit products to go into the main menu.
2. Connect the small (mini) end of the USB cable to the mini-USB port on the unit products.
3. Connect the large (A connector) end of the USB cable to a USB port on your PD. See the following illustration.

3. Open the USB disk device to the media folder to which you want to copy.
4. Open an additional Windows Explorer session and go to a folder on your PC where you store music, photos, or videos.
5. Double-click the appropriate media folder in the Windows Explorer session for the unit products.
6. Drag the media file(s) from the PC Windows Explorer session into the unit products.
7. Disconnect the USB cable when you are finished. The unit products takes a moment to reorganize the files that are stored on it and then becomes active again.

4 Menu Options

To select menu options, press \ or \ on the remote control or on the unit products. Press OK when you are on the desired menu option.

The menu options from left to right are as follows:
- My Photo (Support photo format: JPG/BMP/PNG)
- My Music (Support audio format: MP3/WAV/AAC and so on)

7 Cleaning and Care Tips

- Please power off the unit product before cleaning.
- Do not spray or pour liquid cleaning agents directly on the screen or bezel.
- Do not use ammonia, alcohol, or abrasive detergent cleaning agents.

7.1 Cleaning the screen

1. Wipe screen with a clean, soft, lint-free cloth to remove dust and loose particles.

2. If further cleaning is required, apply an appropriate cleaning agent (approved for LCD displays) to a clean, soft, lint-free cloth and wipe the screen.

*Note: Do not apply too much pressure on the screen to avoid damaging it.

7.2 Maintenance guidelines

To enhance the performance and extend the life of the unit products:

- Do not open the unit product or attempt to service it yourself. If the unit product is not operating properly or has been dropped or damaged, contact your reseller or service provider.
- Adjust only those controls that are described in the operating instructions.
- Keep the unit products in a well-ventilated area, away from excessive light, heat, or moisture.
- Slots and openings in the cabinet are provided for ventilation. These openings must not be blocked or covered.
- Never push objects of any kind into cabinet slots or other openings.
- Unplug the unit product from the power outlet before cleaning. Do not use liquid cleaners or aerosol cleaners.
- Do not drop the unit product or place it on an unstable surface.
- When removing the stand, you must lay the monitor face down on a soft area to prevent it from getting scratched, defaced, or broken.
