17. Cost rate setting enable

Key Technical Index
Following are the key technical index of this phone:
1. Networks support: GSM900/1800MHz
   GSM850/900/1800/1900MHz
   CDMA800MHz
2. Frequency range:
   GSM 850MHz (Transmits: 824-849MHz, Receives: 869-894MHz)
   GSM 900MHz (Transmits: 890-915MHz, Receives: 935-960MHz)
   GSM 1800MHz (Transmits: 1710-1785MHz, Receives: 1805-1880MHz)
   GSM 1900MHz (Transmits: 1850-1910MHz, Receives: 1930-1990MHz)
   CDMA 800MHz (Transmits: 824.04-848.97MHz, Receives: 869.04-893.97MHz)
3. Voltage: DC 5V
4. Stand by hours: 72 Hours
5. Talk time: 2-6 Hours
6. Charging time: 6 hours
7. Power consumption:
   Static≤25MA  emission≤500MA
8. Peak power consumption: 0.25W/0.5W
9. Receive sensitivity: -106db
10. Antenna increment: All directions: 3.5db
    Certain/Selection: 12db

Phone Installation
This phone is a wireless communication device. So it is very important for you to install the phone in a proper place. To place the antenna in a proper place is a very important for you to get a powerful signal.

1. Choose proper place for the antenna.
   You can use your mobile phone to search for the place
where the strongest signal is. Then put the antenna here.
Please do not make the antenna close to the phone. It will disturb the signal of the phone.
Please do not make the antenna and the phone too close to the TV set, computer, radiogram or any other wireless devices. It will disturb the signal-receiving of the phone.
Please turn off the power in the lightning storm time.

2. Install the SIM/R-UIM Card

1). Screw off the screw of SIM/R-UIM card case, and open the cover.
2). Slide back the SIM/R-UIM card door and lift it up.
3). Slide the SIM/R-UIM card into the SIM/R-UIM door making sure that the clipped corner of the SIM/R-UIM card lines up with the clipped corner of the SIM/R-UIM card holder.
4). Close the SIM/R-UIM card door and slide it to lock the SIM/R-UIM card in place.
5). Replace the cover of SIM/R-UIM card case and fixes it with a screw.

Notice: Before you install your SIM/R-UIM card into your wireless phone, make sure that the phone is in power off status. Or your SIM/R-UIM will be damaged.

3. Install your wireless phone.
1). Please connect the antenna, insert the your SIM/R-UIM card, and install the handset.
2). Insert the power supply and turn the red button for 3 or 5 seconds or press the ON/OFF button at the back of phone. Then the backlight of the LCD will turn on.
3). Your wireless phone will take about 10 seconds to search and register the networks. Then you will see the networks provider/operator's name, signal status, time & date and the battery status on the LCD. It means that your wireless phone is in succeed installation and you can use your wireless phone now.

Notice: If you use your wireless phone at the first time, then please recharge your phone for at least 4 hours. Because the backup battery is lack of power.
Fixed Wireless Phone

**Explanation for the keypad**

There are 24 keys on your wireless phone keypad. It contains 10 number keys, 2 symbol keys and 12 function keys. You can know them as below:

**Menu/OK:** In hook off status, press this key to enter into your phone menu. And it also to confirm your choice for each step just like the confirmation key.

- : In hook off status, you can check the missed calls list by press this key. And you can reduce the taking volume when the phone is in hook on status.

- : In hook off status, you can check the received calls list by press this key. And you can enlarge the taking volume when the phone is in hook on status.

**Up:** In hook off status, you can check the Dialed calls list by press this key. And you can press this key to choose the previous menu in **Menu** status.

**Down:** In hook off status, you can enter into the **Phonebook** list by press this key. And you can press this key to choose the next menu in **Menu** status.

**Delete:** You can exit your work in edit status by press this key. And you can also delete the character which you do not need before the cursor for modifying your work.

**Send:** You can save a lot of time after you dial the numbers when you make a call. It's a fast way to connect the number you are dialing. And it can also work as a radial key when you check your phonebook or call list.

**SMS:** In hook off status, you can enter into the SMS menu directly by pressing this key.

**Back:** You can return to the previous menu when you enter into the Menu.

**Radial:** You can radial the latest calls in Handfree status or when you pick up the handset.

**H.F:** It's short for Hand free. You can dial the number directly by pressing this key without pick up the handset in hook off status. And you can also pause the calling by re-press the key when you make a call in Handfree status. And when there is a incoming call,
you can talk with the caller directly by pressing this key.

And there is one key without any explanation or LOGO around it. It's the dummy key for ornament. There are 10 keys from 0 to 9 for making calls dialing and the other two symbol keys are "*" and "+".

All of the basic functions for your wireless phone is very easy to operate just like your mobile Phones. You can see the detailed explanations as below:

**Enter into / Exit the Menu.**

You can press the **Menu/OK** key to enter into the menu of your wireless phone. Then you can preview all of the function by pressing the 

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
</table>
1. **Phone book.**
Your wireless phone has a powerful **Phone book** which can store 300 names or contact numbers. And the memory storage capacity of your SIM/R-UIM card depends on your SIM/R-UIM card provider. You can **Search** the contact names, **Add** new contacts, **Copy** the contacts from SIM/R-UIM card to Phone, **Delete** the contacts, **Select** to store the contact to your phone or SIM/R-UIM card and check the **Memory** capacity status by pressing the **Up & Down** key and **Menu/OK** key very easy.

2. **Message**
The wireless phone can support both Chinese and English **SMS** and **Voice Mail** (the networks should support the voice mail at the same time). You can send and receive Chinese and English **SMS** and **Voice Mail** very easy. You can check the **New SMS** in your Inbox, store the Sent SMS, make the SMS **Draft**, set the **Valid Period** of all of your SMS by **Setting** function, check the **Memory Status** for your SIM/R-UIM card and **Phones**. And of course if the networks support **Voice Mail**, you can also send and receive **Voice Mail** from others, too.

3. **Call Records**
You can check the **Missed Calls**, **Received Calls**, **Dialed Calls** and any other calls very easy. And you can also check the **Duration** and **Reset** the timer for **All Calls** on your wireless phone. You can check the detailed information such as caller's name, caller's telephone number, call date and time etc. Then you can decide if you want to **Call** back to the caller, **Delete** the calls details, **Store** the caller's information and so on.

4. **Date and Time**
This wireless phone can display the **Date** and **Time** in real-time. You do not need to reset the **Date** and **Time** by manual even you use your wireless phone at the first time. But of course you can adjust the **Date** and **Time**, choose the **Time Format** by yourself. And your wireless phone can also set two **Alarm clocks** at the same time to remind your daily work or plans.

5. **Setting**
You can make a lot of customization settings for your wireless phone as below:

5.1 **Phone Setting**
You can choose the **Language** between Chinese and
Fixed Wireless Phone

English, to adjust the Contrast of the LCD for your wireless phone. And you can also turn on or turn off the Keytone by yourself.

5.2 Tone Setting
You can choose the Call Ring for your wireless phone. There are 15 music songs for your choice. You can choose one of ring for your incoming calls and SMS alarm. Of course you can also adjust the Volume strength for your phone.

5.3 Call Setting
If you are Busy, in Uncondition, Unavailable or cannot reply the calls, then you can choose the Call transfer or Call waiting functions for your wireless phone. But make sure that your networks can support these function at the same time.

5.4 Security
You can choose to Lock keypad, change your PIN code or Key password service and ensure your wireless phone in safety use or in security.

5.5 Calculator
Your wireless phone can also offer the very useful tool for you if you want to make some calculation.

6. STK
Your wireless phone can also make the prefix IP number setting, cost rate setting, networks bar & unbar, SIM/R-UIM card bar & unbar, Incoming calls and outgoing calls bar & unbar, International calls bar and unbar function. But for these optional and customization settings, you should contact your wholesaler or distributor to discuss further.
