Thank you for buying our Wi-Fi DV. Before start using this product, please read this manual carefully to maximize its performance and extend the life of the product.

**Appearance and Buttons**
Turn on the Wi-Fi DV, the LCD will display the following status and settings:

1. Camera mode
2. Video recording mode (default)
3. Wi-Fi icon (display when enabled)
4. TF card icon (display when loaded)
5. Resolution icon:
In camera mode, HI stands for 8 Mega Pixels (3264x2448), and in video recording mode, it stands for FHD (1920x1080, 30fps);
In camera mode, LO stands for 5 Mega Pixels (2592x1920), and in video recording mode, it stands for 720P (1280x720, 30fps); 
HILO only displays in video recording mode, standing for 720P (1280x720, 60fps).
6. Mute mode, displays when enabled, and disabled by default.
7. Counter, displays up to 999.
8. Timer, displays hours and minutes.
9. Battery icon: current battery level of the camera.
Note: The above icons may vary according to the status of the DV. Working Mode Flow Chart
After turn on the DV, you can press the Power/Mode button to switch the following modes in turn:
In video mode, press the Shutter button to start recording, LED flash, and press it again to stop;
In camera mode, press the Shutter button to take photo.

Use your Wi-fi DV

When you use the DV for the first time, please:
1. Insert a micro SD or micro SDHC card, as shown in the following picture.

High speed card at least Class 4 is recommended; When using time delay function or recording video in professional mode, the card of Class 10 is required. Turn off the DV before inserting or removing the card.

2. Use the battery
2.1 Install the battery.

Please install the lithium battery correctly as shown in the following graphic.
Step 1. Push the battery cover switch to the lock position ( ), and remove the battery cover. As shown in figure 1.

Step 2. Put the lithium battery into the battery slot. Make sure the electrodes of the battery are corresponding to the symbols of the DV shell ( ). As shown in figure 2 and figure 3.

Step 3. Install the battery cover back in place, and lock the switch to the lock position ( ) to fix the battery. As shown in figure 4.

2.2 Charging the battery. The DV uses removable rechargeable lithium battery. When the DV is off, connect it to the PC via USB cable to charge the battery. During charging, the status indicator (blue) will light on, and the indicator off when charging completes. Note: When the DV is on, connecting it to the PC will not charge. Turn on/off

1. Turn on: press and hold the button for about 3 seconds, LCD displays “ON” and a beep can be heard from buzzer.
2. Turn off: press and hold the button for about 3 seconds, LCD displays “OFF” and a beep can be heard from buzzer.

Note: The DV will turn off automatically if it is idle for 5 minutes.

Start to Use

1. **Video**

To record a video, please check whether the DV is under Video mode. If the icon is not displayed on the screen, press the button repeatedly until it appears.

**Start recording**: Press and release the button, the icon and [:] displayed in LCD will flash. At the same time the red indicator will flash too, meaning the recording is in process.

**Stop recording**: Press and release the button, the icon and [:] displayed in LCD will stop flashing. At the same time the red indicator will stop flashing either, meaning the recording is
stopped.

When the TF card is full, or the battery runs out, the recording will stop automatically, and the recorded video will be saved before the DV turns off.

2. 📸 Photo
To take a photo, please check whether the DV is under Camera mode. If the icon 📸 is not displayed on the screen, press the 📸 button repeatedly until it appears.

Press and release the 📸 button, a beep will be heard and the red indicator will flash, meaning a photo is taken. (If you take photos more than 999 copies, the LCD screen display only 999)

3. Enable/disable Wi-Fi
The Wi-Fi is disabled by default. Press the Wi-Fi button on the side of the DV to enable it. When starting connecting to Wi-Fi network, the indicator will flash, and when a Wi-Fi network is connected, the indicator will remain on, and the Wi-Fi icon will display on LCD screen. (In order to save power, Wi-Fi will be automatically disabled if no terminal is connected after 30 seconds)
4. Enable/disable Mute mode

The buzzer is enabled by default. Under the Video or Photo mode, press and hold the Shutter button to disable the buzzer and indicator to enter Mute mode. Under Mute mode, the icon will display on the screen; press and hold the Shutter button again to exit Mute mode.

5. Connecting to HDTV

5.1 Connect the DV to HDTV via HDMI cable (optional)

If you need to transfer the image and audio to an HDTV for playback, insert the Com end of the HDMI cable to the DV, and the other end (output) to the HD input of the HDTV, as shown in the following figure:
Note: Before connecting or removing the HDMI cable, please stop video recording, playback and disconnect Wi-Fi first.

5.2 When HDTV is connected, it enters Playback mode, the LCD displays as below:

<table>
<thead>
<tr>
<th>S/N</th>
<th>Icon name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Playback mode</td>
<td>Under Playback mode currently.</td>
</tr>
<tr>
<td>2</td>
<td>File number</td>
<td>There are 31 files and you are viewing the 19th one.</td>
</tr>
<tr>
<td>3</td>
<td>Video icon</td>
<td>The file is a video.</td>
</tr>
</tbody>
</table>

In Playback mode, press the Power button \(\text{电源键} \) to switch between photos and videos. When there are several photos or videos, press the Wi-Fi button \(\text{Wi-Fi键} \) to select the photo or video. When a video file is selected, press the Shutter button \(\text{快门键} \) to play it, and press the Shutter button again to stop playing.
In Playback mode, press and hold the Shutter button , a prompt of deleting the file or formatting will appear. Press the Wi-Fi button to switch between deleting or formatting, then press the Power button to select Yes or No, and press the Shutter button to confirm and exit.

6. Connecting to PC

6.1 Turn on the DV and connect it to the USB port of the PC via the attached USB cable. The DV will enter U-disk mode and the LCD will display as below after connection:
Now you can view the photos or videos taken by DV on PC.

Note: After the DV connecting to PC to enter U-disk mode, you will see two removable disks displayed in My computer of Windows, one is the TF card, storing all the photos taken and video recorded by users; the other one stores the system file information, including a file named SSID_PW.CFG, containing the AP ID of the DV and the password for AP login. Users can view these information but cannot modify, delete or format them.

6.2 In U-disk mode (PCU mode), press the Shutter button to switch to web cam mode (PCC mode), and the LCD will display as below:

Now you can start the web cam through application. To return to U-disk mode (PCU mode), press the button again.

Note: Driver is not required for web cam mode (PCC mode) on Windows XP (SP3) version or above.
**Instruction**

You can use the remote controller to record videos, take photos and shut down the DV. When using the remote controller, aim the signal emission port to the infrared signal reception light of the DV, and press the video button, photo button or power off button.
