Select time zone: If Automatic is unchecked, opens a dialog where you can set PE11’s time zone.
Set time: If Automatic is unchecked, opens a dialog where you can set PE11’s time.
Use 24-hour format: Check to display the time using 24-hour time format, for example, 13:00 rather than 1:00 pm.
Select date format: Opens a dialog where you can select the format for displaying dates.

8.12 Accessibility

TalkBack: check to provide spoken feedback to help blind users
Identify Gesture: tap to enable identify gesture app
Large text: check to enlarge text
Auto-rotate screen: Check to automatically switch the orientation of the screen as you turn the device sideways or even upside down.
Speak password: check to enable speak password
Text-to-speech output: tap on it to open a screen on which you can listen to an example of speech synthesis, enable/disable your settings, to check default engine, to set speech rate and language and so on.
Touch&hold delay: tap to select the time delayed for hold & touch.
Enhance web accessibility: tap to enable/disable installing scripts from Google that make their web contain more accessibility.

8.13 Developer options

You can set the USB debugging mode, select screen stay awake and so on. And you can also manage user interface and apps.

USB debugging: Check to permit debugging tools on a computer to communicate with your PE11 via a USB connection.

Stay awake: Check to prevent the screen from dimming and locking when the PE11 is connected to a charger or to a USB device that provides power. Don’t use this setting with a static image on the PE11 for long periods of time, or the screen may be marked with that image.

Allow mock locations: Check to permit a development tool on a computer to control where the PE11 believes it is located, rather than using the PE11’s own internal tools for this purpose.

8.14 About Device

View the device status such as the network type, battery power level, and network name. You can also check the battery use of individual applications or view the legal information and software version of your PE11.

9. Troubleshooting

9.1 Force shutdown

Press the Power Button for about 5 seconds and the device will be forced shutdown.

9.2 Restore default settings

To restore the factory default settings, you can tap Settings > Backup & reset > Factory data reset. Warning: data of your Google account, your personalized settings, installed applications will be removed from your device once you execute factory default settings, so please make a careful decision whether to restore default settings. Before restoring default settings, it is suggested to backup data/applications you want.

9.3 System updating

After system update/upgrade, it may occur that the uploaded third-party can not run or its data loss/damage. This is normal phenomena rather than system fault. You just need to upload and installed the third-party applications again in the device. It is recommended to backup data of the third-party applications before system update/upgrade.

9.4 Reset

When the system halts accidentally or does not response, please press the Reset key to force the system stop or press and hold the power button for 8 seconds to turn off the device forcibly. [Note]: it is normal for the device feels hot during charging, please use at ease.
10 FAQ

If your system does not work, please do the following. If still not out of the question, please contact with our company customer service center.
