

12V EMERGENCY POWER LIGHT

INSTRUCTIONS:

- 1 Slide plug from light base and carefully pull cable out.
- 2 Plug into 12V receptacle. Light should work immediately.
- 3 Adjust magnetic back to the best working position and attach to anything metal.
- 4 Remove plug from power receptacle and rewind power cord into body by rotating black ring.

TO REPLACE BULB:

- 1 Adjust black ring until lens screws become visible when viewed from the back of the unit
- 2 Remove the 4 screws. The black ring will lift off.
- 3 Remove lens. To remove bulb grip firmly and pull. It will come out easily.
- 5 Reassemble in reverse order.

USE SAFETY WHEN CHANGING BULBS:

- 1 Always ensure the unit is disconnected.
- 2 Wear gloves to protect your hands.

TO REPLACE FUSE IN 12V PLUG:

- 1 Unscrew ring.
- 2 Replace fuse and reassemble.
(Maximum 3 amp)
