

150W

Series

Car Inverter 12V DC to 220V AC+USB 5V

Product introduction

The product can convert DC 12V into AC 220V/50Hz, and USB output is DC 5V. Rated output power of the product is 150W, which can be widely used in all kinds of electrical equipment, such as mobile phone, TV set, fanner, digital equipment. It is the best choice for your self-drive, field work, entertainment.

Usage

First, make sure your car cigarette lighter socket output voltage is DC 12V (except medium bus and truck). Almost all the car's cigarette lighter socket output voltage is 12V. Put your electrical equipment plug into this product's output socket and maintain a good contact. Be sure of the power of your electrical equipment is below this product rated power. Put this product's cigarette lighter plug into the car cigarette lighter socket, and then you will see the indicator lights up, which means the product can start working. If your electrical equipment has the power switch, please switch on.

Technical parameters

Input Voltage: 12V DC

Output Voltage: 220V AC 50Hz

USB Output: 5V 0.5A

Power Rating: 150W

Max Power: 200W

Voltage Protection: Low-voltage 10-11V Over-voltage 15-16V

Over-Load Protection :> 150W

Short-circuit Protection: Yes
