Warranty matters:
1. Carried on accords to the national "three guarantees" provisions.
2. If failure occurs in the normal operating conditions, our company will apply warranty service in the limitation of one year from the date of purchase.
3. If failure occurs in the normal operating conditions, our company will apply warranty service in the limitation of one year from the date of purchase.
4. Please pay the fee of transportation and postage when it sent to be fixed.
5. Please forgive us that we can't afford replacement and maintenance free even in the period of warranty if the situations occur as follow:
   - Failure caused by misuse, abuse and improper operation
   - Failure caused by disasters like flood, fire, earthquake
   - Failure caused by own repair, alteration or installation
   - Failure, scratches and damage caused by moving or falling
   - Exchange of consumables and accessories
   - Unrecorded the date of purchase, the dealer's stamp on this card

6. All warranty matters, product functions, color and specifications changed whenever necessary, forgive us not to notice again.
7. Please keep it safely for it can't be reissued when lost.

Air Purifier

User Manual

Please study this manual before using
Thank you
**Technology indexes**

- Power: DC12V
- Power consumption: 6W
- The output amount of anion: 300 million
- Amount of wind: 8.8-10.5m³/min
- Output of USB interface: DC5V
- Weight: 375g
- Size: 188*130*65mm

<td>Anion purification</td>
<td>Produce 300 million anions</td>
</tr>
</tbody>
</table>

*Note: Are reserved functions of the OED version, prevailing in kind*
Replacement and installation of the filter

1. Pull back the filter cover
2. Pick up the filter cover
3. Remove the filter needed to be replaced or washed
4. Insert the card position in the cover into the corresponding slot
5. Pull forward the filter cover in place (attention: if not installed in place, it won't work)

Daily maintenance
- Machine: there is built-in anion generator, which adopt dust often, please wipe the surface with a soft cloth wetted by water with a little detergent regularly and clean the import and export of wind with a brush.
- Electrostatic Precipitator (ESP) Air Filter: recommend to clean it every 1-3 months, using water or neutral detergent solution. The aluminum mesh part can be scrubbed lightly with a brush, put it back when dry.
- Compound filter: recommend to update the filter every three months according to the use (can be bought from the dealer)
