3 FUNCTIONAL MENU
3.1 FILE MANAGEMENT
Thank you for choosing the QSWFRS digital mobile phone. After reading this guide you will be able to fully master the use of your phone and appreciate all its functions and ease of use.

Not only does the smartphone provide you with basic call functions such as call Register, but also with many practical functions and services, to improve the time you spend working and playing.

The color screen inside mobile phone compatible with the QSWFRS technology and has been approved by certification authorities both domestically and abroad. The availability of some services and features described in this manual depends on the network and your subscription. Therefore, some menu items may not be available in your phone. The shortcuts to menus and features may also vary from phone to phone.

Our company reserves the right to revise this manual content without prior notice.

1.2 Safety guide
- If your mobile phone is lost or stolen, please contact the telecommunications authorities or a sales agent immediately to have a hold on the phone and the SIM card. This will prevent economic loss caused by unauthorized calls made from your mobile phone.
- If you contact telecommunications authorities or a sales agent, they will need to know the IMEI number of your mobile phone. Please copy this number and keep in a safe place for future use.

1.3 Safety warnings and notices

Before using your mobile phone, read and understand the following notices carefully to ensure you will use it safely and properly.

1.3.1 General attention
- Please do not place the battery or battery charger specified by our company should be used in your phone. Other products might result in battery leakage, overheating, fire or explosion.
- To avoid your phone malfunctioning, or catching fire, please do not violently impact, jolt or throw your phone.
- Please do not place the battery, mobile phone, or charger in a microwave oven or high-pressure equipment. Otherwise it could lead to unexpected accidents such as damage to the circuitry or fire hazard.
- Please do not use your phone near flammable or explosive gases, otherwise it could cause malfunction of your phone or fire hazard.

1.3.2 Safety precautions
- Please do not place the battery or battery charger in a microwave oven or high-pressure equipment. Otherwise it could lead to unexpected accidents such as damage to the circuitry or fire hazard.
1.3.2 Notice when using your phone

Do not use your mobile phone near weak signals or high precision electronic devices. RF interference might cause malfunctioning of such electronic devices and other problems. Special tips must be paid near the following equipment: detectors, automatic door and other automatic control installations. To find out the effect of the equipment on mobile phone, please contact the manufacturers.

1.3.4 Charging your phone

Please do not use your mobile phone near the weak signal or high precision electronic devices. RF interference might cause malfunctioning of such electronic devices and other problems. Special tips must be paid near the following equipment: detectors, automatic door and other automatic control installations. To find out the effect of the equipment on mobile phone, please contact the manufacturers.

Avoid using the mobile phone near water (under no circumstances rub your eyes) and go immediately to a hospital for treatment.

Do not assemble or modify your mobile phone, as it will lead to damage of the phone such as battery leakage or short circuit failure.

Under very rare circumstances using the mobile phone in certain model cars may negatively affect the internal electronic equipment. In order to assure your safety under such circumstances do not use the mobile phone.

Please do not use needles, pen tips, or other sharp objects on the keypad as this may damage the mobile phone or cause liquid from the battery to leak, overheat, crack and catch fire. When the battery leaks or gives off a strange odor, please remove the battery from the vicinity of the open fire or heating, as this will cause the battery to leak, overheat, crack and catch fire. If the liquid in the batteries goes into the eyes, there is a risk of blindness. If this occurs, rinse eyes with clear water and go to the hospital for treatment.

Please do not disassemble or modify the battery, as this will cause the battery to leak, overheat, crack and catch fire. Please do not use or place batteries in places of high temperature such as near a fire or heating vessel, as this will cause the battery to leak, overheat, crack and catch fire. If the battery leaks or gives off a strange odor, please remove the battery from the vicinity of the open fire to avoid a fire or explosion.

Do not throw batteries into a fire, as this will cause the battery to catch fire and explode.

Please do not use the mobile phone near the following equipment: automatic doors, overhead, crack and catch fire. Please do not use wires, needles or other metal objects to short-circuit the battery. Also, do not put the battery near necklaces or other metal objects. Please do not put the battery to the mobile phone will lead to damage of the phone such as battery leakage or short circuit failure.

Avoid using the mobile phone close to water or other liquids. If liquids enter the phone, this may lead to damage of the phone.

1.3.3 Notices when using the battery

The battery has a limited service life. The remaining life gets shorter as the times of charging increase. If the battery becomes feeble even after the phone is charged, this indicates your service life is over and you have to replace a new battery.

Do not dispose of old batteries with everyday domestic garbage. Please dispose of old batteries at the designated places with special rules for their disposal.

Please do not throw batteries into a fire, as this will cause the battery to catch fire and explode.

When the battery is overcharged, it is so hot that it may cause fire or burn. Please do not use the mobile phone, as this will cause the battery to leak, overheat, crack and catch fire.

Do not use the mobile phone, as this will cause the battery to leak, overheat, crack and catch fire. If the liquid in the batteries goes into the eyes, there is a risk of blindness. If this occurs, rinse eyes with clear water and go to the hospital for treatment.

Do not put the battery to the mobile phone will lead to damage of the phone such as battery leakage or short circuit failure.
During the charging, the battery, phone and charger gets warm, this is a normal phenomenon.

- Upon the completion of charging, disconnect the charger from AC power socket, and from the mobile phone.

**Notes:**
- During charging, the phone must be placed in well-ventilated environment of +5°C to +40°C. Always use the charger supplied by your phone manufacturer, as using an unauthorized charger might cause damage and invalidate the warranty clauses for your phone.
- The standby time and call duration provided by the manufacturer are based on ideal operating environment.
- The battery’s operating time will depend on network conditions, operating environment and usage methods.
- Make sure the battery has been installed before using the phone and charger. If the battery is installed the wrong way, it is impossible to get it out, which will result in a malfunction.
- During the charging, the phone must be placed in a well-ventilated environment.
- Upon completion of charging, disconnect the charger from your phone and the power supply.

If you have not disconnected the charger from your phone and the power supply, the charger will continue to charge the battery after about 8 hours when the battery level decreases substantially. We advise you not to do like this, as it lowers your phone performance and shortens your phone life.

**Notices when using your charger:**
- Please use AC 220 volts. The use of any other voltage will cause battery leakage, fire and cause damage to the mobile phone and charger.
- It is forbidden to short circuit the charger, as this will cause electrical shock, smoking and damage to the charger.
- Please do not use the charger if the power cord is damaged, as this will cause fire or electrical shock.
- Please immediately dry any dust gathered on the electrical outlet.
- Please do not place vessels with water near the charger in order to avoid water splashing onto the charger and causing an electrical shortage, leakage or other malfunction.
- If the charger comes in contact with water or other liquid the power must immediately be switched off to avoid an electrical short or shock, fire or malfunctions of the charger.
- Please do not disassemble or modify the charger, as this will lead to bodily harm, electrical shock, fire or damage to the charger.
- Please do not use the charger in the bathroom or other excessively moist areas, as this will cause electrical shock, fire or damage to the charger.
- Please do not touch the charger with wet hands, as this will cause electrical shock.
- Do not modify or place heavy objects on the power cord, as this will cause electrical shock or fire.

**Warning:**
- Please do not disassemble or modify the charger, as this will cause electrical shock, fire or damage to the charger.
- Do not put the cord, but rather hold on to the body of the charger to avoid an electrical shock or fire.

1.3.5 Cleaning and maintenance

- The mobile phone, battery, and charger are not water resistant. Please do not use them in the bathroom or other excessively moist areas and likewise avoid allowing them to get wet in the rain.
- Use a soft, dry cloth to clean the mobile phone, battery and charger.
- Please do not use alcohol, thinner, benzene or other solvents to wipe the mobile phone.
- A dirty outlet will cause poor electrical contact, lose of power and even inability to recharge. Please clean regularly.

2.1.2 Icons

In the standby mode, the following icons may appear in standby screen:

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Network Signal" /></td>
<td>Indicate the intensity of network signals.</td>
</tr>
<tr>
<td><img src="image" alt="Missed Calls" /></td>
<td>Show missed calls.</td>
</tr>
<tr>
<td><img src="image" alt="Location" /></td>
<td>Location by satellite.</td>
</tr>
<tr>
<td><img src="image" alt="New Message" /></td>
<td>Receive a new message.</td>
</tr>
<tr>
<td><img src="image" alt="App Download" /></td>
<td>An application is being downloaded.</td>
</tr>
<tr>
<td><img src="image" alt="Loading" /></td>
<td>The downloading is over.</td>
</tr>
</tbody>
</table>
The alarm clock has been set and activated.

A call is in progress.

The phone is playing a song.

Show battery level.

Enable USB.

The access is blocked.

Get connected to the wireless network.

Turn on the Bluetooth.

No SIM card is installed in the phone.

EGPRS data connection is on.

Note: In this guide, the phrase "press the key" refers to pressing and thereafter releasing a key. "Hold down a key" refers to pressing a key and keeping it depressed for 2 seconds or longer.

2.2 Key explanations

Return key

Return to the previous menu.

Menu key

Show options of current menu.

Home key

All status, press the key to return to the standby screen.

Power key

Hold down this key to turn your phone off and on.

Generally press this key to lock the mobile phone.

Side volume keys

During the conversation, press the two keys to adjust the volume.

While playing an audio file, press the two keys to adjust the volume.

The descriptions and functions of keys depend on the model of your phone.

2.3 Using the touchscreen

Your phone provides the touch keys in the Main screen. To use these keys correctly, calibrate the touch screen in advance (see "Calibrator"). Meanwhile please follow the instructions:

Do not touch the screen with wet hands.

Do not touch the screen with great forces.

Do not touch the screen with metallic or conductive objects.

2.4 Connecting to the network

2.4.1 Inserting and removing the SIM card

Turn off the phone, remove the battery and unplug other external power supplies. Insert the SIM card into the SIM holder as shown in the phone.

When you need to remove the SIM card, turn off the phone, remove the battery and then remove the SIM card from the holder.

Warning: Do not turn off your phone before removing the SIM card. Never insert or remove the SIM card when an external power supply is connected, as this may cause damage to the SIM card.

2.4.2 Turning your phone on and off

To turn on the phone, hold down the Power key on the side; to turn off the phone, hold down the Power key.

If you have turned on your phone without inserting the SIM card, the phone will prompt you to install the SIM card. With the SIM card already inserted, your phone automatically verifies the availability of the SIM Card.

Then, the screen shows the following:

Enter PIN— if you have set the SIM card password.

Enter phone password — if you have set your phone password.

Search for network — the phone searches for the appropriate network.

Notes:

If you turn on your mobile phone, an exclamation mark appears on the screen and does not disappear, this is possibly caused by misoperation, that is, you press the Power key and the Volume Up key at the same time. Such misoperation activates the recovery mode, hence the occurrence of exclamation mark. If you just turn off the phone, next time when you turn it on, it will still come to the recovery mode.

Solution:

Press the Home key when the exclamation mark and robot appear, a menu will pop up. Use the Menu key to "exit "robot system" now" to restart the phone.
2.4.7 Making a call

When the logo of the network is shown at the upper left corner of the screen, you can still make emergency calls. If your network service provider does not provide roaming service to the area, the screen will show "only emergency calls," allowing you to call only that service. If you are within the network coverage, you also can make emergency calls even without the SIM card.

2.4.11 Call menu

The Call menu is only visible during an active call, and features such as Call Waiting, Call Diverting, and Multi-party Call are network dependent. Contact your network service provider.

2.4.8 Making a call from the list

All calls dialed and received are stored within a list in your phone. Those dialed and received recently are exhibited at the top of the list (see "Call list"). All numbers are sorted by Dialed Calls, Received Calls and Missed Calls. Your phone also provides options for you to view all calls. When the Call Register is full, the old numbers will be deleted automatically. To view the list, do the following:

1. Press the center key, the call list appears, press OK to see details, or go to Options to select other options.

2.4.10 Making an emergency call

If you are beyond the network coverage (see network-signal-intensity bars at the upper left corner of the screen), you can still make emergency calls. If your network service provider does not provide roaming service to the area, the screen will show "only emergency calls," allowing you to call only that service. If you are within the network coverage, you can also make emergency calls even without the SIM card.

2.4.9 Making an international call

Like making an international call via a fixed telephone, until the "0" at the head of a city code. For example, to call our hotline from another country, you can dial +962 114.

2.4.12 Making a call using the dialing conventions

Dial an international number without knowing its international fix (e.g. 00 for China). Following the entry of international prefix, enter the country code and complete phone number. For the country codes, follow the general conventions, for example. 49 for Germany, 44 for UK, and 46 for Sweden. Please note that the PUK1 code is used to allow a new SIM card to be inserted after the SIM card is unlocked. You should immediately change this number.

2.4.11 Call menu

The Call menu is only visible during an active call, and features such as Call Waiting, Call Diverting, and Multi-party Call are network dependent. Contact your network service provider.

Please note that the PUK1 code is used to allow a new SIM card to be inserted after the SIM card is unlocked. You should immediately change this number.
The call options include:

- Mute: Do not send local voice.
- Handsfree: Switch on the loudspeaker to amplify the voice.
- Hold: Put the current call on hold or retrieve the call on hold.
- End call: End the current call.
- More: *Start voice recording

Start voice recording

*Turn on Bluetooth: The Bluetooth device, if any, can be used.
*New call: Make another new call.

3 Functional Menu

3.1 File Management
The file management is composed of sdcard and sdcard 2, while sdcard is the memory of the phone, sdcard 2 is the external SD card. In the file management, files can be searched rapidly, deleted or edited in each card and new files can be created.

3.2 Sending an Email
You can send an Email to anyone who has an Email address.

3.3 Dialing
When dialing, you can have a quick access to the call records, contacts and digit dial keyboard (used for manual dialing) by the menu key on the screen.

Entering the procedure and set an account, you can click the account so that you come into the account already created, you can also activate, compile and create an account and then delete the operating. The email can be sent and received just like in a computer. This procedure requires the network support.
3.4 3G video call
Click a number portrait in the phonebook, and you can do these things instantly: dial, send a message and make a video call. During the video call, you can select applications such as adjusting it to mute mode, switching to robot portrait, turning off the voice and intercepting photos to SD card.

3.5 Calculator
Your phone provides a calculator with 4 basic functions for the convenience of your calculating.
Press this button $\square$, and you delete the input and output in bitwise.
Notice: this calculator is of limited accuracy and sometimes it causes error, please forgive us for the inconvenience.

3.6 Browser
The browser allows you to surf on the net and browse the page just like on the computer. You can create on the phone a bookmark and synchronize it with computer. You can have a quick access to your favorite sites on the main screen.
You could view web pages in longitudinal or transverse mode. The page rotates according to the rotation of the phone and automatically adjusts to fit the page.
To play back voice recording: Tap

The audio files are automatically stored on your phone. Click the Menu key, and you can operate and set the recorded voice. The file can be in document management and various players can be selected to play the voices.

3.8 Calendar
Calendar allows you to view your schedules and events at any time. You may view schedules one by one or several ones at the same time.
List to show calendar by day, week or month. If "by week (or month)", the calendar will be shown by week (or month). This application is convenient for you to view schedule or add events.

3.9 Settings

Reach the menu and customize your phone settings. SIM card management: SIM card can be managed and made settings.
WLAN: WLAN can be turned on and off and made some settings.
Bluetooth: Bluetooth can be turned on and off and settings are made.
The information flow usage: It makes you in full awareness of the usage of the information.
More: Click more and you will set up flight mode and VPN and more.
Audio profiles: General, silent, meeting and outdoor optional. In the meanwhile, customized setting-up of some scene modes are allowed. Select a mode and enter the customized setting-up, operational are vibration, volume, ring tones, notifications and key beep, etc.
Display: Customized setting-up of the phone luminance, wallpaper, the screen and screen time-out and font size is allowed.

Storage: The internal memory of the storage card and of the phone is shown.

Applications: View, manage and delete the applications on your phone.

Account and synchronization: Set the synchronization of your phone account with your phone.

Location service: Set the service during the localizing.

Security: Set the unlocking pattern, lock the SIM card, set the SD card.

Language and keypad: Select a language and input method.

Backup and reset: Reset DRM and restore factory settings to clear all personal data on your phone.

Date and time: Set current time and date.

Schedule power on/off: Set the time to turn on or off your phone.

Auxiliary function: Some auxiliary functions can be set.

Developers' options: Set some options used by developers.

About phone: View the model, service status, mobile software and hardware information, etc.

3.10 Clock

Alarms

Your phone provides many groups of alarm clocks. Select one of them to edit and customize alarm clock.

3.11 Radio

You can set the time in any part of the world.

Stop Watch

You can used it to record the time.

Timer

You can used it to record the time.

World Clock

Enter the menu to display the current time.

Radio

Wear your earbuds before searching for channels.

Channel list: Display the list of FM radio channels. You can select to play one of them. (the list can contain 20 channels maximum)

Search: Select this option to automatically search for channels and generate the list of channels.

Loudspeaker: Press the button to use the radio loudspeaker.

Search

You can locally search for the information you need.
3.13 Contacts

The "contacts" lets you easily call your colleagues or friends, or send emails or short messages to them. You may add contacts directly from your phone, or synchronize "contacts" with any application on your computer. You may open "contacts" directly from the Main screen, or open it via the "Dialing" application.

Add a contact:
To add a contact, directly enter the name and phone number, or import the name and phone number from the SIM card. (The number of contacts you can add is limited by the memory of your phone.)

Search for contacts:
To search for a contact, press the Search key in search screen, and a search box will pop up. In the search box, enter the key words, such as first name, second name and company name. While you are entering the key word, the matching contacts immediately appear.

Edit a contact:
To edit details of a contact, select "Edit a contact".

Delete a contact:
To delete the current contact, select "Delete a contact".
From the menu, you can also synchronize with or share an account or import or export a contact.

3.14 Gallery

Gallery is a picture manager that typically exhibits miniatures, supports the features of "save picture", "set pictures as desktop" and "share picture".

3.15 Camera

Your phone provides the camera and video recorder features. Wherever you go, you can take high-resolution photos and videos. It also supports advanced camera features such as image stabilization, face embellishment, panorama shooting, high dynamic range and zero delay shutter, which can also be customized.
3.16 Messaging
Messaging lets you send text and multimedia messages to any contact that has an SMS device. The multimedia messages include photos, video clips (for iPhone 3G or other new style phones), contacts information, and voice memos. What's more, you can send messages to several contacts at the same time.

Note: Perhaps Messaging is not available in all countries and regions. Probably you need pay for using Messaging. For more information, consult your network operator. As long as you are within the network, you can use "Messaging" As long as you can make a call, you can send messages. You probably have to pay for sending or receiving messages, depending on your network operator.

Send a message: Tap it, enter the number and name of the contact or select the contact from Contacts. Tap the text box above keypad, enter the information and then tap "Send."

After selecting the number, you can select such options as Call, Add subject, Attach, Insert facial expression, and more. Tap Settings to set ringtone, Delivery reports, and maximum quantity of messages.

3.17 Notification Menu
Slide and pull down menu on the main interface, you can see the message notice and choose whether to turn on or off WiFi, Bluetooth, GPS, off-line mode. In the data connection, the current SIM is available to make data connection of GPRS. Slide it around you can see the options of profile for your convenience.

3.18 Download Content
You can download through the browser things and pictures you want and list them in the Download Content menu.
3.19 Music
Music is used for enjoying the stored audio files. Select Music, you can see the menus of "List of played songs", "Songs", "Specialists" and "Artists".

To pause playing a song
Tap \(\text{ }\)
To resume playing a song
Tap \(\text{ }\)
To skip to the next song or reading material
Tap \(\text{ }\)
Return to the previous song or reading material
Tap \(\text{ }\)

To move fast backward or forward
Touch and hold \(\text{ }\) or \(\text{ }\). The longer you hold, the more songs you skipped.
To skip to any point in a song
Drag the progress bar.

3.20 Call Records
Come into the call records, you can view missed calls, received calls and outgoing calls. The calling time is viewed in each record and features such as calling, sending messages and adding to new contacts can be set. Deleting call records and setting up speed dial can be done in the menu.

3.21 Analog TV
You can select location to scan the channel to watch TV.
3.22 Flash Player
Device manager. Control your applications running.

3.23 MobilePlayer
You can play movies with it.

3.24 Widget
The widget is on the right of applications in Main Menu, holding down this widget, you can drag it anywhere you want in the main screen. It is convenient for you to enter that procedure.

3.25 Selecting Wallpaper Source
Hold down the main screen, the options of selecting wallpaper source will appear, then you can set up wallpapers you like.

4. Text Input
Enter text via the keypad. Examples of text include contact details, emails, short messages, and websites. The keypad provides the functions of spelling prediction, spelling correction and learning while using. The smart keypad may give you prompts of correct spelling, depending on which application you are using.

Enter text:
1. Tap the text box (memo, or new contact) to call the keypad.
2. Tap the keys on keypad.
At the initial stage, you can tap keys using either of your index fingers. Once you get familiar with the keypad, you can try tapping keys using your thumbs.

If you are tapping wrong keys, you may slide to the correct one only when you are applying pressure.

To delete a character:
Just hold the space key twice successively.

To enter a digit:
Tap 0, and then tap the digit.

To enter a digit letter:
Tap A, and then tap that digit.

To enter a symbol:
Tap P, and then tap that symbol.

Quickly enter a space:
Hold down  and tap that space key twice successively.

To toggle input methods:
Tap E, and then tap that letter.

Tap E, and then tap that digit.

Tap E, and then tap that symbol.

Press the space key twice successively.

To delete a character:
Hold down  and tap that space key twice successively.

To enter an upper-case letter:
Tap A, and then tap that letter.

To enter a digit:
Tap 0, and then tap the digit.

To enter a symbol:
Tap P, and then tap that symbol.

Check the received message in the phone. Once Wi - Fi, and pull down notification menu in the standby interface.
Select "USB storage device", and such dialogue box pops up:

You can synchronize files on the computer with those on the phone according to your needs or you can manage files on the storage card. Select "MTP storage" to support the phone to function as a U-disk. If your computer is not supported by WIn7, you need to install MTP drive (you can directly update window player to the latest wIn7 which comes with MTP drive).

Follow the prompts appearing in the phone to operate, so that data uploading and downloading with U-disk can be achieved.

Select "Camera UDF", you can export photos on the phone to the computer.

Note: Your mobile phone supports the plug-in feature. Without turning off your phone, however, it does not support inserting or remove SD card. Generally, it is not recommended to remove and install the SD card.

6 FAQs and Solutions
If you have any questions about the phone, please find the solutions from the table below.
