

# 4 in 1 Emergency Utility Tool

"It Could Save Your Life"

This compact 4 in 1 Emergency Utility Tool is an important tool to own in an emergency situation. In addition to emergency use the tool provides basic automotive uses. Its intended uses are: a digital tire gauge, a bright flashlight, an emergency hammer and as an emergency seat belt cutter.

Be ready for a roadside emergency. Using the bright flashlight, easily locate items inside your vehicle or in dark areas. Check your tire pressure with an easy-view digital read out tire gauge. Use the strong metal hammer-head to break windows in an emergency situation such as an auto accident. Use the seat belt cutter to quickly break free from your seat belt in an emergency situation. All these features are combined into one useful tool that is compact and easily stows into a glove box or beneath a seat. Keep one in every car.

## WARNINGS:

- THIS IS NOT A TOY. KEEP OUT OF THE REACH OF CHILDREN.
- THE SEAT BELT CUTTING TOOL IS SHARP. USE EXTREME CARE WHEN HANDLING THIS TOOL. DO NOT PUT FINGERS NEAR THE BLADE IT IS VERY SHARP. DO NOT CUT ANYTHING OTHER THAN A SEAT BELT IN AN LIFE EMERGENCY USE SITUATION.
- HAMMER AND SEAT BELT CUTTER ARE FOR USE IN AN EMERGENCY ONLY. DO NOT USE IT AS A CONVENTIONAL TOOL OR HAMMER. NOT INTENDED FOR DAILY USE.
- TO PREVENT CORROSION AND PROLONG BATTERY LIFE, REMOVE BATTERIES WHEN NOT USING FOR A LONG PERIOD OF TIME.
- TIRE PRESSURE SHOULD BE MAINTAINED IN ACCORDANCE WITH TIRE MANUFACTURER INSTRUCTIONS. TIRE OVER INFLATION OR UNDER INFLATION CAN BE DANGEROUS.

## FEATURES:

**Digital Tire Gauge Operation:** To turn on the digital tire gauge press the digital display ON Button. When the LCD display reads "0.0" PSI, THE UNIT IS READY TO MEASURE TIRE PRESSURE. Select the pressure unit of PSI, BAR, KPA by using the ON Button.

Place the nozzle of gauge to the valve stem of the tire and hold firmly in place to ensure a good seal and prevent air escaping. Hold the gauge on the valve. Hold in place until the LCD display locks a value. Remove the gauge quickly and read the pressure. After measuring the tire gauge shuts off in 25-30 seconds.

The tire pressure gauge can be pre-set with a warning value. Just press the "MODE" button and hold for about 2 seconds, the digit on the LCD will be flashing, then press "UP" or "DOWN" button for selecting the warning pressure value. Allow a margin for error of this value of "+" or "-" 3 PSI. **NOTE: Battery power is important to proper tire gauge effectiveness. If you find the tire gauge is not working effectively then change the batteries. The gauge uses two AG8 (LR1120) button cell batteries (included), low power consumption.**

**Flash Light Operation:** To turn the flashlight on press the slide button on the unit.

- Flash Light uses 2 AAA batteries. (Not included)
- Properly insert the batteries – do not mix polarities or you could damage the unit.
- To change batteries remove the battery cover. Making sure + - match exactly to the markings inside the battery compartment.
- Do not mix Alkaline or NiCad batteries inside the unit.

**Emergency LIFE SAFE Hammer:** If you are trapped in an emergency situation such as fire, crash or underwater and when a car door or window will not open the hammer can easily be used to break the window of an automobile. Place the mounting bracket where the hammer can easily be reached by the driver or passenger. When using the hammer to break a window aims for the lower right hand corner near the rearview mirror. Protect your body, eyes and face. Swing to make contact as straight as possible; do not attempt to break the windshield with the hammer. BREAKING GLASS WILL CAUSE MANY SHARP PIECES – USE EXTREME CARE AND CAUTION-ONLY BREAK AN AUTOMOBILE WINDOW IN A LIFE THREATENING EMERGENCY.

**Emergency Seat Belt Cutter:** If you are trapped by a seat belt in an emergency situation such as fire, crash or underwater and the car's seat belt system fails to release, you can use the Emergency Seat Belt Cutter to free yourself from a dangerous situation. The shielded razor sharp blade can cut through a seat belt that has trapped you in an emergency situation. The seat belt cutter is concealed inside the handle of the unit.
