## 4. Application Usage

### 4.1 XBMC Media Center

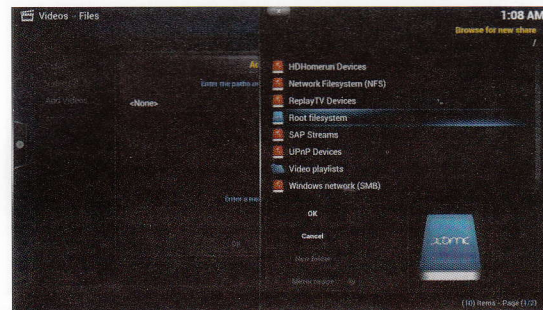

XBMC Media Center allows you to play and view most videos, music such as podcasts from the internet, and all common digital media files from local and network storage media.

#### 4.1.1 Playback local media files

Under Videos (same for Music and Pictures) there are 2 options, Files & Add-ons. To playback local media files, select 'Files' and enter Files interface, as shown in the picture:

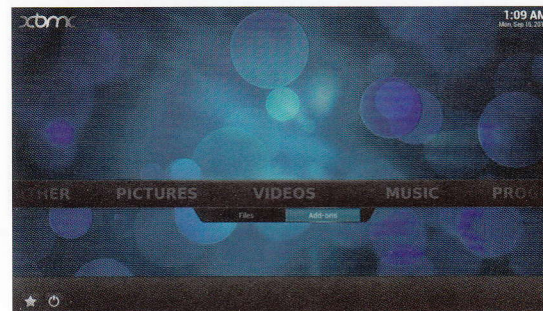

Select 'Add Videos...' and a pop up window "Add Video source" will come out. Select 'Browse' and a list of devices will come out.

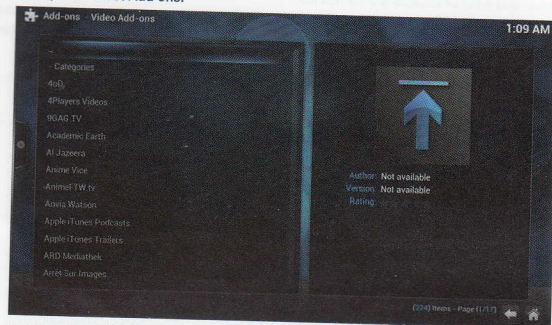

Scroll down to find the 'Root filesystem' and select OK, then search for 'storage' folder and once you enter storage folder, you will see all the devices connected to the player.

If your media files are stored in SD Card, select 'sdcard' folder, if the files are stored in USB drive, select 'usbdrive' folder. Once you select the desired folder, select 'OK' and you will find out that folder will be added to the Files list. You can enter that folder and playback media files you want.

#### 4.1.2 Playback media from internet

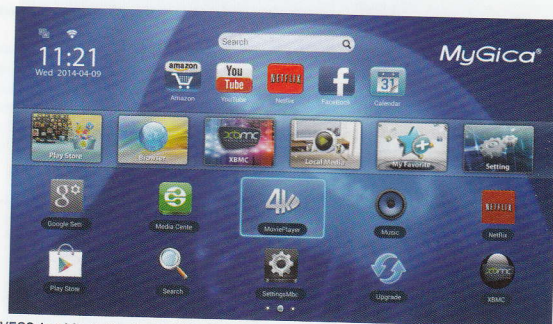

XBMC comes with some free internet podcast channels, to view these channels, goto Videos (or Music) and select Add-ons.

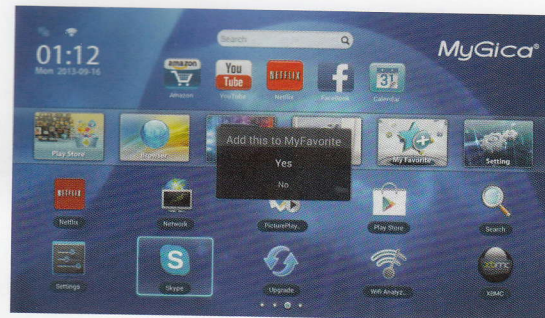

Once you enter Add-ons, you will see a list of different channels. These channels are in alphabetical order, browse through the list and select the desired channels and start playback the internet media.

#### 4.2 Local Media

ATV582 is able to playback UHD (4K2K) videos, just use our built-in 4K movie player and you can enjoy Ultra HD video quality videos in your local storage drive.

#### 4.3 My Favorite folder

You can store all your favorite applications in My Favorite folder by highlight the application then hold the OK button of the remote control. A windows will pop out asking if you want to add this app to My Favorite. Click Yes and this app will store in My Favorite Folder.
