Operation instruction:

Connect cable, E-lock and power supply as this menu, Then press monitor button and open outdoor monitor screen, enter function menu to adjust the brightness/contrast for best effect.

Visitors Calls
The visitor presses the CALL button on the outdoor door station, the internal monitor will ring and the visitor will be seen, the host can talk to the visitor by pressing the TALK button once and the conversation can last 120s. The host can press the UNLOCK button to open the door, and then press the MONITOR/TALK button to end current conversation and enter standby mode automatically.

Viewing the outside (60 seconds duration)
Pressing MONITOR from the installed monitor will switch on the outdoor door station 1 and view of the outside will be seen on the screen, keep pressing the MONITOR for 1s, then shift for outdoor station 2. Pressing MONITOR again will cancel the outdoor monitoring.

Choosing melody
Press melody button under monitor state to select prefer melody.

Unlock function
Press the UNLOCK button at any time to open the electric lock.

Unlock the second lock
Press the UNLOCK (indoor) button to unlock the lash-up lock (less than 500ma) and it is 5s delay. This also can be used for unlock the additional outdoor lock.
Installation

1. Indoor Unit Installation:

The installation of indoor unit

The perfect installation height of indoor unit is that the center of the surveillance screen should be 145cm~160cm above earth.

(This parameter is only for reference)

Firstly use two screws to fix the mounting plate on the wall, and then hang up the indoor unit (see the picture above)

2. Outdoor Station Installation:

The installation of station

Effective range

Effective range for up and down

Effective range for left and right

Cautions

1. Do not mount the indoor unit near any location of high temperature or humidity including televisions.

2. Do not allow the unit to be in contact with water including touching with wet hands.

3. When cleaning do not use aggressive chemicals or corrosive liquids use only a soft cloth.

4. Avoid sudden shocks to the units.

5. Avoid positioning the camera in strong sunlight, otherwise the image will be faint.
