- Quick Installation Guide

**Diagram**

- Day/Night Sensor
- IR LEDs
- Microphone
- Antenna
- Internal speaker
- Audio Output
- LAN
- MIC
- MicroSD Slot
- Power
- Reset
1. Connect the power adapter to the camera.
2. Connect the ethernet cable to the Modem/Router and to the IP Camera.
3. The IP Camera will get an address from the Modem/Router(with DHCP enabled) automatically and will be connected to the internet.

Warm Tips:
The wireless ipcam can work wired or wirelessly. However, it must be connected to the router with Ethernet cable for the first setting, making sure that your ipcam is under the same Lan with your Computer or smart phone. Then you can do the wifi setting on PC software or smart phone app. After setting the wifi successfully, you can let the ipcam work wirelessly.
Search for the easyn p App on the App Store (Apple) or Google play store (Android) and install it.
Add camera

1. Add camera

Click 📲 to run App; then press 📣 to enter the add new camera interface and choose "wired connect" mode.
2 Input device information

Click the QR-code to scan and add UID automatically. Click the button after finishing.

Label information as below:
UID: Refer to the twenty-digit numbers and letters
Password: Default password is admin
User name: Device name is Camera by default

3 Click the camera online to view live feed (Green means online).
Wi-Fi setting and modify the security

Click 🎯 setting button, enter the function bar; click 📅 button, then choose the advanced setting; here you can do wifi setting and modify the security.

Click to search routers nearby, then choose SSID and input WI-FI password. After wifi connected, disconnect Ethernet cable and reboot camera.

Modify Security Code
Click button to modify your security code.
On the bottom of the screen are the quick settings for camera:
