

Love Your Life

Magic Base Lamp Instructions

Function: This is for you to look for your personal objects quickly at night. Such as: cell phones, glasses, jewelry, and other advanced products. When you wake up at night and touch its lateral wall gently, it will be issued a downy light, and then you can conveniently take things up on it.

How to use?

! This product uses the intelligent design, user through the finger touch products lateral wall, to achieve the products on or off purpose. When you use it pay an attention to never use more than two fingers to operate it, just because it will affect it sensitivity.

This product inside has shielding layer, when you put your cell phone up on it, it can reduce cellular radiation obviously!

Switch

ON: Touch its lateral wall

OFF: Far from it about 10cm and after 1sec, touch it again

Brightness adjust

Turn Dark: when the product light up, constantly touches products about 1 sec. Then the light will fade away until the weakest brightness (when you think the light is right, you can stop as you like)

Brighten: when the product has been to adjust to the weakest brightness, continue touch products about 1 sec and the light will slowly increase until the brightest.

Attention!

- 1: When you switch the light, you must pause 1sec between turn on and off.
- 2: If the product doesn't work well or can not control its turn on and off, please cut down the power and then connect again, and it will be normal. (this most because a long time electrostatic accumulation, not the quality problem).
- 3: Don't spattering water or other conducting liquid over the product, and never use wet hand touch product.
- 4: Don't flap forcibly this product.
