1 The Basics

1.1 Overview

Thank you for choosing the GSM/GPRS digital mobile phone. After reading this guide you will be able to fully master the use of your phone and appreciate all its functions and ease of use.

Not only does the smartphone provide you with basic call functions such as call Register, but also with many practical functions and services, to improve the time you spend working and playing. The color screen mobile phone complies with the GSM/GPRS technology and has been approved by certification authorities both domestically and abroad.

The availability of some services and features described in this manual depends on the network and your subscription. Therefore, some menu items may not be available in your phone. The shortcuts to menus and features may also vary from phone to phone.

Our company reserves the right to revise this manual content without prior notice.

1.2 Safety guide

The mobile phone is lost or stolen, please contact the telecommunications authorities or a sales agent immediately to have a hold on the phone and the SIM card. This will prevent economic loss caused by unauthorized calls made from your mobile phone.

When you contact the telecommunications authorities or a sales agent, they will need to know the IMEI number of your mobile phone (remove battery to expand the number located on the label on back of phone). Please copy this number and keep in a safe place for future use.

In order to avoid the misuse of your mobile phone please take the following preventative measures:

- Set the PIN number of your mobile phone’s * SIM card and change this number immediately if it becomes known to a third party.

- Set call barring.

1.1.2 General attention

Only the battery and battery charger specified by our company should be used in your phone. Other products might result in battery leakage, overheating, fire or explosion.

To avoid your phone malfunctioning, or catching fire, please do not violently impact, jolt or throw your phone.

Please do not use your mobile phone, mobile phone, charger in a microwave oven or high-pressure equipment. Otherwise it could lead to unexpected accidents such as damage to the circuitry or fire hazard.

Do not use your phone near flammable or explosive gases, otherwise it could lead to a fire hazard.

Do not place your phone in a fire hazard. Please do not subject your phone to high temperatures, high humidity or dusty places; otherwise this may lead to the malfunction of your phone.

Keep your phone out of the reach of small children. Your phone is not a toy. Children could hurt themselves.

To avoid your phone falling and malfunctioning or being damaged, please do not place your phone or your phone on unstable surfaces.

1.3 Notices when using your phone

Turn off your mobile phone where the phone is not allowed, such as, on the following locations: In hospitals, airplanes, fuel stations, and other places.

Please refer to the manual of your mobile phone, and remember that your mobile phone may impact the normal operation of electronic devices and medical instruments.

Follow relevant regulations when using your mobile phone in those places. Your mobile phone has the auto turn-on feature. Check your alarm clock settings to confirm that your mobile phone will not be turned on automatically during flight.

Do not use your mobile phone near the weak signal or other electronic devices, such as television, radio, or other wireless devices, which may interfere with your mobile phone. If you malfunction, immediately turn off your mobile phone and clean the circuit board.

1.3.2 Notices when using your phone

Please keep small metal objects, such as, coins, keys, or other sharp objects on the keypad as this may damage your mobile phone or cause it to malfunction.

Lottery, public transport, or other public places where the phone is not allowed, such as, public transport, or other public places where your mobile phone is not allowed, such as, public transport, or other public places where your mobile phone is not allowed.

Keep small metal objects, such as, coins, keys, or other sharp objects on the keypad as this may damage your mobile phone or cause it to malfunction.

Avoid letting your phone come close contact with magnetic objects such as magnetic cards as the radiation waves of the mobile phone may erase the information on the card. In order to prevent this from happening, please keep your phone away from your credit card.

Keep small metal objects, such as, coins, keys, or other sharp objects on the keypad as this may damage your mobile phone or cause it to malfunction.

Avoid letting your phone come close contact with magnetic objects such as magnetic cards as the radiation waves of the mobile phone may erase the information on the card. In order to prevent this from happening, please keep your phone away from your credit card.

Keep small metal objects, such as, coins, keys, or other sharp objects on the keypad as this may damage your mobile phone or cause it to malfunction.
null
Please do not touch the charger with wet hands, as this will cause electrical shock.

Do not modify or place heavy objects on the power cord, as this will cause electrical shock or fire.

Before cleaning or carrying out maintenance please unplug the charger from the electrical outlet.

1.3.3 Cleaning and maintenance:

The mobile phone, battery, and charger are not water resistant. Please do not use them in the bathroom or other excessively moist areas and likewise avoid allowing them to get wet in the rain.

Use a soft, dry cloth to clean the mobile phone, battery and charger. Please do not use alcohol, thinner, benzene or other solvents to wipe the mobile phone. A dirty outlet will cause poor electrical contact, loss of power and even inability to recharge. Please clean regularly.

### 2 Getting Started

#### 2.1 Component name and explanation

</table>

#### 2.1.2 Icons

- **Show battery level.**
- **Enable USB.**
- **The access is blocked.**
- **Get connected to the wireless network.**
- **Turn on the Bluetooth.**
- **No SIM card is installed in the phone.**
- **GPRS data connection is on.**

#### 2.2 Key explanations

- **Return key:** Return to the previous menu.
- **Menu key:** Show options of current menu.
At any status, press the key to return to the standby screen.

Hold down this key to turn your phone off and on.

While playing an audio file, press the key to adjust the volume.

Do not touch the screen with wet hands.
Do not touch the screen with great forces.
Do not touch the screen with metallic or conductive objects.

2.4 Connecting to the network

2.4.1 Inserting and removing the SIM card

While playing an audio file, press the key to adjust the volume.

During the conversation, press the two keys to adjust the volume.

While playing an audio file, press the two keys to adjust the volume.

When you need to remove the SIM card, turn off the phone, remove the battery and then remove the SIM card from the holder.

Note:
In this guide, the phrase "press the key" referring to pressing and thereafter releasing a key. "Hold down a key" refers to pressing a key and keeping it depressed for 2 seconds or longer.

The descriptions and functions of keys depend on the model of your phone.

2.3 Using the touchscreen

Your phone provides many touch keys in the Main screen. To use these keys correctly, calibrate the touch screen in advance (see "Calibrator").

Be sure to follow the instructions for searching for network — the phone searches for the appropriate network.

At the exclamation mark above appears on the screen and does not disappear, this is possibly caused by misperception, that is, you press the Power key and the Volume Up key at the same time. Such misperception activates the recovery mode, hence the occurrence of the exclamation mark. If you just turn off the phone, next time when you turn it on, it will still come to the recovery mode.

Solution: Press the Home key when the exclamation mark and robot appear, a menu will pop up. Use the Menu key to select "reboot system now" to restart the phone.

2.4.3 Unlocking the SIM card

The PIN (personal identification number) secures your SIM card from being misused by others. If you have selected this function, you must enter the PIN code each time you turn on the phone so that you may unlock the SIM card and then make or answer calls. You can deactivate SIM card protection (see "Safety settings"). In this case, the misuse of your SIM card cannot be prevented.

Press the Hang Up key to turn off your phone;

Enter your PIN code. Close the incorrect digits by using the right soft key, and press OK for confirmation. e.g. if your PIN is 1234, please enter 1234

1 2 3 4

If you enter incorrect numbers for three times in succession, your SIM card will be locked and your phone will ask you to enter PUK code.

Notes:
If you do not know the PUK code, do not try. Instead, contact your network service provider. See "Safety settings".

Note: your network service provider sets a standard PIN code (4 to 8 digits) for your SIM card. You should immediately change this number. See "Administration settings".

2.4.4 Unlocking your phone

To prevent unauthorized use, you can set phone protection. If you have selected this function, you must enter the unlock pattern each time you turn on your phone, to unlock the phone and then make or answer calls. You may clear the unlocking pattern (see "Safety settings"). In this case, the unauthorized use of your phone cannot be prevented.

If you forget your phone password, you must contact the retailer or local authorized service center to unlock your phone.

2.1 Connecting to the network

Once your SIM card is unlocked, your phone searches for available network automatically (the screen will show the network searching is underway). If your phone has found the available network, the name of network service provider appears at the center of screen.

Note: Making an emergency call. Note: If "only for emergency calls" appears on the screen, it indicates that you are beyond the network coverage area, and that you can still make emergency calls depending on the signal intensity.

"Use emergency service", and contact the local authorized service center to unlock your phone.
Within the signal intensity.

China).

an internation

dialing,

indicate the intensity of network signal.

a phone

Vhen

To

2.4.7 Making Conversation

2.4.6 Making (senice

2.4.10 Making an emergency

To view the dialed calls, received calls, dialed and missed calls, enter the country code and press the Dial key. Those dialed and received are stored in a list in your phone. Those dialed and received recently are exhibited at the top of the list. The animation appears on the screen. When the call is picked up, the screen will show call status information. If the connection alert tone has been set, your phone will ring the alert tone (network dependent).

To end a call, press the Hang Up key.

Zone code Phone number Dial key

2.4.8 Making an international call

To make an international call, hold down the 0 key on the Dialing screen until the international prefix “+” for appears. This allows you to dial an international number without knowing its international fix (e.g. 90 for China).

Following the entry of international prefix, enter the country code and complete the phone number. For the country codes, follow the general conventions, for example, 49 for Germany, 44 for UK, and 46 for Sweden.

Like making an international call via a fixed telephone, omit the “0” at the host make.

For example, to call our hotline from another country, you can dial:

+86 21 114

Country code Complete phone number Dial key

2.4.9 Making a call from the list

All calls dialed and received are stored within a list in your phone. Those dialed and received recently are exhibited at the top of the list (see "Call Register"). All the digits you have entered. During dialing, the animation appears on the screen. When the call is picked up, the screen will show call status information. If the connection alert tone has been set, your phone will ring the alert tone (network dependent).

To view the dialed calls, press the Dial key.

You can dial any number from the list by pressing the Dial key.

When the call list appears, press OK to see details, or go to Options -> Save to place the number into your Phonebook.

2.4.10 Making an emergency call

If you are beyond the network coverage (see network—signal—intensity bars at the upper left corner of the screen), you can still make emergency calls. If your network service provider does not provide roaming service to the area, the screen will show "Only for emergency calls," alerting you that you can only make such calls. If you are within the network coverage, you can also make emergency calls even without the SIM card.

2.4.11 Call menu

The Call menu is only visible during an active call, and features such as Call Waiting, Call Diverting, and Multiple-party Call are network dependent.

Get your network service provider. The call options include:

- Mute
- Do not send local voice.
- Handsfree
- Switch to the loudspeaker to amplify the voice.
- Hold
- Put the current call on hold or retrieve the call on hold.
- End a call.
- End the current call.
- More

*Start voice recording
Start voice recording.

*Turn on Bluetooth

The Bluetooth device, if any, can be used.

*New call
Make another new call.

3 Functional Menu

3.1 File Management

The file management is composed of sdcard and stored 2, while sdcard is the memory of the phone, stored 2 is the external SD card. In the file management, files can be searched, modified, deleted or edited in each card and new files can be created.

3.2 Sending an Email

You can send an Email to anyone who has an Email address.

Entering the procedure and set an
account, you can click the account so that you come into the account already created, you can also activate, compile and create an account and then delete the operating. The email can be sent and received just like in a computer. This procedure requires the network support.

3.3 Dialing
When dialing, you can have a quick access to the call records, contacts and digit dial keyboard (used for manual dialing) by the menu key on the screen.

3.4 3G video call
Click a number portrait in the phonebook, and you can do these things instantly: dial, send a message and make a video call. During the video call, you can select applications such as adjusting it to mute mode, switching to speakerphone, turning off the voice and intercepting photos to SD card.

3.5 Calculator
Your phone provides a calculator with 4 basic functions for the convenience of your calculating. Press this button , and you delete the input and output in baseline. Notice: this calculator of limited accuracy and sometimes it causes error, please forgive us for the inconvenience.

3.6 Browser
The browser allows you to surf the net and browse the page just like on the computer. You can create on the phone a bookmark and synchronize it with computer. You can have a quick access to your favorite sites on the main screen. You could view web pages in longitudinal or transverse mode. The page moves according to the rotation of the phone and automatically adjusts to fit the page.

3.7 Voice Recorder
The recorder could be used to record audio files.
To start voice recording: Tap
To end voice recording: Tap
To play back voice recording: Tap
The audio files are automatically saved on your phone. Click the Menu key, and you can operate and set the recorded voice. The file can be in document management and various players can be selected to play the voices.

3.8 Calendar
Calendar allows you to view your schedules and events at any time. You may view schedules one by one or several ones at the same time. Select to show calendar by day, week or month. If "by week (or...
Reach the menu and customize your phone settings. SIM card management: SIM card can be managed and made settings. WLAN: WLAN can be turned on and off and made some settings. Bluetooth: Bluetooth can be turned on and off and settings are made. The information flow usage: Makes you in full awareness of the usage of the information.

More: Click more and you will set up flight mode and VPN and more. Audio profiles: General, silent, meeting and outdoor optional. The meanwhile, customized setting-up of some scene modes are allowed. Select a mode and enter the customized setting-up, operational are vibration, volume, ringtones, notifications and key beep, etc.

Display: Customized setting-up of the phone luminance, wallpaper, the screen and screen time-out and font size is allowed.

Backup and reset: Reset DRM and restore factory settings to clear all personal data on your phone. Date and time: Set current time and date. Schedule power on/off: set the time to turn on or off your phone. Auxiliary functions: Some auxiliary functions can be set.

Developers’ options: Set some options used by developers.

Date and time: Set current time and date.

Alarms: Your phone provides many groups of alarm clocks. Select one of them to edit and customize alarm clock.

Related channels: Display the list of FM radio channels. You can select to play one of them. (The list can contain 20 channels’ maximum)

Loudspeaker: Press the button to use the radio loudspeaker.

Search: Select this option to automatically search for channels and generate the list of channels.

Select: Tap to move to another channel.

Touch: Tap to broadcast and pause.

You can locally search for the information you need.

Phone: View, manage and delete the applications on your phone.

Account and synchronization: Set the synchronization of your phone account with your phone.

Location services: Set the service during the locating.

Safety: Set unlocking pattern; lock the SIM card; set the SD card.

Language and keypad: Select a language and input method.

3.10 Clock

Enter the menu to display the current time.

Alarms: Your phone provides many groups of alarm clocks. Select one of them to edit and customize alarm clock.

3.11 Radio

Wear your earphones of radio before searching for channels.

Search: Select this option to automatically search for channels and generate the list of channels.

Loudspeaker: Press the button to use the radio loudspeaker.

Touch: Tap to move to another channel.

Select: Tap to broadcast and pause.

You can locally search for the information you need.

3.12 Contacts

3.13 Developers’ options: Set some options used by developers.

About phone: View the model, service status, mobile software and hardware information, etc.

3.10 Clock

Enter the menu to display the current time.

Alarms: Your phone provides many groups of alarm clocks. Select one of them to edit and customize alarm clock.

3.11 Radio

Wear your earphones of radio before searching for channels.

Search: Select this option to automatically search for channels and generate the list of channels.

Loudspeaker: Press the button to use the radio loudspeaker.

Touch: Tap to move to another channel.

Select: Tap to broadcast and pause.

You can locally search for the information you need.
To add a contact, directly enter the name and phone number, or import the name and phone number from the SIM card. The number of contacts you can add is limited by the memory of your phone.

Search for contacts:
To search for a contact, press the Search key in search screen, and a search box will pop up. In the search box, enter the key words, such as first name, second name and company name. While you are entering the key word, the matching contacts immediately appear.

Edit a contact: To edit details of a contact, select “Edit a contact”. Delete a contact: To delete the current contact, select “Delete a contact”. From the menu, you can also synchronize with or share an account or import or export a contact.

3.14 Gallery
Gallery is a picture manager that typically exhibits miniatures, supports the features of “save picture”, “set pictures as desktop” and “share picture”.

3.15 Camera
Your phone provides the camera and video recorder features. Wherever you go, you can take high-resolution photos and videos. It also supports advanced camera features such as image stabilization, face embellishment, panorama shooting, high dynamic range and zero delay shutter, which can also be customized.

3.16 Messaging
Messaging lets you send text and multimedia messages to any contact that has an SMS device. The multimedia messages include photos, video clips (for iPhone 3GS or other new style phones), contacts information, and voice memos. What’s more, you can send messages to several contacts at the same time.

Note: Perhaps Messaging is not available in all countries and regions. Probably you need pay for using Messaging. For more information, consult your network operator. As long as you are within the network, you can use “Messaging”.

The “contacts” lets you easily call your colleagues or friends, or send emails or short messages to them. You may add contacts directly from your phone, or synchronize “contacts” with any application on your computer. You may open “contacts” directly from the Main screen, or open it via the “Dialing” application.
As long as you can make a call, you can send messages. You probably have to pay for sending or receiving messages, depending on your network operator.

Send a message: Tap it, enter the number and name of the contact or select the contact from Contacts, Tap the text box above keypad, enter the information and then tap "Send".

After selecting the number, you can select such options as Call, Add subject, Attach, Insert facial expression, and more.

Tap Settings to set ringer, Delivery reports, and maximum quantity of messages.

3.17 Notification Menu
Slide and pull down menu on the main interface, you can see the message notice and choose whether to turn on or off WIFI, Bluetooth, GPS, off-line mode. In the data connection, the current SIM is available to make data connection of GPRS. Slide it around you can see the options of profile for your convenience.

3.18 Download Content
You can download through the browser things and pictures you want and list them in the Download Content menu.

3.19 Music
Music is used for enjoying the stored audio files, Select Music, you can see the menus of "List of played songs", "Songs", "Specialists" and "Artists".
- To pause playing a song Tap [ ]
- To resume playing a song Tap [ ]
- To skip to the next song or reading material Tap [ ]
- To return to the previous song or reading material Tap [ ]
- To move fast backward or forward Touch and hold [ ] or [ ]. The longer you hold, the more songs you skipped.
- To skip to any point in a song Drag the progress bar.

3.20 Call Records
Come into the call records, you can view missed calls, received calls and outgoing calls. The calling time is viewed in each record and features such as calling, sending messages and adding to new contacts can be set. Deleting call records and setting up speed dial can be done in the menu.
3.21 Widget
The widget is on the right of applications in Main Menu, holding down this widget, you can drag it anywhere you want in the main screen. It is convenient for you to enter that procedure.

3.22 Selecting Wallpaper Source
Hold down the main screen, the options of selecting wallpaper source will appear, then you can set up wallpapers you like.

4 Text Input
Enter text via the keypad. Examples of text include contact details, emails, short messages, and websites. The keypad provides the functions of spelling prediction, spelling correction and learning while using.

The smart keypad may give you prompts of correct spelling, depending on which application you are using.

Enter text:
1 Tap the text box (memo, or new contact) to call the keypad.
2 Tap the keys on keypad. At the initial stage, you can tap keys using either of your index fingers. Once you get familiar with the keypad, you can try tapping keys using both of your thumbs.

While tapping a key, the corresponding letter will appear above your thumb or another finger. If you are tapping a wrong key, you may slide to the correct one. Only when your tapping finger leaves a key, can the corresponding letter be entered in the text box.

To delete a character Tap \[C\] and then tap that letter.
To enter an upper-case letter Tap \[A\] and then tap that digit.
To enter a digit Tap \[@\] and then tap that symbol.
Quickly enter a space Press the space key twice successively.
To toggle input methods Hold down to \[!\] to bring up the keyboard.
Your mobile phone supports SD card to expand the memory. Install the SD card according to the indication.

As one of storages for your phone, SD card has been set as the default storage at factory. You can directly use it without making any settings.

Use as flash disk: If "Phone—Data Wire—PC" is well connected, the PC will prompt "New hardware is found", and "MT65xx Android Phone requires to be installed" will appear in the dialog box, see the figure below:

After checking and confirmation, reconnect "Phone—Data Wire—PC", and pull down notification menu in the standby interface:

Select "used as USB storage device", and the following screen pops up.

Select "USB storage device", and such dialogue box pops up:

You can synchronize files on the computer with those on the phone according to your needs or you can manage files on the storage card.

Select "MTP storage" to support the phone to function as a U-disk. If your computer is not supported by W1N7, you need...
to install MTP drive (you can directly update window player to the latest wap11 which comes with MTP drive).

Follow the prompts appearing in the phone to operate, so that data uploading and downloading with U disk can be achieved.

Select "Camera PTP", you can export photos on the phone to the computer.

Note: Your mobile phone supports the plug-in feature. Without turning off your phone, however, it does not support inserting or remove T card. Generally, it is not recommended to remove and install the SD card.

6 FAQs and Solutions

If you have any questions about the phone, please find the solutions from the table below.
