Thanks for using the smart phone. The Quick Start Guide will help you better understand smart phone and how to use the important functions.

Power key: Press and hold this key to turn on/off the mobile phone; in standby state, press this key to turn on/off the screen.

Menu key: Press this key to open the action list, so that you can execute the action in current interface or menu.

Home key: Press this key to return to the home page from any application or interface.

Back key: Press this key to return to previous interface, or close the dialog box, menu, notification panel or the screen keypad.

Side key: Press this key to adjust volume

Installation method and precautions of SIM card

By setting PIN (personal identification number) code of the SIM card, you can protect your SIM card from illegal operation.

Installing SIM card

This is a dual SIM mobile phone with two SIM slots. Please turn off the mobile phone first, take out the battery, and insert the SIM card into the slot as shown in the picture below; then, place the battery into the battery jar and install the battery cover.

Precautions of SIM card

By setting PIN (personal identification number) code of the SIM card, you can protect your SIM card from illegal operation.

If the PIN code is enabled, you need to enter the valid PIN code when you turn on the mobile phone.

If you input wrong code for three times continuously, your SIM card will be locked and you need to input PUK code.

Note: Your network service provider will set a standard PIN code (4-8 digits) for your SIM card. Please change it with your private password as soon as you get the phone.

Connecting to network

When the SIM card is designated, the mobile phone will search registered network or available local network automatically. Once connected, the logo of the network operator appears in the top of the screen, the mobile phone is in standby state, and you can make or answer calls.

Please contact your network operator if the SIM card has a failure.

Precautions of SIM card

- Put the SIM card out of children’s reach.
- Please use, insert and remove the SIM card carefully because the SIM card and its contacts are prone to be scratched or damaged by bending.
- Do not expose the SIM card to electrostatic, dusty or moist environment.

Operation and installation methods of SD card

SD card is a removable mobile memory card inside the mobile phone and used for extending the storage space of the mobile phone.

Battery and charging methods

1. Connect the charger to provide USB cable.
2. Connect the charger plug to the power outlet.
3. Connect the USB cable to the mobile phone; this icon indicates the charging status.
4. The battery is fully charged when the status icon changes to please disconnect the charger from the power outlet.
5. Disconnect the charger from the mobile phone.

Note: If the battery is not used for a long time or the battery is used up, the mobile phone may be not turned on normally while charging. It is normal. Please charge for a while before turning on the mobile phone.

The battery can be charged repeatedly; however, it is consumable product, please change a new battery if the standby duration reduces significantly.

The data service consumes more power and will reduce the standby duration.

The charging time changes according to temperature and battery usage.

The mobile phone will show prompt if the battery is too low. The mobile phone will power off automatically if battery level drops too low.

Unlocking mode

Mobile phone options list

In standby state, you can press the Power key to lock and turn off the screen, and press it again to turn on the screen. Press and hold the Power key to open the mobile phone option list.

Unlocking interface
In a locked screen, tap the icon in the bottom of the screen, slide to right to unlock the screen, or slide to left to access Camera and take pictures.

Main menu

Slide to left/right on the screen to switch the main menu page, and tap the Menu key to select Manage applications or Settings. Drag and drop an icon to desktop to create a shortcut.

Manage applications

In Manage applications interface, you can manage the running applications to improve the running speed of the mobile phone. You can view the information of downloaded applications, applications installed on SD card, running applications and all applications, restrict permissions or uninstall third party applications.

Status bar

Pull down the status bar, to turn on/off WLAN, Bluetooth, Data connection, GPS, Flight mode and customize profiles, or view the notifications of the mobile phone.

Contacts

You can search contacts through pinyin, Chinese or English name and first stroke. Press the Menu key to select Delete contact, Contacts to be displayed, Import/Export, Accounts, or Share visible contacts.

View notifications

Smart dialing

You can view the information of downloaded applications, applications installed on SD card, running applications and all applications, restrict permissions or uninstall third party applications.
