## 1 General Information

### 1.1 Profile

Please read this pamphlet carefully in order to make your phone in perfect condition.

Our company may change this mobile phone without prior written notice and reserves the final right to interpret the performance of this mobile phone.

Due to different software and network operators, display on your phone may be different, refer to your phone for details.

### 1.2 Safety Information

If your phone has lost or been stolen, notify the telecommunication office the SIM card is disabled (network support is required). This can avoid economic loss caused by unauthorized use.

Please take measures as following to avoid your phone being unauthorized used:

- Set PIN code of SIM card
- Set phone password

### 1.3 Safety warning and Attentions

#### Safety warning

#### > ROAD SAFETY COMES FIRST

Do not use a hand-held phone while driving. Use hands-free fittings when calls are unavoidable while driving. In some countries, dialing or receiving calls while driving is illegal!

#### > SWITCH OFF IN AIRCRAFT

Wireless devices can cause interference in aircraft. Using a mobile phone in flight is illegal and risky.

Please make sure that your mobile phone is powered off in flight.

#### > SWITCH OFF BEFORE ENTERING RISKY AREAS

Strictly observe the relevant laws, codes, and regulations on the use of mobile phones in risky areas. Turn off your mobile phone before entering a place susceptible to explosion, such as an oil station, oil tank, chemical plant or a place where a blasting process is under way.

#### > OBSERVE ALL SPECIAL REGULATIONS

Follow any special regulations in force in any area such as hospitals and always switch off your phone whenever it is forbidden to use it or, when it may cause interference or danger. Properly use your mobile phone near medical apparatuses, such as pacemakers, hearing aids and some other electronic medical devices, as it may cause interference to such apparatus. Follow any special regulation in force in any area such as hospital and always switch off your phone whenever it is forbidden to use it or, when it may cause interference or danger. Properly use your mobile phone near medical apparatuses, such as pacemakers, hearing-aids and some other

electronic medical devices, as or may cause interference to such apparatuses.

#### > INTERFERENCE

The conversation quality of any mobile phone may be affected by radio interference. An antenna is built inside the mobile phone and located below the microphone. Do not touch the antenna area during a conversation, lest that the conversation quality deteriorate.

#### > QUALIFIED SERVICE

Only qualified personnel may install or repair phone equipment. Installing or repairing the mobile phone on your own may bring great danger and violate the warranty rules.

#### > ACCESSORIES AND BATTERIES

Use only approved accessories and batteries.

#### > USE SENSIBLY

Use only in a normal and proper manner.

#### > EMERGENCY CALLS

Ensure the phone is switched on and in service, enter the emergency number, e.g. 112, then press the Dial key. Give your location and state your situation briefly. Do not end the call until told to do so.

*Note: Just like all other mobile phones, this mobile phone does not necessarily support all the features described in this manual due to network or radio transmission problems. Some networks even do not support the emergency call service. Therefore, do not rely solely on the mobile phone for critical communications such as first aid. Please consult the local network operator. Just like all other mobile phones, this mobile phone does not necessarily support all the features described in this manual due to network or radio transmission problems. Some network even do not support the emergency call service*

#### Precaution

This mobile phone is well designed with fine art. Please exercise special care when using it. The following suggestions will help your mobile phone survive the warranty period and extend its service life:

- > Keep the mobile phone and all its fittings beyond children's reach.
- > Keep the mobile phone dry. Keep away from rain, moisture, liquid or other substances that may corrode electronic circuits.
- > Do not use or store the mobile phone in dusty place, lest that active parts of the mobile phone be damaged.
- > Do not store the mobile phone in a high-temperature place. High temperature will shorten the life of electronic circuits and damage the battery and some plastic parts.
- > Do not store the mobile phone in a chilly place. Otherwise, moisture will be formed inside the mobile phone to damage electronic circuits when the

mobile phone is moved to a constant temperature place.

> Do not throw, knock or shock the mobile phone, as that will destroy the internal circuit and high precision components of the mobile phone.

## 2 Your phone

### 2.1 Phone overview

#### 2.2 Functions of Keys

The mobile phone provides the following keys:

◆ Left and right soft key

The bottom line on the screen displays the functions of the Left and Right soft key.

◆ Dial key

Press it to originate a call by entering the called number or selecting contact from the phonebook; or press it to receive an incoming call; or press it in standby state to show the latest call records

◆ End key

Press it to end a call being dialed or end an ongoing call; or press it to exit the menu and return to the standby state; or hold it for two or three seconds to power on/off the mobile phone.

◆ Direction key

Press them to scroll the options when browsing a function list. In edit state, press direction keys to navigate. In conversation status, press up or down direction key can tune sound volume.

◆ OK key

Press it to confirm your selection. In idle screen, press it can access main menu interface.

◆ Audio player shortcut key

In standby state, you can press it to enter audio player interface directly.

◆ Number keys, \* key and # key

Press number keys 0 through 9 to input or edit state to input numbers and characters;

The # key and the \* key represent different functions in different states or different function menus.

Hold the # key up to 2s in standby state to switch between silent mode and general mode.

Pressing the \* key in edit status to input a symbol.

In idle screen, you can press left soft key then \* key to lock keypad. When the keypad is locked, you can press left soft key then \* key to unlock it.

Press the \* key twice to input "+" in standby interface. "+" are used for dialing an international call.

#### 2.3 Technical specifications

Phone

Dimensions (WxDxH):

Weight:

Lithium battery

Rated capacity:

Continuous standby duration: (Relates to network status)

Continuous conversation duration: (Relates to network status)

Please refer to their labels for other data related to the battery and the charger.

### 3 Getting started

#### 3.1 Installing the SIM Cards and the Battery

An SIM card carries useful information, including your mobile phone number, PIN (Personal Identification Number), PIN2, PUK (PIN Unlocking Key), PUK2 (PIN2 Unlocking Key), IMSI (International Mobile Subscriber Identity), network information, contacts data, and short messages data.

Note:

*After powering off your mobile phone, wait for a few seconds before removing or inserting an SIM card.*

*Exercise caution when operating an SIM card, as friction or bending will damage the SIM card.*

*Properly keep the mobile phone and its fittings such as the SIM cards beyond children's reach.*

Installation

- ◆ Hold the End key for a while to power off the mobile phone
- ◆ Take the back cover above the battery away.
- ◆ Take the battery away.
- ◆ Insert the SIM card into the SIM card slot lightly with the corner cutting of the card aligning to the notch of the slot and the gold plate of the card facing downward, till the SIM card cannot be further pushed in.
- ◆ With the metallic contacts of the battery facing the metallic contacts in the battery slot, press the battery down until it locks into place.

Using code

The mobile phone and the SIM cards support sorts of passwords, in order to prevent the phone and the SIM cards from being misused. When you are prompted to input any of the codes mentioned below, just input the correct code and then press the OK key. If you input a wrong code, press the Right soft key to clear it and then input the correct code.

#### ◆ Phone lock code

The phone lock code may be set to prevent your mobile phone from being misused. In general, this code is provided along with the mobile phone by the manufacturer. The initial phone lock code is set to 1234 by the manufacturer. If the phone lock code is set, you need to input the phone

lock code when powering on the mobile phone.

#### ◆ PIN

The PIN (Personal identification number, 4 to 8 digits) code prevents your SIM card from being used by unauthorized people. In general, the PIN is supplied with SIM card by the network operator. If PIN check is enabled, you need to input the PIN each time when you power on your mobile phone. The SIM card will be locked if you input wrong PIN code for three times.

Unlocking methods as follows:

-Input the correct PUK according to the screen tips to unlock the SIM card.

-Then input the new PIN and press the OK key.

-Input the new PIN again and then press the OK key.

-If the input PUK is correct, the SIM card will be unlocked and the PIN will be reset.

**Note:** *The SIM card will be locked if you input wrong PIN code for three times. To unlock the SIM card, you need to input the PUK. In general, the PUK can be obtained from the network operator.*

#### ◆ PUK

The PUK code (Personal Unlocking Key) is required to change a blocked PIN. It is supplied with SIM card. If not, contact your network operator. If you input wrong PUK code for 10 times, SIM card will be invalid. Please contact the network operator to replace the SIM card.

#### ◆ Barring code

A barring code is required for setting the call barring function. You can obtain this code from the network operator to set the call barring function.

#### 3.2 Installing Memory Card

The Memory card is a pluggable mobile storage card inside the mobile phone.

To install the Memory card, open its latch, place its indented side downward, insert the card into the card slot, and then close the latch.

To remove the Memory card, open its latch and slightly take the card out. And then close the latch.

Note:

*1. The mobile phone cannot automatically identify the Memory card being inserted when the mobile phone is powered on. You must power off the mobile phone and then power it on, so that the phone can identify the Memory card.*

*2. The Memory card is a miniature object. Keep it out of the reach of children for fearing that children swallow it!*

#### 3.3 Charging the Battery

The lithium battery delivered with the mobile phone can be put into use immediately after being unpacked.

Battery level indication:

◆ Your mobile phone can monitor and display the battery state.

◆ Normally the remaining energy of the battery is indicated by the battery level icon at the upper right corner of the display screen.

◆ When the battery energy is insufficient, the mobile phone prompts "Battery low". If you have set an alert tone, an alert tone will be given off when the battery level is too low.

◆ A charging animation appears when the battery is being charged. When the charging is complete, the animation disappears.

Using a travel adapter:

◆ Install the battery into the mobile phone before charging the battery.

◆ Connect the adapter of the travel charger with the charging slot in the mobile phone. Ensure that the adapter is fully inserted.

◆ Insert the plug of the travel charger to an appropriate power outlet.

◆ During the charging, the battery level grid in the battery icon keep flickering till the battery is fully charged.

◆ It is normal when the battery becomes hot during the charging period.

◆ The battery icon does no longer flicker when the charging process ends.

Note:

*Ensure that the plug of the charger, the plug of the earphone, and the plug of the USB cable are inserted in the right direction. Inserting them in a wrong direction may cause charging failure or other problems.*

*Before the charging, ensure that the standard voltage and frequency of the local mains supply match the rated voltage and power of the travel charger.*

Using the Battery

The performance of a battery is subject to multiple factors: radio network configuration, signal strength, ambient temperature, chosen functions or settings, phone fittings, and the voice, data or other application mode you choose to use.

To guarantee the optimal performance of your battery, please stick to the following rules:

◆ Use only the battery provided by the vendor. Otherwise, damages or even injuries could be caused during the charging.

◆ Power off the mobile phone before removing the battery.

◆ The charging process lasts a longer time for a new battery or a battery not in use for long. If the battery voltage is too low to enable the mobile phone to be powered on, charge the battery for a longer time. In this case, the battery icon does not flicker until a long time after the battery enters the charge status.

◆ During the charging, ensure the battery is placed in a room temperature environment or in an environment close to room temperature.

◆ Immediately stop using the battery if the battery produces odor,

overheat, cracks, distort or has other damage, or if the electrolyte leaks.

◆ The battery wears out with use. A longer charging time is required as the battery is put into use for a long time. If the total conversation duration decreases but the charging time increases even though the battery is properly charged, purchase a standard battery from the OEM or use a battery approved by our company. Using any poor-quality fittings will cause harm to your mobile phone or even incur danger!

**Note:** *To guarantee your personal safety and protect the environment, do not litter the battery! Return the old battery to the mobile phone manufacturer or place it in specified battery reclamation areas. Do not litter any battery with other rubbish.*

**Warning:** *Short-circuits of the battery may cause explosion, fire, personal injury or other severe consequences!*

#### 3.4 Powering On/Off the Mobile Phone

Hold the End key for a while to power on the mobile phone. A power-on animation appears on the display screen.

Input the phone lock code and press the OK key if the mobile phone prompts you to input the phone lock code. The original code is 1234.

Input the PIN and press the OK key if the mobile phone prompts you to input the PIN. The PIN is provided by the network operator for new opening SIM card.

Enter the standby interface.

To power off the mobile phone, hold the End key for a while.

#### 3.5 Linking to the Network

After the SIM card and the mobile phone are successfully unlocked, the mobile phone automatically searches for an available network. After finding a network, the mobile phone enters the standby state. When the mobile phone is registered in the network, the name of the network operator is displayed on the screen. Then you can dial or receive a call.

#### 3.6 Dialing Calls

In the standby interface, press number keys to input the area code and the telephone number, and then press the Dial key to dial a call. To end the call press the End key.

#### ◆ Dialing a call to a number in the contacts

Enter the contacts and use the up or down direction keys to find the telephone number you want to call.

Press the Dial key. The mobile phone automatically dials the chosen telephone number.

#### ◆ Redialing the last number

In the standby interface, press the dial key to show the dialed calls.

Press the up or down direction keys to select a number you want to dial and then press the Dial key.

#### ◆ Adapting volume

During a conversation, you can press the Up or Down direction keys to tune the sound volume.

#### ◆ Answering incoming calls

Press the Dial key or the Left soft key to answer an incoming call.

Press the End key to end the current conversation.

To reject an incoming call, press the Right soft key twice or the End key.

**Note:** If the caller can be identified, the mobile phone will present the calling number. If the calling number exists in the phonebook, the mobile phone will present both the name and the phone number of the caller. If the caller cannot be identified, the mobile phone will present the calling number only. You can answer an incoming call when using a function list or browsing the phonebook.

#### 3.7 Using the Headset

It would enter headset mode automatically when you insert headset to the slot. Make sure of inserting it at the bottom of the slot, or you can't use it normally.

### 4 Input method

This mobile phone provides English input, smart English input and numeric input method. You can use these input methods when editing the phonebook, short messages, files and greeting text.

#### 4.1 Icons for Input Methods

After you enter an edit window such as a window for editing the phonebook, short messages or the memorandum, an icon is displayed to indicate the current input method:

Numeric input: "123"

English input: "ABC, abc, Abc"

#### 4.2 To Shift Entry Methods

Press the # key to switch between input methods.

#### 4.3 Numeric input

You can input numbers with the numeric input method. Press a number key to input the corresponding number.

#### 4.4 English input and numeric input:

The keyboards for English input and numeric input are defined in the following table:

Key	Character or Function	Remarks
Number key 1	. , - ? ! ' @ : # \$ / _ 1	
Number key 2	ABCabc2	
Number key 3	DEFdef3	
Number key 4	GHIghi4	
Number key 5	JKLjkl5	

Number key 6	MNOmno6
Number key 7	PQRSpqrs7
Number key 8	TUVtuv8
Number key 9	WXYZwxyz9
Number key 0	0
* key	Press it to input a symbol
# key	Press it to switch between input methods
Left direction key	Press it to move to the left
Right direction key	Press it to move to the right
Left soft key	Equivalent to OK or Options
Right soft key	Equivalent to Back or Delete
End key	Press it to return to the standby interface

English input:

■ Each key is used to represent multiple characters. Quickly and continuously press a key till the character you want appears. Input the next character after the cursor moves.

■ Press the # key to switch between input methods

■ To input a blank, switch to the English input mode (in upper or lower case) and then press number key 0.

■ To clear wrong inputs, press the Right soft key.

#### 4.5 Inserting a Symbol

Press the \* key to input a symbol you want.

### 5 Using the Menus

#### 5.1 Calendar

Once you enter this menu, there is a monthly-view calendar for you to keep track of important appointments, etc. Days with events entered will be marked.

#### 5.2 Phonebook

The mobile phone can store up to 500 telephone numbers. The telephone numbers that an SIM card can store depends on the storage capacity of the SIM card. The telephone numbers stored in the mobile phone and in the SIM cards form a phonebook.

The phonebook search function enables you to view contacts. You can search a contact as required from the phonebook. Select this option, in the edit interface, input the name of the contact you want to search or the first letter(s) of the name. All the contacts meeting the search condition are listed. Press the Up and Down direction keys to browse the contacts and select contact. Press left or right direction key to view other groups: Unclassified, family, business, classmates, blacklist and so on.

#### 5.3 Call History

##### Dialed calls

You can view the latest dialed calls. Choose **Dialed calls** and then select a dialed call to call, delete or delete all (or send SMS to it) etc.

##### Received calls

You can view the latest received calls. Choose **Received calls** and then select a received call to call, delete or delete all (or send SMS to it) etc.

##### Missed calls

You can view a list of the latest missed calls.

**Note:** When the mobile phone indicates that some calls are missed, you can select **Details** to enter the missed calls list. Navigate to a missed call and then press the **Dial** key to dial the number that originated that call.

##### Rejected calls

You can view a list of the latest rejected calls.

##### Delete all

You can delete the latest call records. Choose **Delete all** and confirm to delete all the numbers in the call logs.

##### Call timers

Choose **Call timers** to view the last call time, the total time of all dialed calls, the total time of all received calls and the total time of call history, and/or to reset all the time.

##### Call cost

Choose **Call cost** to view the total cost of all calls, modify the maximum cost allowed, set the price per unit, and/or reset the call cost.

**Note:** The call cost function relates to the SIM card. Some SIM cards do not support this function. The PIN2 is provided by the network operator. To obtain the PIN2, contact the network operator.

#### 5.4 Multimedia

##### Video player

Use this function to play video files. By pressing the direction key can you control the playing process of video player: play/pause (OK key), switch to last video/next video (press left or right direction key), fast forward (press and hold right direction key) and rewind (press and hold left direction key). In video player interface, you can press \* or # key to tune volume, number key 2 to switch to full screen play.

##### Video recorder

This function enables you to record dynamic pictures. You can press OK key to capture video clips; left soft key to access Options; right soft key to exit capture interface.

##### Sound Recorder

Use this function to record audio files. The phone support WAV. The recording file you stopped would be stored in file list automatically.

##### Image viewer

You can view the pictures or images through this function.

#### FM radio

You can use the application as a traditional FM radio with automatic tuning and saved channels. You need to insert headset into its corresponding slot before using this function. In FM radio interface, you can press left or right direction key to search channels manually, down direction key to play/pause the playing process of the current channel, up direction key to enable auto search (once this is enabled, you can press left or right direction key to search channels automatically), OK key to switch between headset and loudspeaker mode. You can press \* or # key to tune volume.

#### 5.5 Message

If the short message memory is full, a blinking SMS icon appears on the top of the screen. To normally receive short messages, you need to delete some of the existing short messages.

##### Write message

Through this function you can create a new text message. You can type a message, and you're also able to insert a pre-defined message from "Templates".

##### Inbox

Received messages are listed in this menu.

##### Outbox

Messages sent failed are stored in this item.

##### Drafts

Draft messages are listed in this item.

##### Sent box

The messages which are sent successfully are stored in this menu.

#### 5.6 Audio player

Use this function to play audio files. By pressing the direction key can you control the playing process of audio player: play/pause (OK key), switch to last song/next song (press left or right direction key), fast forward (press and hold right direction key) and rewind (press and hold left direction key) and stop (down direction key). In audio player interface, you can press \* or # key to tune volume.

#### 5.7 Games

##### Sokoban

A game named Sokoban is embedded in the phone. For specific operation, please refer to 'help' option of the game.

#### 5.8 Camera

The phone is provided with a camera, which supports the photographing functions. Roll the phone to align the camera to the picture and then press OK key to capture photos. Pictures will be saved in the file system of the memory card. You can change the image/camera settings, by accessing the options after entering the camera mode.

#### 5.9 User Profiles

The mobile phone provides multiple user profiles, so that you can

customize some settings to adapt to the specific events and environments. Customize the user profiles according to your preference and then activate the user profiles. The user profiles fall into six scenarios: **General, Silent, Meeting, Indoor, Earphone and Bluetooth.**

Select Options and you can perform the following operations: Activate, Customize and Rename.

#### Activate

Select **Active** to activate the selected mode.

#### Customize

◆ **Ring settings:** Set call ring and message ring.

◆ **Adjust volume:** Set the volume of the caller ringtone, message ringtone, call, alarm & calendar ringtone and power ringtone.

◆ **Call alert:** Select ringtone, vibrate, silent, vibrate then ring or ring and vibrate mode as per your need.

◆ **Message alert:** Select ringtone, vibrate, silent or ring and vibrate as per your need.

◆ **Alarm & calendar remind:** Select ringtone, vibrate or silent as per your need.

◆ **Key tone:** Silent, Ringtone1 and Ringtone2 are available. Users can select one of them as needed.

◆ **Battery low alert:** Activate or deactivate this function as needed.

◆ **Power ringtone:** Activate or deactivate this function as needed

#### Rename

Select **Rename** to rename the selected profile.

#### 5.10 Organizer

##### Alarm

Three alarm clocks are set but deactivated by default. You can activate one, multiple or all of them as needed. For each alarm clock, the ringing date and the ringing time can be set.

##### Bluetooth

With Bluetooth, you can make a wireless connection to other compatible devices, such as mobile phones, computers, headsets and car kits. You can use the Bluetooth to send images, video clips, music, sound clips and notes, and transfer files from your compatible pc.

##### Calendar

Once you enter this menu, there is a monthly-view calendar for you to keep track of important appointments, etc. Days with events entered will be marked.

##### Calculator

The calculator can add, subtract, multiply and divide. To use the calculator:

◆ Press the up, down, left and right key to select +, -, ×, ÷ respectively.

◆ Press right soft key to delete the figure.

##### World clock

Access this menu to view time of main cities in various time zones.

#### STK

STK service is the tool kit of SIM card. This phone supports the service function. The specific items are depended by SIM card and network. Service menu will be auto added to the phone menu when supported by network and SIM card.

##### 5.11 File Manager

The phone supports the memory card. The capacity of the memory card is selectable. You can use the file manager to conveniently manage various directories and files on the memory card.

Choose **File manager** to enter the root directory of the memory. The root directory will list the default folders, new folders and user files. When the mobile phone is powered on for the first time or when you have not changed the directory, the root directory contains the default folders only.

##### 5.12 Settings

###### Call settings

◆ **Dual-SIM:** Access this item to perform following operations: Standby mode, Reply by original SIM and Set SIM name.

◆ **Network selection:** Set Network selection mode to Auto select or Manual select. Automatic is recommended. When Network selection mode is set to Automatic, the mobile phone will prefer the network where the SIM card is registered. When Network selection mode is set to Manual, you need to select the network operator's network where the SIM card is registered.

◆ **Call divert:** This network function enables you to forward incoming calls to another number you have previously specified.

◆ **Call barred:** The call barred function enables you to bar calls as needed. When setting this function, you need to use a network barring code, which can be obtained from the network operator. If the code is wrong, an error message will be prompted on the screen. After selecting a call barred option, continue to select Activate or Deactivate. The mobile phone will prompt you to input the call barring code and then contact the network. A moment later, the network will make a response and send the operation results to the mobile phone.

◆ **Call waiting:** After you choose Activate, the mobile phone will contact the network. A moment later, the network will make a response and send a message to acknowledge your operation. If the call waiting function is activated, the network will alert you and the mobile phone screen will display the incoming call number if others are calling you while you are already in a conversation.

◆ **Hide ID:** When you call someone, he or she can't find out your number if you enable this function.

◆ **Select line:** Switch to Line 1 or Line 2. By default, Line 1 is used.

◆ **Flight mode:** When this function is engaged, it will suspend many signal transmitting functions of some devices – thereby disabling the device's capacity to place or receive calls or text messages– while still

permitting use of other functions that do not require signal transmission (e.g., games, built-in camera, MP3 player.)

◆ **Others:** It includes 50 seconds warning, vibration when connected, answer/reject mode and auto redial.

#### Phone settings

◆ **Time & date:** Set time, date, time format and date display type.

◆ **Select Language:** Select the display language for the mobile phone.

◆ **Shortcut settings:** Customize the shortcut functions of the Up, Down, Left, and Right direction keys. In the standby interface, you can press a direction key to directly enter the function menu corresponding to that direction key.

◆ **Auto power on/off:** Set the time when the mobile phone will be automatically powered on or off.

◆ **Power management:** Show the remaining battery level.

◆ **Restore factory settings:** Use this function to restore factory settings. The initial password is 1234.

#### Display settings

Users can access this item to set wallpaper, backlight and animation effect, etc.

#### Security settings

**PIN:** The PIN (Personal identification number, 4 to 8 digits) code prevents your SIM card from being used by unauthorized people. In general, the PIN is supplied with SIM card by the network operator. If PIN check is enabled, you need to input the PIN each time when you power on your mobile phone. The SIM card will be locked if you input wrong PIN code for three times

**PIN2:** The PIN2 code (4 to 8 digits), supplied with SIM card, is required to access some functions such as "call costs setup" and "fixed dialing setup". Please contact the network operator to verify whether your SIM card supports these functions. If you input wrong PIN2 for three times, the PIN2 will be locked.

**Privacy:** the initial password is 1234. After accessing this function, you can select some items. Once an item is selected, you need to input correct password whenever you want to enter these items to perform further operations.

**Auto keypad lock:** The function enables you to lock/unlock the keypad. Set the auto locking time, 5s, 15s, 30s, 1min or 5mins is available. **Lock screen by end-key:** Users can activate/deactivate this function as needed.

**Power-on password:** Once this function is activated, password is required when powering on the phone.

**Guard lock:** When the Guard lock is on, once your SIM card is replaced, the phone will automatically send stolen information to the number you've set.

## 6 Appendix

### Appendix 1: Troubleshooting

If you find exceptions when operating the mobile phone, restore the factory settings and then refer to the following table to solve the problem. If the problem persists, contact the distributor or service provider.

Fault	Cause	Solution
SIM card error	The SIM card is damaged.	Contact your network service provider
	The SIM card is not in position.	Check the SIM card
	The metal face of the SIM card is polluted.	Clean the SIM card with a clean cloth
Poor received signal quality	Signals are obstructed. For instance, radio waves cannot be effectively transmitted nearby a high building or in a basement.	Move to a place where signals can be effectively transmitted
	Line congestions occur when you use the mobile phone in high-traffic hours	Avoid using the mobile phone in high-traffic hours
The mobile phone cannot be powered on	The battery energy is exhausted.	Charge the battery
Calls cannot be dialed	Call barring is activated	Cancel call barring
The mobile phone cannot connect the network	The SIM card is invalid	Contact your network service provider
	The mobile phone is not in a service area of the GSM network	Move to the network operator's service area
	The signal is weak	Move to a place where the signal quality is high
The battery cannot be charged	The charging voltage does not match the voltage range indicated on the charger	Ensure the charging voltage matches the voltage range indicated on the charger
	An improper charger is used	Use the charger specially designed for the mobile phone
	Poor contact	Ensure the charger plug is in good contact with the mobile phone
