PREPARATION

- TURN ON/OFF THE MACHINE
Pressing “power button” for 3 seconds, you will see the loading screen and then the opening screen. Pressing “power button” for 3 seconds, you will see a power-off option notice. Tap “OK” to turn off your tablet.

Notes:
- Follow all posed warnings and directions from official personal when in areas where the use of wireless devices is restricted, such as airplanes and hospitals.

- CHARGE THE BATTERY
Before using the device for the first time, you must charge the battery. You can charge the device with a adapter.

Notes:
1. When your battery is low, the device will emit a warning tone and display a low battery message, the battery icon will also be empty. If the battery level becomes too low the device will automatically power off. Recharge your battery to continue using your device.
2. If the battery is completely discharged, you cannot turn on the device, even with the travel adapter connected. Allow a depleted battery to charge for a few minutes before you try to turn on the device.

- INSERT A MEMORY CARD
To store additional multimedia files, you can insert a memory card. Your device accepts micro SD memory card with maximum capacities of 32GB (depending on memory card manufacturer and type).
  - Insert a memory card with memory card slot.

- REMOVE THE MEMORY CARD
Before removing a memory card, first uninstall it for safe removal.
  1. In idle mode, select Applications → Settings → Storage → Uninstall SD card → OK.
  2. Remove the memory card.
Notes: Do not remove a memory card while the device is transferring or accessing information, as this could result in loss of data or damage to the memory card or device.

- TO INSTALL SIM
When you subscribe to cellular service, you will receive a subscriber identity (SIM) card, with subscription details, such as your personal identification optional services, to use network data services.
  - Insert a SIM card with SIM card slot.
Notes:
Do not remove a SIM card while the device’s modem power is not turned off.
Setting → More → Modem Power → Turn off.

- CHECK RUBBER CONNECTORS
Please make sure that all kinds of rubber connectors have been locked tightly before using the tablet PC.
Part 2 INSTRUCTION

- LOCKING / UNLOCKING SCREEN
  To operate the tablet PC, swipe the locking screen to unlock.

When the screen is unlocked, the camera will be accessible.
GET TO KNOW THE MAIN SCREEN

When the device is in idle mode, you will see the idle screen. The idle screen has multiple panels, scroll left or right to a panel of the idle screen. You can also select a dot at the bottom of the screen to move the corresponding panel of the idle screen directly.

SETTING

SYSTEM SETTING

---

**POWER OFF**

When you do not use the tablet PC, you can press the power button to switch it off.

**TROUBLE SHOOT**

Your device displays network or service error messages. When you are in areas with weak signals or poor reception, you may lose reception, move to another area and try again. You cannot access some optional without a subscription, contact your service provider for more details.
The touch screen responds slowly or improperly. If your device has a touch screen and the touch screen is not responding properly, try the following:

1. Remove any protective covers from the touch screen, protective covers may prevent the device from recognizing your inputs and are not recommended for touch screen devices.
2. Ensure that your hands are clean and dry when tapping the touch screen.
3. Restart your device to clear any temporary software bugs.
4. Ensure that your device software is upgraded to the latest version.
5. If the touch screen is scratched or damaged, take it to your service center.

Your device is hot to the touch.
When you use applications that require more power or use applications on your device for an extended period of time, your device may feel hot to the touch, this is normal and should not affect your device's lifespan or performance.

A connection is not established when you connect the device to a PC.
1. Ensure that the USB cable you are using is compatible with your device.
2. Ensure that you have the proper drivers installed and updated on your PC.
