Tips for use

1. Please refer to the operation
Manual and put the charging machine in
charging area. All you have to do is put it in the
charging area, it will start charging regardless of
the place and direction. Try to put it near the charging
centre as close as possible.

2. When the charge is almost finished but not yet, it will
stop charging, this is normal.

3. When the product which is under charging condition is
mixed with television and radio noise, please keep the
product away from television and radio for more than 1 M.

4. It will affects wireless changing if the charging device is
covered with thick protecting sleeves, you'd better take it
off when charging.

**Do not lay the magnetic card, magnetic record
media and precise machine too close to the
product!!**

*If you put the non-connection charging pad close to
magnetic card and magnetic record medias, the
product may have influence on the magnetic and
make those recorded data disappear, and hand
watch or other precise machine may break down, so
do not put them close to the product.*

Product advantages

- Once you put this Qi-marked charging machine in the
charging area, it will start to charge persistently.
- This Qi-marked products, fit the non-connection
charging standard set by the WPC.
- This product also can charge the charging machine
which consist of Qi-marked power plug and charging
machines. (There are conditions that this product does
not charge well for some machine please read the
operation manual carefully before using it.)

Qi and Qi mark are the trade marks of WPC

**This product applies for
Qi standard receiver**

Receiver placed offset

The Receiver placed offset of the center of the transmitter coil is $\pm 7\text{MM}$, beyond the distance it will shut off. In this time replace the receiver (Interval of 5 seconds), then it can charging again. The larger the offset distance, the lower the charging efficiency is.

Automatic protection function

When the transmitter Detected the over charging current of the receiver (current over the rated output value), it will cut down the connection of the receiver and turn to standby mode. Waiting for the receiver to be replaced (Interval of 5 seconds). After connected is done then it can turn to charging stage again.

Accessories / components name and application method

1. USB Cable
2. Non-connection charging pad
3. AC adapter

AC adapter

USB Connection

USB Cable

Start Button

AC adapter connection method

1. Please plug the USB cable to the USB port on this product, make sure plug to the most inside.
