## Tips for use

1. Please refer to the operation Manual and put the charging machine in charging area. All you have to do is put it in the charging area, it will start charging regardless of the place and direction. Try to put it near the charging centre as close as possible.
2. When the charge is almost finished but not yet, it will stop charging, this is normal.
3. When the product which is under charging condition is mixed with television and radio noise, please keep the product away from television and radio for more than 1M.
4. It will affect wireless charging if the charging device is covered with thick protecting sleeves, you'd better take it off when charging.

**Do not lay the magnetic card, magnetic record media and precise machine too close to the product!!**

If you put the non-connection charging pad close to magnetic card and magnetic record media, the product may have influence on the magnetic and make those recorded data disappear, and hand watch or other precise machine may break down, so do not put them close to the product.

## Product advantages

Once you put this Qi-marked charging machine in the charging area, it will start to charge persistently.

This Qi-marked products, fit the non-connection charging standard set by the WPC.

This product also can charge the charging machine which consist of Qi-marked power plug and charging machines.

Qi and Qi mark are the trade marks of WPC

This product applies for Qi standard receiver

## AC adapter connection method

1. Connect the USB cable to non-connection charging pad USB slots, please ensure that put the most inside.
2. Insert the USB cable into the ac adapter, when it powers on, power LED will light up. when power on, non-connection charging pad will have voice prompt, enters the charging status.

## The charging method of charging machine

1. Lay the Qi-marked charging machines in the charging area.
2. The green light means it starts to charge, you should move the charging machine in the charging area to get it recognized.
3. If the product does not charge, please try to replace the machine on it.

## Accessories/components name and application method

1. USB Cable
