VALENCIA 2 Y100

The contents of this manual may differ in certain respects from the description of your phone depending on its software version and your telephone operator.
Getting to know your mobile

How to use the phone keys

In any screen,
Tap " " to return to previous screen or to exit the application.
Tap " " to return to the main menu.
Tap " " to display the settings/option list.
Tap the " on/off " button, to turn on an off the screen and block the screen.
Long press "on/off" to shut down or to restart your mobile.
Press and hold the "on/off" button and then press the volume down key to take a screen capture.

Language

Tap the settings icon. Scroll down and tap the “Language and input”, then choose language in the field “language”.

* Please use the earphone included in the package.
3 notification LEDs, new custom made DOOGEE OS, your little and personal secretaries

The Valencia 2 comes with 3 notification LEDs on the side, each of them is configurable through our DOOGEE OS. Whenever you have a missed call, an unread message, or unread APP notifications, your “little secretaries” will light up and remind you.

Back touch panel, control at your fingers

Use the back touch panel located in the back of the phone for internet browsing, books reading, photos taking etc, just as you would do with the front screen, but with the easiness of holding the phone with a single hand. If that was not enough, a simple double tap on the back of the phone or long press will open any application you choose.
Xender 2.0 makes sharing easier

No WiFi or SIM card is required, fast data transfer between different devices with just one slide, ten times faster than Bluetooth.

HotKnot file transfer technology

HotKnot wireless file transfer, transfer pictures, movies, music, files etc...between two phones just by touching their screens, no Wi-Fi required, with speeds up to 54Mbps.
3 finger fast screenshot
The Valencia2 Y100 is equipped with fast screenshot. Put 3 fingers on the screen and draw them down and you will have a screenshot in just one gesture.

Guest account
You are not the only one who uses your phone, with the guest account, you can keep your conversations, contact, pictures etc... well protected. Now you can lend your mobile without any worries.
Please read this safety information carefully so that you can use your phone in complete safety.

1. Children: Be very careful with children and your phone. A mobile phone contains a number of detachable parts. Exercise great care when children are in close proximity to the phone. The phone contains small parts that could be swallowed or cause choking. If your phone is equipped with a camera or lighting device, do not use it too near children or animals.

2. Hearing: Prolonged listening at full power using a lightweight headset or headphones can damage your hearing. Reduce the volume to the lowest possible level when listening to music or conversations. Avoid high volumes over extended periods.

3. Driving: Exercise care when driving. Driving requires maximum attention at all times in order to minimise the risk of accidents. Using a mobile phone can distract the driver, resulting in an accident. You must comply with local regulations and laws in force regarding the use of cell phones whilst driving. You are not allowed to use the phone whilst driving. A hands-free kit should not be regarded as an alternative solution. Flying: Turn your phone off when flying. Remember to turn your phone off when you are in a plane (GSM+Bluetooth) as it may cause interference.

4. Hospitals: Turn your phone off near any medical devices. It is extremely dangerous to leave a phone switched on near medical devices as it may cause interference. You must observe any instructions or warnings in hospitals and treatment centres. Remember to turn your phone off in service stations. Do not use your device in a petrol station near fuel. It is dangerous to use your phone inside a professional garage.

5. Electronic implants and pacemakers: Users who wear a pacemaker or who are fitted with an electronic implant must hold the phone on the opposite side to their implant as a precaution when making a call. If you notice that your phone is causing interference with a pacemaker, switch it off immediately and contact the manufacturer of the pacemaker for advice on what action to take.

6. Fire hazard: Do not leave your device near heat sources such as radiators or cookers. Do not leave your phone charging near flammable materials as there is a real risk of fire.

7. Contact with liquid: Do not expose the phone to liquid or touch it with wet hands—any damage caused by water may be irreparable.

8. Use only DOOGEE-approved accessories. The use of unauthorised accessories may damage your phone or cause a safety risk.

9. Do not destroy the batteries and chargers. Never use a battery or charger that has been damaged. Keep batteries away from magnetic objects as the latter might cause a short-circuit between the positive and negative terminals of your batteries and permanently destroy the battery or phone. As a general rule, you should not expose the batteries to very high or low temperatures (below 0°C or above 45°C). Differences in temperature may reduce battery autonomy and service life.

10. Shock and impact: Handle and use your phone with the utmost care. Protect your phone; shocks and impact may damage it. Some parts of your phone are made from glass and might break if the phone is dropped or is subject to severe impact. Avoid dropping your phone. Do not touch the screen with sharp objects.

11. Electric shock: Do not try to dismantle your phone as there is a very real risk of electric shock.

12. Maintenance: If you want to clean your handset, use a dry cloth (do not use a solvent, such as benzene, or alcohol).

13. Recharge your phone in a well-ventilated area. Do not recharge your device when it is resting on a soft surface.

14. Damage to magnetic strips: Keep your phone away from credit cards as they may damage the data on the magnetic strips.
