V. FAQ

1. The device fails to start up.

1.1 Check whether there is low battery level;

1.2 Check whether the device is powered off due to improper

operation.

In above-mentioned circumstances, please connect your device to power supply to charge the battery, and please wait a while to power on the device. In case it fails to start up again, please replace a new battery and try again.

2. The device suddenly crashes during operation.

2.1 If the device crashes or the touch screen is irresponsive due to improper operation, please long press power button to shut down the device. Turn on the device again for normal operation.

2.2 If the device fails to operate stably because of incompatible software, please uninstall the software or restore factory setting.

2.3 Please take out the battery to shut down the device and install the battery again to power on the device.

3. The device cannot get connected to network via Wi-Fi access.

3.1 Please click "search" to find Wi-Fi signals, and in case there is no Wi-Fi signal, please check whether there is any wireless router operating at a distance of no less than 10 meters.

3.2 In case Wi-Fi signal has been found but the device cannot get connected to network after entering account number, please reboot the device and try Wi-Fi connection again; If fails again, please restart your wireless router.

4. No sound.

Please check if the volume is set too low or muted. If so, please increase the volume or inactivate mute mode.

4.2 Click "setting" > "sound" > "volume", and slide along the volume bar to turn up the volume.

5. For any other questions, please contact our customer service center by sending e-mail to service@link-create.com.cn and you will get the reply within 48 hours (excluding public holidays).
