Specification
1. With solar panels, built-in lithium battery can charge.
2. USB Charging Block with input/output function, you can connect the charger to charge the Bluetooth device can also switch cable pairs charging other devices such as mobile phones.

a.) Device
Bluetooth: Version 2.0
Working distance range: 10 meters.
Battery: Built-in rechargeable Li-ion 3.7V, 1100mAh installed
Limited voltage: 3.0~4.2V
Power consumption: 1 W
Working temperature: -20~70°C
Bluetooth frequency range: 2402~2480 MHz
Degree of distortion: <0.1%
SNR: >90dB
Frequency response: 30Hz~15KHz

Maximum transmitting power response: 5dBm
Input voltage: 5V
Standby current: 5mA
Solar panels output voltage: 5V
Solar panels standby current: 5mA
Working current: 80mA
Standby Time: 220 hours
Talking time: 15 hours

b.) Car Charger
Rated input voltage: 12V
Limited input voltage: 7V~28V
Output voltage: 5V
Output current: 1.5A

Attention
a.) Using method might be different in operation, because of differentiation of mobile phone. For the first time, Please clear pairing log sheet, delete voice command and delete phonebook.
b.) Please be free from extreme temperature, humidity and dust.
c.) Please do not drop off the device as this will cause scratching and damage.
