1 Important safety precautions

Failure to comply with the following precautions may be dangerous or illegal. For more detailed safety information, see "Health and Safety Information".

Drive safely at all times.
Do not use a hand-held phone while driving. Park your vehicle first.

Switch off the phone when refueling.
Do not use the phone at a refueling point (service station) or near fuels or chemicals.

Switch off in an aircraft.
Wireless phones can cause interference. Using them in an aircraft is both illegal and dangerous.

Switch off the phone near all medical equipment.
Hospitals or health care facilities may be using equipment that could be sensitive to external radio frequency energy. Follow any regulations or rules in force.

Interference
All wireless phones may be subject to interference, which could affect their performance.

Be aware of special regulations.
Meet the special regulations in force in any area and always switch off your phone whenever it is forbidden to use it or when it may cause interference or danger.
Sensible use
Use only in the normal position (held to your ear). Avoid unnecessary contact with the antenna when the phone is switched on.

Accessories and batteries
Use only GS&D approved batteries and accessories, such as headphones and
PC data cables.
Use of any unauthorized accessories could damage your phone and may
be dangerous.

Qualified service
Only qualified service personnel may repair your phone.

3 Start to Use
3.1 Power on/off
Switch on: 1. Open the phone. 2. Pin and hard
Switch off: 1. Open the phone. 2. Press and hold the power key.
4 Quick Guide

4.1 Making Calls

When the network provider's icon appears on the screen, you can make or answer phone calls. The info bar on the upper left screen indicates the network's signal strength (where 4 "scale" info bar indicates the strongest signal).

Voice quality varies greatly with obstacles. Therefore, moving within a limited area may improve the signal strength.

4.1.1 Dialing mode

In the dialing mode, the signal indicator, battery power indicator and other icons are all available on the screen. A horizontal line will indicate the cursor's position.

In the dialing mode, there are two ways to make a call:

- Select dial a new number. In the main menu, choose "dial phone" to go to dialing mode, press the number on the screen, and make a new call.
- Dial a number from phonebook. In standby mode, press "phonebook" to go into phonebook menu, and to choose the contact number you need, and press "call" or "call" to make a call.

4.1.2 Calling status

In the calling status, input the number and choose "call" or "call" to go to the calling state: to press "end active" to hang up a call. Then the main screen displays, animation picture, signal and battery power indicators, and recipient's phone number if the number does not exist in Phonebook or the recipient's name.

4.1.3 Answering a call

When a call is coming in, the phone will bring you into incoming call screen and prompt you according to current ringing or vibrating alert settings.

4.1.4 Call Register

The speakerphone also can store your last call and all calls' duration. You can review the following items in the "Call Register":

- Missed calls
- Dialed calls
- Received calls
- Delete call records

4.1.5 Making a domestic call

The simplest way to make a call is to enter the telephone number with press the numeric keys (add the zone code to make a home call) and then press the "call" or "call" to start a call. To change the telephone number, press the "clear" to delete one character. During dialing, the screen will show an animation picture for the calling. Once the other party answers your calling, the screen will show the call status information.

After the call is over, press the "end active" to disconnect the phone call.

For home calls: Zone code + telephone number + the Dial key.

4.1.6 Calling an extension number

For some fixed telephones, you cannot directly call its extension number. You should first connect to the exchange and then the extension. If you insert a pause character "P" between the exchange number and the extension number when you enter the telephone number, the mobile phone will complete the dialing for you. That is, it will call the extension number automatically. To enter "P", long press, or short press for the running three times the "*" key (then the character "P" will appear on the screen).
For extension call:
Zone code + exchange number + "8" + extension number + the Dial key

4.1.7 Making an international call
To make an international call, press "0" key until "4" appears before the
phone number on the screen. This will allow you to make a phone call from
any country, even when you do not know the local prefix number for a
international call (for example, (0) for the U.K.).

After the prefix number, enter the whole number of the called country's
code. As a rule, the zone code for German is 49, British 44 and Swedish 46,
etc.

Like a small international call, the "0" should be removed from the city's zone
code.
For fixed phone calls: "4" zone code of a country + the telephone number
+ the Dial key.

4.1.8 Calling options
This function only works during a telephone call. During a call, there are
several options on the screen. Press the "Call volume" to adjust the
volume level during a call. Press the "DTMF" to open or close DTMF
function. Press the "Hold" key to hold the current call. Press the "Keypad" key to
go to the numeric keypad. Press the "Phonebook" to enter the phone menu.

There are some options can be choose:
- Magic card: select the current call sound effect.
- Preference: Preserving the current call, meanable to dial another call
  (needs to network support).
- End: End the current call.
- A new call: you can suspend one of current "conference call", and
  meanwhile to dial another call.
- Phonebook: Enter the phonebook menu.
- Message: Enter the message menu.
- Voice record: Take a voice record during a call.

What: To open or close the whitelist mode
DTMF: Send DTMF tone
Multi-Party Signal:

4.1.9 Key tone volume
In the talking mode, press [Volume] to adjust the key tone volume.

4.2 Input method
Pen touch the left side of the option icon to choose the input mode, and
the touch pen can move the location cursor in any place of edit area.
- Spaced: Spaced key.
- Alphabet: Alphabet key.
- Number: Number key.

4.2.1 T9 mode
T9 mode: include ABC mode, num mode, Pinyin mode, number mode,
and handwriting mode.

4.2.2 Handwriting
In this function, you can input text in different modes by handwriting. Pen
write the character to switch handwriting mode. Pen touch the icon
"ABC" to switch number mode, touch the corresponding

14
5 Function menu

5.1 STK services

This function is provided by the network service operator. Upon the SIM card and the network service provider, new menu will be added. If the SIM card and the network service provider do not support the service, this function will not be available. For more details, please contact your network service provider.

5.1.2 WAP

You can obtain various services as well as e-mail and other Internet services. These services are provided and maintained by WAP service providers. Press the left soft key to do the following operations:

- Bookmarks: the content depends on the service provider.

5.15 JAVA
### Troubleshooting

Before you call your service provider, please check the following steps. It may avoid you to lose your warranty time and cost.

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Corrective measures</th>
</tr>
</thead>
<tbody>
<tr>
<td>Telephone cannot be switched on</td>
<td>Please take out and insert the battery once again then power it on.</td>
</tr>
<tr>
<td>Network loses</td>
<td>The network connection has been lost. Move and try again. You may be in a weak signal area. Move and try again.</td>
</tr>
<tr>
<td>Display wrong information when the phone switch on</td>
<td>Be sure the SIM card is in the right place. The PIN code has been entered incorrectly three times in succession, and the phone is now blocked.</td>
</tr>
<tr>
<td>Radio quality of the Call is poor</td>
<td>Check the signal strength indicator on the display(ant). The number of bars indicates the signal strength.</td>
</tr>
<tr>
<td>Usage time of battery becomes short</td>
<td>If you are in a building try to move closer to windows side. If battery charge time is shorter, it may be due to the user environment or large volume of calls.</td>
</tr>
<tr>
<td>SIM card error</td>
<td>Wipe the golden colored contact of SIM card with a clean soft cloth. Be sure your SIM card is in a right place.</td>
</tr>
</tbody>
</table>

You have selected a number but it was not dialled

- Be sure that you have pressed <-.<
- Be sure you have accessed the right network service.
- Be sure that you have not set an outgoing call barring option.
- Be sure that you have entered the area code.

Your correspondent cannot reach you

- Be sure your phone is switched on.
- Press power on for more than one second.
- Be sure that you are accessing the network service.
- Be sure that you have not set a incoming call barring option.

Charging error

- Make sure the ambient temperature is right, wait for a while, and charge it again.
- Only use original accessories.
- The battery is empty or has not been used for a long time. It may take a while before the battery icon appears on the screen.
- Replace battery.

Cannot setting some functions

- Wrong operation.
- You will need to contact your service provider to apply the service.

If the above guidelines do not help you to solve the problem, take note of this model number of your mobile phone and a clear description of the problem. Contact your phone dealer or your service center for help.
7 Reference Information

7.1 PIN
Default PIN for the mobile phone: 1122.

7.2 Health and Safety Information
Please read the following instruction carefully and follow the rules in case of:
- Do not use the mobile phone near a chemical plant, gas station or any other explosive.
- Keep children away from the mobile phone.
- Use hand-free device while driving. Stop the car to make phone calls unless in emergency.
- Do not use mobile phone on the aircraft: Keep power off during the flight.
- Power off the mobile phone in a hospital or any place where the use of mobile phone is prohibited. Mobile phone could interfere with electronic devices or medical devices such as heart pacemaker, hearing aids and some other medical devices.
