

# **GSM/GPRS/GPS Vehicle Tracker**

## **Model A/B User Manual**

### **Preface**

Thank you for purchasing the tracker. This manual shows how to operate the device smoothly and correctly. Make sure to read this manual carefully before using this product. Please note that specification and information are subject to changes without prior notice in this manual.

Any change will be integrated in the latest release. The manufacturer assumes no responsibility for any errors or omissions in this document.

## **1. Function Introduction**

1.1 This tracker is a new product based on the GSM / GPRS network and GPS satellite positioning system, which set multiple functions of security, positioning, monitoring surveillance, emergency alarms and tracking in its entirety. It can track and monitor remote target by SMS or internet.

### **1.2 Features**

1.2.1 Support both GPS & LBS (Location based service).

1.2.2 Support SMS/GPRS/Internet Network data transmission

(GPRS/Internet instructions includes in CD in package)

1.2.3 Support GPRS on-line and GPRS re-connected automatically if

GPRS drops

1.2.4 Support SMS / GPRS dual-mode switching

1.2.5 Support configuration by remote terminal.

1.2.6 Support for point-to-point, point to group, group-to-group

monitoring.

1.2.7 Set multiple functions of security, positioning, monitoring surveillance, emergency alarms and tracking in its entirety.

## **2. Applications**

Used widely for vehicle and other moving objects tracking.

## **3. Hardware Description**

① GSM Antenna connector

② SIM card slot

③ SIM card slot Pop-up switch

④ MicroSD slot

⑤ Monitor jack

⑥ GPS Antenna connector

⑦ Shock sensor port

⑧ Harness Port

⑨ GSM/GPS LED

⑩ Backup battery switch

⑪ Remote controller antenna

#### 4. Accessories

NO.	PHOTOES	NAME	NOTE
1		GPS Antenna	3 meters
2		GSM Antenna	3 meters
3		Microphone	1.5 meters
4		Harness	10PIN
5		Relay	12V/40A to 24V/40A according to vehicles
6		Shock sensor	Option for both model A and B
7		Siren	Option for both model A and B
8		Remote controller	Option for model B ONLY

#### 5. Specifications

<b>Humidity</b>	<b>5%--95% non-condensing</b>

## 6. Operating Instructions

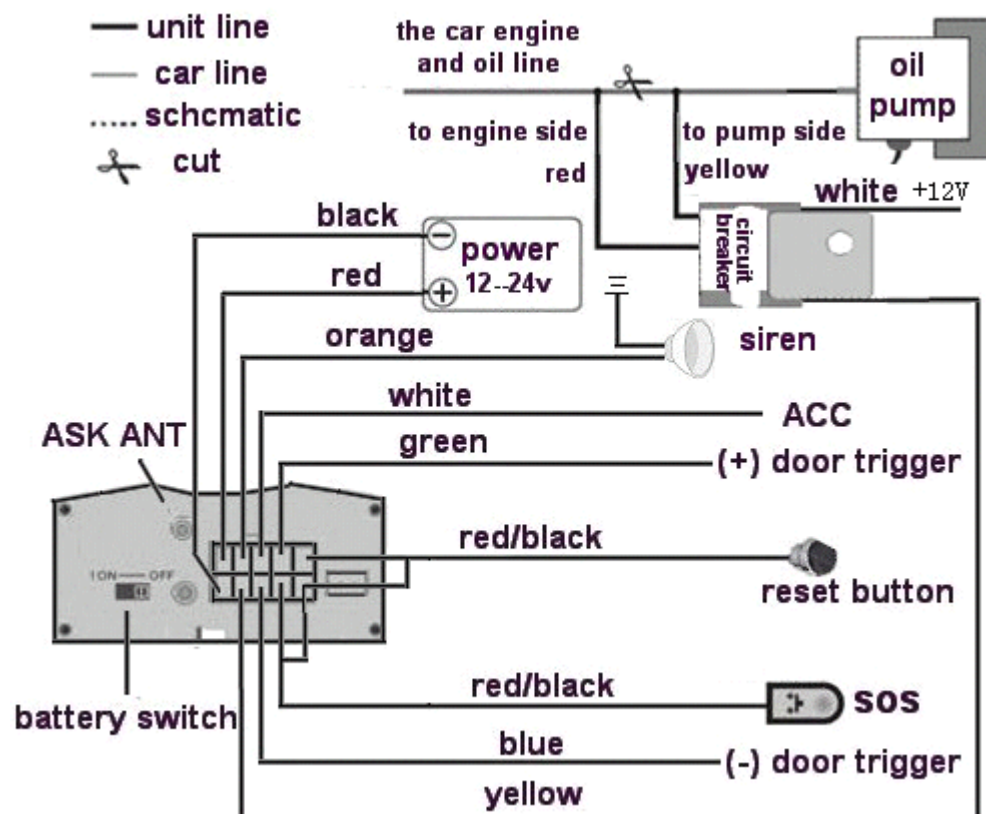

## 6.1 Terminal Installation

**6.1.1** Please ask the qualified engineers to install it.

**6.1.2** Do not install it in an environment which is over GSM performance index, and please pay attention to fix the antennas in an appropriate position with good signals.

**6.1.3** Pay attention to make installation location preventing water and dust.

**6.1.4** Find the 10 PIN harness and insert it into the corresponding holes of the products, and connect the wires with the original car circuit showing below:

Wiring diagram

**6.1.5 Note:** The orange wire can be connected to the original car horn; it can also be connected to the siren you buy with the tracker. (Siren is

### **Option)**

**6.1.6** Knowing about the type of the door trigger is positive or negative trigger.

Please connect the green wire to the door control circuit if it is positive, and connect blue wire if it is negative.

**6.1.7** Please install the Reset button and SOS button on the place driver can touch.

**6.1.8** Insert the shock sensor plug into the sensor jack. (Shock sensor is Option)

**6.1.9** Insert the external monitor Microphone into the monitor jack.

**6.1.10** Connect the GPS and GSM antenna to the right connector, and find an appropriate place and fix the antennas to make sure it receive signals well.

## **6.2 SIM CARD Installations**

**6.2.1** Use a tweezers or a sharp thing to touch the SIM CARD popup switch, the SIM CARD slot will pop up, take out the SIM card slot and put SIM card in it. And then put the SIM card slot back to its original position after confirm the SIM card in the right place.

**6.2.2** Please make sure the SIM card is for GSM network and able to execute the function of incoming calls display, no calls can be diverted and the PIN code is locked. The SMS format must be TXT format, and can't recognize the PDU format.

## **6.3 Turn on the Tracker Device.**

**6.3.1** Connect the positive and negative wire, red and black ones, with 12V or 24V car power system, wait for 1 minute after connecting power to wait

tracker works normal, and then turn on the backup battery switch.

## **6.4 GSM/GPS LED Indicator**

6.4.1 Red LED indicator on: No GSM network signals.

6.4.2 Red LED indicator flashes fast (one time each second): GSM Network signal is normally, and tracker works under GSM mode.

6.4.3 Red LED indicator flashes slowly (one time each three second): Tracker works under GPRS mode.

6.4.4 Green LED indicator on: GPS signal is normal.

6.4.5 Green LED indicator off: No GPS signals.

## **6.5 Initialization**

Send SMS “begin+password” to the unit, it will reply “begin ok” and initialize all the settings to default factory settings. (default password: 123456)

For example: send SMS “begin123456”, it will reply “begin ok”. (No quotation marks“” when sending all the SMS)

## **6.6 Change Password**

6.6.1 Send SMS “ password+old password+space+new password” to the unit to change the password.

For example: send SMS “password123456 888888” to the unit. If succeeded, “password ok” will reply to your cell phone from the device

tracker.

6.6.2 Be sure to keep the new password in mind, you have to upload the software to restore the original setting in case of losing the new password.

6.6.3 Attention: Make sure the new password is in 6 digits Arabic numbers, or else the tracker cannot recognize the password.

6.6.4 **The “+” in the command, please don’t type “+”, space means press the space keyboard on your cell phone.**

## 6.7 Authorization

There are 5 numbers to be allowed to authorize in the tracker at most.

6.7.1 Call and track the tracker device for 10 times from cell phone in success, it will make the cell phone number as the authorized number automatically, and reply “add master ok”.

6.7.2 Authorization: Send SMS “admin+password+space+cell phone number” to set up an authorized number, the other authorized numbers should be set by the first authorized number, if the number is successfully authorized, the unit will reply “admin OK” by SMS.

6.7.3 Delete authorization: Send SMS “noadmin+password+space+authorized number” to delete the authorized number.

6.7.4 If you want to track the target tracker device when it enters into another country, you must add the country code before the cell phone number, for example, send SMS “admin123456 008613322221111” to the device.

Note: 13322221111 will be set up as the authorized number.

## 6.8 Single Locating

**6.8.1** Any number call the tracker device, it will reply a SMS including the position of latitude and longitude if don't set up the authorized number. If authorized number has set successfully, the device won't reply SMS including the positioning of latitude and longitude when the unauthorized number dials up it.

**6.8.2** Dialing the tracker device from the authorized number, it will hang up your calling and respond to a real-time latitude and longitude information as following:

**6.8.3** When GPS signals is weak, The SMS including the position of latitude and longitude is the position that the tracker received GPS signals at last. If it is different with its exact current location, pay attention to check the time included in the SMS you got.

## 6.9 Auto track continuously

### 6.9.1 Track with limited times upon time interval:

Send SMS command “fix030s005n +password” to the tracker device, it will report the latitude & longitude at 30s intervals for 5 times. (s:second, m:minute, h:hour). This command set must be in 3 digits and the maximum value is 255.

### **6.9.2 Track with unlimited times upon time interval:**

Send SMS “fix030s\*\*\*n+password” to the tracker device, it will reply the latitude & longitude continuously at 30 seconds intervals.

Note: the interval must not less than 20s.

### **6.9.3 Smart track upon time and distance interval:**

6.9.3.1 Please set "track with unlimited times upon time interval" before this function, and send "distance+password+space+distance", tracker will reply "Distance ok", and then tracker will locate upon both the pre-set time and distance.

E.G: Send "distance123456 0050", it means distance is 50 meters; the number must be 4 digits Arabic numbers.

6.9.3.2 Set this function on web server: Set time interval first and then distance interval, tracker will locate upon the time and distance.

**6.9.4 Cancel:** Send SMS “nofix+password” to the tracker device to cancel the “auto track”.

## **6.10 Automatic update positions of vehicle turns**

The tracker will update the positions automatically to web server once the vehicle changing driving direction over pre set angle value to form a smooth trajectory consistent with the actual road, this function is only effective in GPRS mode.

6.10.2 Send "angle+password+space+angle" to tracker, it will reply" angle ok".

6.10.3 The angle must be 3 digits Arabic numbers, default angle value is 30 degree.

## **6.11 GPS drift suppression**

6.11.1 Send "suppress+password" to tracker, it will reply" suppress drift ok".

The GPS data stop updating if vehicle is not moving and latitude and longitude always keep same, and GPS data updates automatically when vehicle is moving.

6.11.2 This function is activated as default, send "nosuppress+password" to tracker, it will reply" nosuppress ok ".

## **6.12 Absolute street address by SMS**

6.12.1 You must set up the APN of your local GSM network for the SIM card in tracker first before using this function, if there is user name and password for GPRS login, Please refer to 6.33.1 and 6.33.2 to configure the APN, user name and password for GPRS login.

6.12.2 After configure the APN, send "address+password" to device, it will reply SMS including real street/address name. For example: No.113,

Nantou Guankou 2nd Rd. Nanshan district, Shenzhen, Guangdong, china.

### **6.13 Location based service (LBS)**

When the tracker device doesn't received valid GPS signals, tracker will positioning by location based service(LBS), the messages includes the GPS coordinates of the last position in SMS mode, but the LAC in message is the current new position, the location can be seen by input the LAC code in the menu "Manual Track" of web platform [www.gpstrackerxy.com](http://www.gpstrackerxy.com), you can also send command "address+password" to tracker to get the newest absolute address and GPS coordinates as well; tracker will automatically switch to track by location based service in GPRS mode, and actualized on the map of web server with LBS mark. And there may be some inaccuracy with actual location by LBS tracking; the bias depends on GSM reception.

Note: This feature can be used normally in most areas according to the signal of GSM network. It may not be available in some areas.

### **6.14 Monitor**

6.14.1 The command to switch between Track and Monitor are "tracker" and "monitor".

6.14.2 The default mode is "track" (Track mode).

6.14.3 Send SMS "monitor+password" to the unit, and it will reply "monitor ok!" and switch to "monitor" mode.

6.14.4 Send SMS "tracker+password" to the unit, it will reply "tracker ok!" and

restore to “track” mode.

## **6.15 Data logging**

**6.15.1 Auto logging:** When the tracker device lost GSM signals or fall offline from GPRS, tracker will log the tracking position and alerts automatically in the SD card on the basis of the pre-set condition, when GSM signals get back, all the event alerts will be auto-sent to the authorized numbers or monitoring platform (server), but the logged tracking data should be loaded to the monitoring platform via SMS command.

**6.15.2 Logging upon times:** Send SMS: “save030s005n+password” to the tracker unit, it will reply “save ok”, and will log the lat, long locations every 30 seconds for 5 times. (S: second, m: minute; h: hour).

**6.15.3 Multi-logging:** Send SMS:”save030s\*\*\*n+password” to tracker device, it will reply “save ok”.

**6.15.4 Logging Clearance:** send SMS: “clear+password” to tracker device, it will reply “clear ok”.

**6.15.5 Logging Volume:** It depends on the capacity of the SD card inserted in the tracker device.

**6.15.6** The logged data in SD card can be copied to computers through card reader, and then the data route can be checked by importing data in the menu “Data Import” of web platform [www.gpstrackerxy.com](http://www.gpstrackerxy.com)

## 6.16 Data Load

6.16.1 Current date Load: Send SMS: "load+ password" to tracker device, it will reply: "load ok" if the device is working well under GPRS mode; if not, it will reply "load fail! Please check gprs" that means device does not work under GPRS mode.

6.16.2 Specified date Load: Send SMS: "load+ password+ space+ year month date" to tracker device, it will reply: "load ok" and load the tracking data to the monitoring platform upon the valid time you choose. For Example: send SMS: "load123456 20110425" to the tracker device, means to load the tracking data of 25th April 2011 to monitoring platform.

## 6.17 Forward the third parties' message

6.17.1 Send SMS "forward+password+space+third parties phone number" from authorized phone number, tracker will reply "forward ok", and supports 1 third parties phone numbers at most.

For example, set the phone number of the service provider of the simcard in the tracker, when charge remind message coming in, tracker will forward it to authorized phone number.

6.17.2 Cancel: Send SMS command "nofoward+password".

## 6.18 Charges Inquiry

Send SMS command "balance+password+space+phone number+space+content" to tracker, it will forward the content to the

specified phone number and return the content from the specified phone number.

## **6.19. Alarms**

### **6.19.1 Low battery alarm**

When the voltage of the tracker device is near 3.6V, it will send SMS “low battery+lat./long” information to the authorized number in 3 minutes interval.

### **6.19.2 Power off alarm**

When the power be cut off or the voltage is 0V, the tracker device will send SMS “power alarm+lat./long.” to the authorized number in 3 minutes interval.

### **6.19.3 SOS**

Long Press the SOS button for 3 seconds (For model B, press B button on remote controller for 3 seconds) , the tracker device will send SMS “help me!+lat./long.” to all the authorized numbers in 3 minutes interval. It will stop sending such a SMS when any authorized number reply SMS “help me!” to the tracker.

### **6.19.4 Geo-fence**

Set up a geo-fence for the tracker device to restrict its movements within a district. The unit will send SMS to the authorized numbers when it goes out

of this district.

Set up: When the unit stays immobile in a place for 3-10 minutes, the user can send

SMS“stockade+password+space+latitude,longitude;latitude,longitude” to unit to set the restricted district. In case of breach, it will send SMS “stockade!+ latitude & longitude” to the authorized numbers in 3 minutes interval.

Remark: The first latitude & longitude is coordinate of the top left corner of the Geo-fence, while the second latitude & longitude is the coordinate of the bottom right corner, it will alarm in 3 minutes interval.

Cancel: Send SMS “nostockade+password” to deactivate this function.

## **6.19.5 Multi-area management**

### **6.19.5.1 Set Area**

Send SMS command

"area+password+space+latitude,longitude+space+areaname,distanceM" to tracker(distance unit: M for meter, K for kilometer), it will reply "area01 ok".

Example: Send "area123456 22.353648,113.543678 school,800M".

Note: 5 areas at most and the distance between two points can't be less than

the total distance in the 2 commands, and different areas can't cover each other.

#### 6.19.5.2 Delete areas

Send SMS command:"noarea+password+space+area name", tracker will reply:"noarea ok".

#### 6.19.5.3 Rename and set distance

Send SMS command "rename+password+space+old name;new name,distanceM" to tracker, if name is not repeated and area doesn't cover others, it will reply "rename ok!" for successful configuration.

Example: Send"rename123456 area01;school,800M", it means the new area name is "school", and covers area of a radius of 800 meters.

#### 6.19.5.4 Activate multi-area management

Send SMS command "area+password+space+on" to tracker, it will reply "Area on ok!", when tracker enter the pre set area, it will send SMS "area name+latitude & longitude" to all the authorized phone number, and send same SMS when goes out of the area.

#### 6.19.5.5 Deactivate Multi-area management

Send SMS command "area+password+space+off" to tracker, it will

reply"area off ok!"

### **6.19.6 Movement alarm**

6.19.6.1 Set up: when the unit stays immobile in a place for 3-10 minutes with

GPS signal reception, the user can send

SMS“move+password+space+0200” to the tracker (Suppose area of a radius of 200 meters, it supports 4 digits at most. Unit: Meter). It will reply “move OK”. In case of such a movement (the default distance is 200m), it will send SMS “Move+ latitude & longitude” to the authorized numbers at 3 minutes interval.

6.19.6.2 Cancel: Send SMS “nomove+password” to deactivate the movement alarm.

### **6.19.7 Over speed alarm**

Set up: Send SMS “speed+password+space+080” to the unit (suppose the speed is 80km/h), and it will reply “speed OK!”. When the target moves exceeding 80km/h, the unit will send SMS “speed+080!+ latitude & longitude” to the authorized numbers in 3minutes interval.

Cancel: Send SMS “nospeed+password” to deactivate the overspeed alarm.

Remark: The recommended speed should be not less than 30km/h. For below that rate, it will be effected the accuracy by GPS signals drift etc.

### **6.19.8 Accident alarm (Option):**

When tracker detects accident occurred (severe impact), it will send "Accident! + latitude & longitude" to all authorized phone numbers.

### **6.19.9 ACC working alarm**

6.19.9.1 This function is disabled as default. To active this functions, send "ACC+password" to tracker, it will reply "ACC ok". And tracker will send "ACC on+latitude & longitude" to authorized numbers when detect ignition action, that means the vehicle has been started; and tracker will send "ACC off+latitude & longitude" to authorized numbers, that means ACC off.

6.19.9.2 Send "noACC+password" to disabled this function, tracker will reply "noACC ok".

6.19.9.3 This configuration can only enable and disable the alarm to authorized numbers; it will send to web server automatically in GPRS mode and can't be disabled.

### **6.20 Cut off the Oil and Power System**

6.20.1 Send "stop+password" to tracker, if vehicle speed is more than 20km/h, the command won't be executed immediately, it will reply "It will be executed after speed less than 20km/h", then tracker execute stop command when speed less than that and reply "Stop engine succeed". And it will remain immobile state until next command to resume.

### 6.20.2 Resume the Oil and Power System

Send “resume+password” to tracker, it will reply "Resume engine succeed", that means vehicle has resume the oil supply.

## 6.21 Arm

### 6.21.1 Set up arm by SMS

Send SMS command “arm+password” to the tracker device in the vehicle. It will reply “Tracker is activated” in both armed and disarmed state, and the SMS command will make the tracker device enter into armed state if the unit currently disarmed.

User must stop the engine, (that is ACC is lower voltage). Sending SMS “arm+password” when close the door and left. You will set up arm status fail if the engine is turned on (the ACC is high voltage), it will reply “set up fail! pls turn off ACC”

### 6.21.2 Set up arm by remote controller (Option, for model B ONLY)

Press “A” button on the remote controller, the car enters into armed state and the siren will beep one time, no SMS reply.

## 6.22 Disarm

### 6.22.1 Disarm by SMS

Send SMS command "disarm + password" to the tracker device in the vehicle, It will reply “Tracker is deactivated” in both armed and disarmed state, and the SMS command will make the tracker device enter into

disarmed state if the unit currently armed.

It won't alarm if the door is open and sensor is vibrated and the engine is started when deactivated this arm function.

### **6.22.2 Disarm by remote controller (Option, for model B ONLY)**

Press "B" button on the remote controller, the car enters into disarm state, and the siren will beep two times, no SMS reply.

### **6.23 Function of Remote Controller (Option, for model B ONLY)**

- |                  |  |
|------------------|--|
| ARM              | Press "A" button for 0.5 second, the siren will beep one time.   |
| DISARM           | Press "B" button for 0.5 second, the siren will beep two times.  |
| Silent mode      | Press "A+B" together for 0.5 second when it is in disarm state, the siren will beep three times.         |
| Quit silent mode | Press "A+B" together for 0.5 second again when it is in disarm state, the siren will beep four times.    |
| Deterrence       | Long press "A" button for 3 seconds, siren will be sound for 10 seconds, press "A" or "B" button to quit |
| SOS              | Long press "B" button for 3 seconds, device will send SOS alert to authorized phone numbers.             |

### **6.24. Alarms under Arm State**

#### **6.24.1 door alarm**

The unit will send SMS "Door alarm+lat/long" to the authorized number in

3 minutes interval when the door of the car opens in arm status; Siren will be sound for 30 seconds, and circle again after stop 1 minute, send “disarm+password” to stop it.

#### **6.24.2 Shock Sensor alarm**

The unit will send SMS “Sensor alarm+lat/long” to the authorized number in 3 minutes interval when the sensor is triggered in arm status; Siren will be sound for 30 seconds, and circle again after stop 1 minute, send “disarm+password” to stop it.

#### **6.24.3 ACC alarm**

The unit will send SMS “ACC alarm+lat/long” to the authorized number in 3 minutes interval when the engine of the car is turned on, that is the key is rotated to ACC.ON position to start the car in arm state; Siren will be sound for 30 seconds, and circle again after stop 1 minute, send “disarm+password” to stop it.

### **6.25. Silent Mode**

#### **6.25.1 Set up silent mode by SMS**

Send SMS “silent+password” to tracker device, it will reply “silent ok!”.It means tracker device enters into **silent mode**, siren won't be sound after

alarm is triggered, but tracker will send alarm SMS to authorized number.

**Quit silent mode** send SMS “loud+password” to tracker device, it will reply “loud ok!”. It means tracker quit from silent mode, siren will be sound after alarm is triggered, and it will also send SMS alarm to authorized number.

#### **6.25.2 Set up silent mode by remote controller (Option, for model B ONLY)**

**Silent mode** Press “A+B” together in disarm state for 0.5 second, the siren will beep three times, siren won’t be sound after alarm is triggered, but tracker will send alarm SMS to authorized numbers.

**Quite silent mode** Press “A+B” together in disarm state for 0.5 second again, siren will beep four times. Siren will be sound after alarm is triggered. And tracker will also send SMS alarm to authorized numbers.

#### **6.26. Alarm without GSM network service**

When the car is in the place without GSM network service, siren will be sound under non-silent mode if alarm is triggered (door, sensor, ACC), but no SMS alarm will send to authorized number.

#### **6.27 Check the Vehicle State.**

Send SMS command “check+password” to the tracker device in the vehicle,

It will reply the status of the power, battery, GPS, ACC, door, GSM signal to the authorized numbers. For example: Send SMS “check123456” to the tracker device in the vehicle, It will reply following SMS.

Power: ON/OFF

Battery: 100%

GPRS: ON/OFF

GPS: OK/NO GPS

ACC: OFF/ON

Door: OFF/ON

GSM Signal: 1-32(performance). Note: The higher digit it shows; the stronger of GSM signals it receives.

## **6.28 Reset Hardware**

### **6.28.1 SMS Reset**

Send SMS “reset+password” to tracker device to reset the GSM module and GPS module of the tracker device, it will reply “reset ok”.

### **6.28.2 Reset Button to Reset**

Press the reset button for 1 second, hardware of tracker device will reset.

## **6.29 Check IMEI**

Send SMS command "imei+password" to the unit. E.g. Send SMS command "imei123456" to the tracker device, an IMEI number in 15 digits

will reply to your cell phone.

### 6.30 Terminal (local) Time Setting

**6.30.1** Send SMS command “time+space+zone+password+space+time” to the tracker unit, If succeed, It will reply “time OK”

**6.30.2** For example: Send SMS “time zone123456 8”, 8 is Chinese time zone, If your country time zone is minus, send SMS “time zone123456 -8”.

### 6.31 TCP/UDP switch

Command: "gprs+password,1,1" switch to UDP mode.

Command: "gprs+password,0,0" switch back to TCP mode, this is the default mode.

### 6.32 Configure parameters by USB

Copy the Serial debugging tool to computer, connect the tracker with computer and open Serial debugging tool with the USB cable (option), then choose correct COM port, baud rate is 19200, send serial port command (Tick "send new " on SSCOM interface): \$SET GT PARA, tracker will return the sample format of the command, send appropriate commands according to the sample format of command. Tracker will return "ok" after succeed in configuring to indicate successful configuration. Please refer to “COM PORT command user manual” for detailed information.

### 6.33 GPRS Setting

User must send SMS via cell phone to set up APN, IP and port before

starting tracking by GPRS.

### **6.33.1 Configure APN**

**6.33.1.1** APN standards for Access Point Name and differs from country to country. For more information about your local APN, please inquire with your local GPRS network operator.

**6.33.1.2** Text the tracker a SMS “APN+password + Space + your local APN” via a cell phone and if succeeded, the tracker will return the message “APN OK”.

**6.33.1.3** E.g. Send SMS command “APN123456 CMNET”. If succeeded, “APN OK” is returned by the tracker in SMS.

Notes: 123456 refer to password of tracker and CMNET is the APN of one of china GPRS Network Operator (China mobile).

### **6.33.2 GPRS User Name and password Setup**

**6.33.2.1** In most countries, the user name and password involving GPRS login are not compulsorily necessary, therefore, the entry can be skipped. For those countries requiring user name and password, please configure as following:

**6.33.2.2** Send SMS “up+password+space+user+space+password”If succeeded, “user, password ok!” is returned by the tracker in SMS.

**6.33.2.3** For instance, send SMS “up123456 jonnes 666666” to the tracker, and if succeeded, the tracker returns “user, password OK”

Note: 123456 is tracker device password, jonnes is the user name for GPRS login, 666666 is the password for GPRS login.

### **6.33.3 IP and Port Setup**

**6.33.3.1.** Send SMS as below via a cell phone:

adminip+password+Space+IPAddress+Space+Port Number. If succeeded, “adminip OK” is returned by the device in SMS.

**6.33.3.2** E.g. Send SMS command “adminip123456 202.104.150.75 9000” to the tracker device, If succeeded, “adminip OK” is returned by the device in SMS. ( 123456 is default password, 202.104.150.75 is IP, 9000 is port).

### **6.34 Less GPRS traffic**

6.34.1 Tracker will change to less GPRS traffic mode after parking 10 minutes, GPRS disconnect and connect again when alarm being triggered or start driving.

6.34.2 Activate this function: Send "less gprs123456 on", tracker will reply "less gprs on ok".

6.34.3 Deactivate this function: Send "less gprs123456 off", tracker will reply "less gprs off ok".

Note: 123456 is the password of tracker, and replace it with the new if

you have changed.

### **6.35. Modes Switch between “SMS” and “GPRS”**

**6.35.1** The default mode is “SMS”

**6.35.2** Send SMS “GPRS+password” to the unit, and it will reply “GPRS ok!”

it means tracker device has switched to “GPRS” mode.

**6.35.3** Send SMS “SMS+password” to the unit, it will reply “SMS ok!” and restore to “SMS” mode.

### **6.36 Web platform and PC installation tracking software user manual**

6.36.1 Web based platform [www.gpstrackerxy.com](http://www.gpstrackerxy.com). Configuration IP: 202.104.150.75 Port: 9000. Please check “software platform user manual” included in the CD for detailed operation information.

6.36.2 PC based installation tracking software user manual included in the CD in package.

## **7. Cautions**

**Please comply with the instructions to extend the unit life:**

1. Keep the unit dry. Any liquid, i.e. rain, moisture, may destroy or damage the inside circuitry.
2. Don't use & store the unit in dusty places.
3. Don't put the unit in overheated or overcooled places.
4. Handle carefully. Don't vibrate or shake it violently.
5. Clear the unit with a piece of dry cloth. Don't clean in chemicals, detergent.

6. Don't paint the unit, this may cause some foreign materials left in between the parts.

7. Don't disassemble or refit the unit.

8. Please read the user manual carefully before installation and operation, learn something more about the voltage range. Otherwise, it won't work properly or destroy the product.

## 8. Faults & the Solutions

Faults	Solution
Startup Fail	Please check out the power wiring in correct place.
Call Fail	Check the GSM antenna connected. Check whether the SIM card in place. Check whether the normal power supply voltage.
Hang up Fail	In existence of an authorized number, an unauthorized number dials up the unit. Please initialize the unit and re-set up the authorized numbers.
Monitor Fail	Check if the authorized number is setup
Location report in digits of zeros.	Check out if the GPS external antenna well.
