1. Introduction

1.1 Preface

Dear Customer,

Thank you very much for purchasing this brand-new Home Multimedia Center with stronger function support. In the digital era, this product is quite suitable to be a home entertainment partner. With her outstanding designed features, you can enjoy movies and music, view photos of precious moments, and record your favorite TV or movie programs to make up for your regret of not being able to enjoy them in time. The editing function provides you with an easy way to save the essential part. It’s also a good choice to use this product as a portable storage device for its built-in HDD and high-speed USB 2.0.

This player has the following functionality:

Video Recording - supports one button recording and schedule recording in MPG format, can easily record programs from TV, DVD player and DV, and save as MPEG-2 (.mpg) format; also can edit the recorded titles;
- Time shifting function;

Movie Playback - supports VOB (DVD), IFO (DVD), MPG (MPEG-2/1), AVI (MPEG-4 ASP: XviD), DAT (VCD), and MPEG-2 TS files; resolution up to 1080i;

Music Playback - supports MP3, OGG, and WMA* files;
- supports one button playlist music playback;

Photo Playback - supports digital camera JPEG, and BMP files;

Data Storage - works as a portable hard disk using USB 2.0 port;

Network Function - Ethernet & WLAN streaming playback and NAS function (Wireless function supported by the optional Wireless LAN USB Adapter);

HDMI - High-Definition Multimedia Interface transmits the highest quality digital video and audio via a single cable, simplifies cabling and provides high quality home theater experience.

We hope that this product will bring you a lot of enjoyment. We are committed to apply multimedia technology to work, entertainment, family, daily life, car and everywhere in the world. Welcome to be with us. Thank you again for choosing our Home Multimedia Center.

* Notice: WMA Pro & Advanced Profile and WMA with DRM are not supported.

1.3 Caution

This player's design and manufacture has your safety in mind. In order to safely and effectively use this player, please read the following before usage.

1.3.1 Usage cautions
User should not modify this player. If commercial hard disk is being used, the environmental temperature should be within +5°C ~ +35°C.

1.3.2 Power
The player's power voltage: DC 12V.
When using this player, please connect the supplied AC adapter or AC adapter cable to the player’s power jack. When placing the adapter cable, make sure it can not get damaged or be subject to pressure. To reduce the risk of electric shock, unplug the adapter first before cleaning it. Never connect the adapter to the player in a humid or dusty area. Do not replace the adapter or cable’s wire or connector.

1.3.3 Radio interference/compatibility
- If not properly shielded, almost all electronic devices will get radio interference. Under some conditions, your player might get interference.
- The design of this player has followed the FCC/CE standard, and has followed the following rules:
  (1) This player may not cause harmful interference;
  (2) This player could accept some interference received including interference that may cause undesired operation.

1.3.4 Repair
If the player has a problem, you should take it to an appointed repair center and let the specialists do the repair, never repair the player yourself, you might damage the player or endanger yourself or your data.

1.3.5 Disposing of the player
When you dispose of the player, be sure to dispose it appropriately. Some countries may regulate disposal of electrical device, please consult with your local authority.

1.3.6 Hard disk cautions
The player uses an internal hard disk for data storage, in normal case, format or repair is not required.
You should carefully read the < Frequently Asked Questions > chapter, and check our website for latest information before formatting the hard disk.

- Physical impact may create bad sector in the hard disk, you can use CHKDSK to fix the problem.
- All data stored in the player may be lost due to physical impact, electrical shock, power lost,
HDD format etc. Please backup your data.
- It is suggested to do defragment after a long period of usage.
- Regularly backup the data in the hard disk so that it can be recovered in the event of data corruption or loss. Our company takes no responsibility for loss of data stored on the hard disk.

1.3.7 Others
When using this player, please do not let the player come into contact with water or other liquid, if water is accidentally spilled on the player, please use a dry cloth to absorb the spillage.
Electronic products are vulnerable, when using please avoid shaking or hitting the player, and do not press the buttons too hard.
✧ Do not let the player come into contact with water or other liquid.
✧ Do not disassemble the player, repair the player or change the design of the player, any damage done will not be included in the repair policy.
✧ Do not press the buttons of the player too hard.
✧ Avoid hitting the player with hard object, avoid shaking the player, and stay away from magnetic fields.
✧ During electrostatic discharge and the strong electromagnetic field, the product will malfunction, then unplug the power cable and the product will return to normal performance next time it is powered on.
1.4 Connection

1.4.1 Connect to Computer
(1) Make sure the player is powered on;
(2) Plug in the mini connector of the USB cable to this player’s USB DEVICE port;
(3) Plug in the big connector of the USB cable to Computer.

1.4.2 USB Mass Storage Device (like U disk, MP3, USB HDD etc.) Connection
(1) Make sure the player is powered on;
(2) Plug in the U disk or USB HDD etc. to one of the USB host ports of this player.

1.4.3 TV connection
1. A/V IN
(1) Follow the picture and plug in the 3 color connector to the player’s A/V IN jack;
(2) Follow the picture and plug in the 3 color connector to the A/V OUT jack of the TV/IPTV
Set-Top Box (STB).
In this way, you can record TV programs from the TV/IPTV Set-Top Box.

2. A/V OUT
(1) Follow the picture and plug in the 3 color connector to the player’s A/V OUT jack;
(2) Follow the picture and plug in the 3 color connector to the TV’s A/V IN jack.
In this way, you can enjoy the content in the player on TV or other display devices.

3. Y/Pb/Pr Component OUT
(1) Follow the picture and plug in the 3 color connector to the player’s Y/Pb/Pr jack;
(2) Follow the picture and plug in the 3 color connector to the TV’s Y/Pb/Pr jack.
Audio Connection while using Y/Pb/Pr Video out:
First method: use the audio output from the A/V OUT jack;
Second method: use the audio output from the S/PDIF Coaxial or Optical jack.
In this way, you can also enjoy videos, music, and photos in the player on TV.

4. HDMI OUT
(1) Follow the picture and plug one connector on your HDMI cable to the player’s HDMI jack;
(2) Follow the picture and plug the other connector on your HDMI cable to the TV’s HDMI jack.

In this way, you can have the highest quality video and audio via a single cable.

1.4.4 Digital Audio Device connection
(1) Follow the picture and plug in the RCA connector on your coaxial cable to the player’s S/PDIF Coaxial jack. Or if you use optical fiber, please plug in the Toslink connector on your optical fiber to the player’s S/PDIF Optical jack;(not supplied)
(2) Follow the picture and plug in the other connector on your coaxial cable or optical fiber to the digital audio device (not supplied).

1.4.5 Power connection
(1) Follow the picture and connect the AC adaptor to the player’s DC IN jack;
(2) Follow the picture and plug in the AC adaptor to the power outlet.

1.4.6 Ethernet connection
To connect to a LAN (Local Area Network) you require a cat5, cat5e or cat6 network cable (not supplied).
(1) Connect one of the crystal plugs on the cable to the player’s RJ45 LAN socket;
(2) Connect the other crystal plug on the cable to a RJ45 LAN port on your router, switch, or hub devices.
1.4.7 WLAN connection

(1) Make sure the player is powered on;
(2) Plug the Wireless LAN USB Adapter (i.e. Wi-Fi USB Dongle) to the USB HOST port of the player.
1.5 First Time Usage

1.5.1 HDD Format
For users who bought the player without HDD inside, and want to install the SATA HDD by himself, please see ‘HDD Format’ in ‘6.5 Changing System Settings’ for details.

1.5.2 Remote Control
First time usage of Remote control
Install the batteries before using the remote control, installation steps are as the picture shows:

1.5.3 Power on/off, language control
1. Power on
After connecting the power supply cord, the player will soon enter standby mode, and the red STANDBY indicator on the front panel will turn on. Then press the POWER/STANDBY button on the front panel or remote control to wake up the system, wait for a couple of seconds to enter the system and the blue ON indicator on the front panel will turn on.

2. Power off
When the system is running, press the POWER/STANDBY button on the front panel or remote control, the player will enter standby mode.

3. Language control
The system language of this player can be set to English or other languages. In the setup interface is language setup, the selected language will take effect immediately.
2. About the Player

2.1 Remote Control

3. Getting Started

Power on the system, and after a few seconds, the system will enter a guide menu. To enter this menu, press  on the remote control too.

3.1 Selecting Video In – Live TV, Recording and Time Shift

To pre-view the video to be recorded, or have time shift function (See TIME SHIFT button in 2.1 Remote Control for more details).

To select an input source, press  on the remote control or select Video In button on the guide menu page.

3.2 Selecting Playback – Playback and Edit Recorded Titles

A clip recorded in HDD or USB device is called a Title.

Playback the recorded video, you can also Merge/Split/Delete/Edit all the recorded video titles.

Press  on the remote control or select Playback button on the guide menu page to access Title List.

3.3 Selecting Browser – Playback Multimedia Files

You can browse all the multimedia (Videos/Music/Photos) files on the internal HDD/USB or Network, and playback them on TV.

Press  on the remote control or select Browser button on the guide menu page to browse movie, photo, and music files stored either on a HDD, USB device, or Network.
3.4 Selecting Setup

To enter the setup menu, select on the remote control or select Setup button on the guide menu page.

3.5 Selecting Playlist – Music Playlist

To enter the music playlist menu, select Playlist button on the guide menu page.
4. The Title List Menu for Recorded Videos

The Title List menu allows you to play and edit all saved titles. To enter the menu, press to enter Title List. To select Playback from the Guide menu will enter the Title List also.

4.1 Title List Menu

</tr>
</tbody>
</table>
4.2 Playing Back Titles

To play a recorded title, do the following:

1. Press \( \text{ } \) and \( \text{ } \) on the remote control to select the Play tab from the menu bar.
2. Press \( \text{ } \) and \( \text{ } \) on the remote control to select the title you wish to play.
3. Press \( \text{ } \) on the remote control or the ENTER (Play) button on the front panel to play the file.
4. Press \( \text{ } \) on the remote control or the CANCEL (Stop) button on the front panel to stop playback and return to the Title List menu screen.

4.3 Deleting Titles

To delete a title, do the following:

1. Press \( \text{ } \) and \( \text{ } \) on the remote control to select the Delete tab from the menu bar.
2. Press \( \text{ } \) and \( \text{ } \) on the remote control to select the title you wish to delete.
3. Press \( \text{ } \) to confirm and delete the file.
4. A confirmation message appears. Press \( \text{ } \) or \( \text{ } \) and select OK.
5. Press \( \text{ } \) to delete the selected file.
To cancel delete, select Return.

4.4 Renaming Titles

To rename a title, do the following:

1. Press \( \text{ } \) and \( \text{ } \) on the remote control to select the Rename tab from the menu bar.
2. Press \( \text{ } \) and \( \text{ } \) on the remote control to select the file you wish to rename.
3. Press \( \text{ } \) on the remote control. The name entry screen appears.
4. Use the navigation arrows to select letters and numbers. Select **CAPS** to toggle between uppercase and lowercase letters. Press <- to delete a letter. Press -> to insert a space. Press **OK** to input each letter or number.

5. Once you have entered the new name, select **OK** and press **RETURN** to confirm all changes.

If you want to cancel the naming during the process, press **RETURN**

### 4.5 Sorting Files

Press < and > on the remote control to select the **Sorting tab** from the menu bar.

Press **RETURN**, and the menu appears.

### 4.8 Saving Your Recorded Titles

All the recorded titles are stored temporarily in a recording disc partition (UDF format) which cannot be identified by personal computers. If you want to share the recorded titles on your computer, please copy the titles from the recording disc to the multimedia disc which is in FAT32 format first. See *Copy to FAT32 partition* in *4.6 Title Edit Menu* for more details.
5. Timer Record Menu

The Timer Record menu allows you to create, edit and delete recording schedules and view all schedule status and history. Press \[\text{Timer} \] on the remote control to enter the menu.

5.1 Create a New Schedule

Press \[\text{and} \] on the remote control to select the Edit tab from the menu bar.

Select Add a New Schedule and press \[\text{.} \] The schedule setting screen appears.

Use \[\text{and} \] on the remote control to move between fields and Press \[\text{and} \] to adjust each setting.

| Start Time | Enter the date and time of the recording. |
| Length    | Enter the length of the recording |
| Repeat    | Select how often you want the schedule to record. Choose from Once, Everyday, Mon-Fri, Mon-Sat or for an individual day of the week. |
| Quality   | Select the recording quality. Choose from HQ, SLP, EP, LP and SP. The higher the quality, the more space required on the hard drive. See HDD Free Space on the left of the screen for details of how long you can record for using each setting. |
| Preview   | This small preview window will show the current program of the select channel. |

5.2 Editing Schedule

Press \[\text{and} \] on the remote control to select the Edit tab from the menu bar.
Select the schedule you want to edit from the list and press \[ \text{Edit} \]. The schedule setting screen appears. Modify the schedule as described in 5.1 Creating a New Schedule.

5.3 Deleting Schedules

Press \[ \text{Edit} \] and \[ \text{Delete} \] on the remote control to select the Delete tab from the menu bar.

Select the schedule you want to delete and press \[ \text{Delete} \]. A confirmation message appears.

Select CANCEL, Delete the selected schedule or Delete all schedules. Press \[ \text{Delete} \] to confirm.

5.4 Viewing Schedule Status

Press \[ \text{View} \] and \[ \text{Edit} \] on the remote control to select the Status tab from the menu bar.

The schedule list is displayed. Select a schedule and press \[ \text{Edit} \].
Select **Enable the timer by user’s setting** or **Pause the selected schedule**. Press 🔄 to confirm.

### 5.5 Viewing Recording History

Press ⬅️ and ➤️ on the remote control to select the **History** tab from the menu bar.

Here you can view a complete history of all recordings that were set.
6. Setup Menu

The Setup Menu allows you to configure language, audio, video, record, network and system settings. To enter the menu, select Setup from the Guide menu or select on the remote control.

6.1 Changing Video Settings

Press and on the remote control to select the Video tab from the menu bar.

</tr>
</tbody>
</table>

| Auto Chapter     | Select to add chapter marks automatically at set intervals. |
### Record Device
Select to set device to restore the recorded files.

- Press ☻ and ◁ to select from HDD and USB. Press ☼ to confirm.

### Timeshift Device
Select to set Time Shift device.

- Press ☻ and ◁ to select from HDD and USB. Press ☼ to confirm.

### 6.4 Changing Network Settings

Press ◁ and ◆ on the remote control to select the **Network** tab from the menu bar.
Before using the Network functions, please check the following items:

1) Connect the player to a LAN or WLAN first;
2) Please enable NetBIOS of TCP/IP on computer;
3) Please turn off your PC’s firewall;
4) Please enable your PC’s ‘Guest’ account;
5) Please share the folders which you wish to browse on your PC, and make sure that ‘Everyone’ or ‘Guest’ has the right to access.

### Wired LAN Setup

![Wired LAN Setup](image)

Press **▲** and **▼** to select DHCP IP (AUTO) or FIX IP (MANUAL). Press **▼** to confirm.

### DHCP IP (AUTO)

Set the IP address by auto.

![DHCP IP (AUTO)](image)

Press **▼** to confirm.

### FIX IP (MANUAL)

Using Fixed IP, it is required to enter the following: IP address, Subnet Mask, and Default Gateway. For further assistance to the above settings, please contact the network administrator.

Use **Navigational** and **Numeric** buttons to enter IP address.

Press 📷 to confirm.

**Wireless Setup**

Before configuring the WLAN settings, please check the following:

1) Make sure the WLAN USB Adapter is connected to the USB HOST port;

2) Make sure there is a wireless router or an AP (Access Point) on the network, or your PC is equipped with a wireless network adapter/card;

3) Make sure your player is in the effective range of the WLAN.

Select **Modify** if it is your first time to connect to a wireless network.

There appear two connection modes: **Infrastructure (AP)** mode and **Peer to Peer (Ad Hoc)** mode.
Press [ ] to cancel, and [ ] for next step. Press [ ] and [ ] to select items, and [ ] to confirm.

**Infrastructure (AP)**

Infrastructure mode is used to connect computers with wireless network adapters, also known as wireless clients, to an existing wired network with the help from wireless router or access point.

1) **Get SSID Name**

Select Auto to search for an existing SSID (Service Set Identifier).

Note: In the Security list, WEP (Wired Equivalent Privacy) and WPA (Wi-Fi Protected Access) means the network is encrypted, i.e. an encryption key is needed to access the network. NONE means it is an open system network.

2) **Confirm SSID Name**
3) WLAN Security Setting
Select **Open System** if the network is not encrypted. Otherwise, select **Shared Key (WEP)** or **WPA Key** to enter the encryption key.

4) Wireless Address Setup
Select **DHCP IP (AUTO)** to set the IP address automatically. Or select **FIX IP (MANUAL)** to set the IP address manually.

5) Setting List
The Setting List displays the network settings just now you configured.
6) Test Connection
The test will take for a while, please be patient to wait.

If the test is ok, the network information will be displayed.

Peer to Peer (Ad Hoc)
Peer to Peer mode, which is also called Ad Hoc mode or computer-to-computer mode, is used to connect wireless clients directly together, without the need for a wireless router or access point.

1) Ad Hoc Setup
Select Manual if you wish to change the default settings.

Then set the Wireless SSID, Wireless Security, and Host IP for the Ad Hoc connection.
Note: Both the player and your PC need to use the Ad Hoc mode, share a common SSID, and be put into the same IP range.

2) Save and Startup

Select OK to confirm the above settings.

If the test is ok, the network information will be displayed.

6.5 Changing System Settings

Press << and >> on the remote control to select the System tab from the menu.
| **Menu Language** | Select to choose the OSD (On Screen Display) language.  
| Press ← and → to select the language. Press → to confirm. |
| **Text Encoding** | Select to set text encoding.  
| Press ← and → to select from Unicode, Chinese GBK, BIG5, and etc. Press → to confirm. |
| **Time** | Select to set the system time. |

Enter the system menu and press \[\text{and} \] to select each field and the up and down navigation arrows to adjust each setting.

Press \[\text{to confirm}.\]

**HDD Format**

Select to format the HDD.

Press \[\text{and} \] to select HDD Format. Press \[\text{to confirm}.\]
Press `←` and `→` to select OK. Press `OK` to confirm.

Press `↑` and `↓` to adjust the capacity of time shift buffer.
Press `←` and `→` to select NEXT, and `→` to confirm.

Press `←` and `→` to adjust the capacities of recording and multimedia partitions. Press `←` and `→` to select NEXT, and `→` to confirm.

Press `←` and `→` to adjust the capacities of FAT32 and NTFS partitions. Press `←` and `→` to select NEXT, and `→` to confirm.
Press \( \text{ } \) and \( \text{ } \) to select Format. Press \( \text{ } \) to confirm. And the formatting will start, which will take for several minutes, please be patient to wait.

When formatting is completed, press \( \text{ } \) to return to the GUIDE menu.

Connect the player to PC via a USB cable, and copy the ‘sys’ folder from the firmware folder to the first multimedia partition (HDD1, FAT32). In this way, you can gain enhanced font support and the NAS function.

<table>
<thead>
<tr>
<th>Restore Default</th>
<th>Select to restore factory defaults.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>A confirmation message appears. Select OK and press Enter to restore all settings to defaults.</td>
</tr>
</tbody>
</table>

### 6.6 Miscellaneous

Press \( \text{ } \) and \( \text{ } \) on the remote control to select the MISC tab from the menu.
7. Browser Menu

The Browser menu allows you to browse and play music, photo and movie files stored on a HDD, an external USB device, and Network. To enter the menu, select Browser from the Guide menu.

Press and to select the device on which the media is stored. Choose from HDD, USB, NET, and press .

When data on HDD, USB device is connected or connect the system to Network, you can also browse photos, listen to music, and watch movies.

7.1 Browsing All

Use and on the remote control to select the All tab.

All directories and supported contents will be displayed. Press and to select the directory or file you wish to browse, and press to confirm.
7.2 Browsing Music

Use \(<\) and \(>\) on the remote control to select the Music tab.

All directories and supported audio files in current directory will be displayed. Press \(\uparrow\) and \(\downarrow\) to select the file you want to play and press \(\).

Press \(\) and a tools menu appears which enables you to add the current music to the playlists.

7.3 Browsing Photos

Use \(<\) and \(>\) on the remote control to select the Photos tab.
All directories and supported image files in current directory will be displayed. Press \( \uparrow \) and \( \downarrow \) to select the photo you want to view and press \( \rightarrow \). The photo will be displayed full screen.

**Note:**
1. When the photo is displayed in full screen mode, the slide show starts automatically.
2. While listening to music files, you can browse the photos at the same time.

While browsing a photo, you can press \( \leftarrow \) or \( \rightarrow \) to rotate a photo in any angle. Besides rotating a photo, you can press \( \circ \) to zoom in/out that photo. Four zoom levels are available.

### 7.4 Browsing Movies

Use \( \uparrow \) and \( \downarrow \) on the remote control to select the **Movies** tab.

All directories and supported video files in current directory will be displayed. Press \( \uparrow \) and \( \downarrow \) to select the movie you want to view and press \( \rightarrow \). The movie will be played in
full screen mode.
This browsing movies function supports DAT, VOB, IFO, MPG, AVI, and TS file formats.

While browsing a movie in full screen mode, you can press \[ \text{Zoom} \] to zoom in/out the image. Four zoom levels are available.

7.5 Browsing via Network

You can streaming playback the multimedia files shared on the local area network (Ethernet or WLAN).
Before viewing the following, please make sure that you have read 6.5 Changing Network Settings and made the right settings.
When selecting NET in the Browser menu, there are two ways to locate the multimedia files shared on your local network. One way is to browse through workgroup; the other way is to browse through 'My_Shortcuts'.

![Image of Browser Menu]

7.5.1 Browsing through Workgroup
You can choose the workgroup which your PC belongs to from the workgroup list, find your PC name, and press \[ \text{Zoom} \] to confirm.

![Image of Workgroup Selection]

Then select the shared multimedia file that you want to browse.
**Note:**
1. While browsing high definition video files (resolution up to 720p / 1080i / 1080p) via Ethernet or WLAN, the video might be buffering. It is normal due to the limit of network speed or signal strength.
2. Due to different network conditions, sometimes the workgroup might not be accessed or shown in the list. And then you need to use ‘My_Shortcuts’ to browse shared files.

**7.5.2 Browsing through ‘My_Shortcuts’**
You can also set ‘Specific File Server IP’ and access it from ‘My_Shortcuts’ in the menu.

Press and a tools menu appears.

| Network Browser | Select to set Net User ID, Net Password, and Specific File Server IP, which enables to browse files on NET through ‘My_Shortcuts’. |
Select Net User ID and the entry screen will appear.
Use the navigation arrows to select letters and numbers. Select CAPS to toggle between uppercase and lowercase letters. Press left to delete a letter. Press right to insert a space. Press to input each letter or number.

Select Net Password and the entry screen will appear. See above.

Select Specific File Server IP, and use **Navigational** and **Numeric** buttons to enter IP address.

You can also select Detail to set the Label, Domain, and Host Name of the shortcut. Then select OK and press to confirm.
Select the shortcut you added and press \(') to confirm.

Then select the shared multimedia file that you want to browse.

8. Playlist Menu

The Playlist menu allows you to browse and play your favourite music in the playlists. To enter the menu, select **Playlist** from the **Guide** menu. There are a total of 5 playlists.
9. File Copy Menu

Press COPY on the remote control to enter the File Copy menu, which allows you to copy files between HDD, USB devices and Network.

Step 1: Select the source device and destination device.

Press HDD or NET to select device. Press to cancel, and for next step.

Step 2: Select the source files you want to copy.
Press ☐ to select files, ☐ to cancel, and ☐ to next step.

**Step 3: Select the destination folder to store the above files.**

![Diagram showing file copy process with a source folder containing multiple files and a destination folder.]  
Press ☐ and ☐ to select folder. Press ☐ to cancel, and ☐ for next step.

**Step 4: Proceed to copy selected files.**

![Diagram showing file copy process with a confirmation prompt to proceed]  
Press ☐ and ☐ to select OK, press ☐ to confirm. And the copy will start.
10. NAS Function

This player can be used as a NAS (Network-Attached Storage) device. It can be attached to the home network via either Ethernet or WLAN. This feature allows homes to store and retrieve large amounts of data more affordably than ever before.

When the network connection is done correctly and ready for use, type: `\NAS` or `\IP Address` in the Run window (click Run in the start menu) or the address bar of Internet Explorer on your PC (For example, if the IP address of the player is 192.168.0.9, please type: `\192.168.0.9` or `\NAS`), and click OK or press the Enter button on the keyboard.

Then you can view, and edit the files stored on the hard disk installed on the player. In this way, you can also playback and copy files via network between your PC and the player.

Note:
1. Partitions of NTFS file system format on the hard disc drive might be read-only.
2. Please make sure the ‘sys’ directory which contains the SAMBA server is in HDD1, otherwise the NAS function won’t work.
11. Upgrading the Firmware

The firmware is the operating system (OS) installed on the device. Firmware upgrades can bring new features, improvements and bug fixes.

To check whether you have the latest version of firmware:
1. Select MISC in the Setup menu;
2. The firmware version number is displayed behind SW Version;
3. Compare it with the latest firmware released.

Download the latest firmware from our official website.

Step 1: Prepare the USB Pen Drive
You will need a USB Pen Drive for firmware upgrade. Copy the 5 files for upgrade to the root directory of your USB Pen Drive.

Step 2: Connect the USB Pen Drive
Plug the USB Pen Drive into one of the USB HOST ports of the player.

Step 3: Hold the POWER/STANDBY button
Press and hold the POWER/STANDBY button on the front panel, and do not loosen.

Step 4: Connect the power cable
Plug the power cable into the DC IN jack, wait for about 3 seconds or more, and then loosen your finger on the POWER/STANDBY button;

Firmware installation will start in about 30 seconds. The LED indicators on the front panel will be enlightened and flashing during installation. If it is connected to a TV set, a yellow install
page will appear on the TV screen.

Please wait for about 2 minutes, the installation will be completed, the LED indicators will go off, and the player will be powered off automatically. Then you can press the POWER button to turn on the player and enjoy.

**Note:**
Do not turn off the power during installation;
The USB Pen Drive is not allowed to be unplugged during installation.
12. Appendixes

12.1 Specifications

USB SUPPORTED:
- USB HDD
- Other USB Mass Storage Devices
- USB 2.0 Interface

CONTENT FORMATS SUPPORTED:
- DAT/VOB/IFO/MPG/AVI/MPEG-2 TS
- MP3/OGG/WMA
- Compression rate: between 32 kbps and 320 kbps
- JPEG/BMP

VIDEO CODECS SUPPORTED:
- MPEG-1/MPEG-2
- MPEG-4 ASP: XviD

AUDIO CODECS SUPPORTED:
- MP2/MP3 /OGG Vorbis/WMA Standard (DRM, Pro & Advanced Profile not supported)/PCM

SUBTITLE FORMATS SUPPORTED:
- SRT, SMI, SSA, IDX/SUB, SUB

RECORDABLE DEVICES SUPPORTED:
- Built in HDD
- USB HDD

### 12.2 Frequently Asked Questions

**Question 1. My computer does not recognize my player.**

**Answer:**

1. Make sure the player is powered on. If it is off, the computer will not be able to find the player;
2. Make sure the player is connected to computer. (Refer to 1.4.1 for connecting player to...
(3) When using Windows 98SE, install the USB driver first. After installation, restart the computer. Then reconnect the player to the computer. (Refer to 1.4.1 for connecting player to computer);

(4) If you installed the Windows 98SE driver over your Windows® XP, 2000, or ME edition, problems might occur;

(5) It is not recommend using the USB ports in the front of your computer, try to use the USB ports in the rear, because the USB ports in the front are often from non-powered hubs.

Question 2. When I try to disconnect the USB device, I keep on getting “The device ‘Generic volume’ cannot be stopped right now. Try stopping the device again later.” message, what should I do?
Answer:
Close any program that might be accessing data on the player, including Windows® Explorer. If it does not work, close all programs and wait for another 20 seconds, then try the green arrow icon again. If it still does not work, you should shut down the player and disconnect the USB cable.

Question 3. I find new file names and folder names that I never created before or they have strange gibberish names.
Answer:
Most likely, the player’s file allocation table (FAT) has been corrupted. This might be due to the player shutting down (due to low battery power) while reading or writing to your computer by the USB connection. Windows and Macintosh often write extra files to the hard disk such as finder.def or System volume info. These are normal and will not do any harm to the player.

Question 4. I used my player to transfer files back and forth between different computers. Will defragmenting the player hard disk do any harm to it?
Answer:
Defragmenting the player hard disk may be useful after having transferred many files to and from the player. It is never harmful to use the defragment on the player. Make sure no other programs are running while using the Windows® defragment utility. Make sure you have connected the player with the external power adapter during this procedure.

Question 5. My files have disappeared from the player.
Answer:
Make sure that you browse your files via the correct Browser mode which means correct filtered views such as Photos, Music, or Movies.

Question 6. Why do some supported photo formats, cannot be shown in the photo function?
Answer:
In the JPEG format there are different modes. The player doesn’t support all the modes. So you have to change your photo format first as follow:
(1) Use Photoshop to open the photo;
(2) Choose "File" then “save as” from the menu, as the picture on the left hand side shows, select the picture format as JPEG, input the file name and click the “save” icon;
(3) After click on the “save” icon, a new window will appear as the picture on the right hand side shows, select “Baseline (standard)” or “Baseline optimized”;
(4) Click the “OK” icon.

**Question 7. When the player is powered on, why will the TV have a short flashing, blue screen or screensaver?**

**Answer:**
This is normal, when the system initializes, it will setup the corresponding parameters so it can output the correct video signal to the TV, during the initializing time, the TV will receive incorrect signals or the signals will not be stable and will cause the TV screen to flash, some TV’s will treat this as no signal, and will display a blue screen or screensaver.

**Question 8. Why when I switch to Y/Pb/Pr 480P, 576P, 720P, 1080I, does the TV screen display an unwatchable picture?**

**Answer:**
Please check if your TV supports Y/Pb/Pr 480P, 576P, 720P, 1080I output, if your TV does not support, please use the A/V signal display instead, press the TV SYSTEM button on the remote control, then switch the TV’s video input to NTSC or PAL.

**Question 9. Why is there no sound on movie or music playback when using Y/Pb/Pr component output?**

**Answer:**
Y/Pb/Pr output is a video output only, and does not include sound signals, when using Y/Pb/Pr output, please plug the A/V OUT or the S/PDIF jack to output sound.

**Question 10. Why couldn’t the player find the hard disc?**

**Answer:**
Make sure the firmware is installed correctly, and no system partitions on the HDD were
deleted. If hard disc failure occurs, please backup your data and reinstall the firmware.

**Question 11. Some functions like recording, time shift etc. do not work. What should I do?**

**Answer:**
If you find some functions do not work properly on the player, please change system settings to the default (Refer to 6.6 for changing system settings).

**Question 12. I cannot get SSID name, the screen always displays: ‘Can’t get any SSID!!’**

**Answer:**
When the WLAN USB Adapter is connected to the player, it needs some time to get initialized. Please wait for about 1~2 minutes and try again. Then it will work properly.

**Question 13. I configured everything correctly, but still cannot get the wireless network connected.**

**Answer:**
Are you using a firewall such as Norton Internet Security, McAfee Personal Firewall, Zone Alarm, etc. or even the built-in firewall of Windows XP? (Don’t forget that Service Pack 2 for Windows XP automatically upgrades your firewall and turn it on by default)

If you have a firewall, it may need to be configured or have exceptions created to allow you to see and communicate with the player on the network. To test if your firewall is preventing network communication (including PING and access shared folders), try disabling it to see if you can connect. If you can connect with the firewall disabled, you may need to add the player to the ‘Trusted’ list or configure the firewall for local intranet access. Worst-case, disable your firewall long enough to use the player, then enable it again when done.

**Question 14. When I am using the NAS function, I cannot copy files to the player.**

**Answer:**
Please check the file system format of the hard disc drive partitions on the player. NTFS partitions are read-only on the system. Therefore, files cannot be written onto any NTFS partitions via the NAS mode. However, you can copy the files you wish to the NTFS partitions via a USB cable.
