Introduction

Thank you for choosing this device and before using the device, please read this manual carefully. This user manual describes some basic functions of the device.

Important safety measures

Battery:
Please do not make the battery short circuit, which will damage the battery and generate heat that causes fire.

Avoid wet location:
Keep your cell phone away from sources of liquids, such as drinks, wash basins, bathtubs, shower stalls, and so on.

Piror Traffic Safety
Please do not use a cell phone while driving. It is supposed to be used after parking.

Switch off on a plane
A cell phone will interfere with signals. It is illegal and dangerous to use a cell phone on a plane.

Switch off when refueling
Please do not use the cell phone in a gas or petrol station or near explosive and chemical matter.

Switch off in hospitals
Obey all instructions and rules of hospitals. Please switch off your cell phone near medical facilities.

Interference
A cell phone will cause interference when electrical equipment is used.

Accessories and batteries
Use only the specific accessories and batteries for the cell phone

Emergency call
Be sure to open the device and within the service area. Input emergency number and make call.

Show as follows:

![Smart phone main menu](image2)

Click the icon or character on the screen to operate the device.

*Note: You may be requested to input PIN code when entering some function.*
1. Call service

Including P-book, call record, shield wall, group, call setup.

1.1 P-book

P-book saves in two parts: SIM card and phone.

- **Phone**: You can save 500 contacts here, which include name, tel work, tel home, mobile, fax, email, picture, ring info, and remark.

- **SIM card**: Each record can save name and tel work only. The capacity of records depend on SIM card. The sub menu of P-book show as the following picture.

The sub menu of P-book includes add new record, browse, P-book search, show capacity, select storage, P-book manager and own name.

- **Add new record**
  
  Select "New" to add new record. You can choose where to store the record, SIM card or phone. Show as the following picture.

- **Browse**
  
  Click browse to enter the list.

1) Select "SIM card" then you can input name and tel work of the record.

2) Select "Phone" then you can input name, tel work, tel home, mobile, fax, email, picture, ring info, and remark.

Note: Name and tel work is ought to be input. When finished these two items, "book" will turn into "complete". Click "complete" to save the record.

- **Organize P-book**

Select the record and click "option" then you can do as follows:

1) The icon means that the contact are saved in SIM card. You can operate the contact as follows: browse, dial, dial IP NO., send SMS, send MMS, delete, move to phone, copy to phone and save as Vcard file.

Note: The contact, which saved in SIM card, can input name and tel work only. If you want to input more detail, please move the contact from SIM card to phone.

2) The icon means that the contact are saved in SIM card. You can operate the contact as follows: browse, dial, dial IP NO., send SMS, send MMS, delete, move to phone, copy to phone and save as Vcard file.
Browse

Select “browse” from the “phonebook” menu, then you can look for the phone number in the phonebook.
You can input the full name or family name to search the phone number.
Enter the first characters of the name you are searching for, then you can find what you want, if the phonebook doesn’t match it, the device will say the similar.

Show capacity

Examine the capacity of the SIM card and the phonebook in order to make full use of the storage.

Note: The capacity of SIM card depends on SIM card itself.

Select storage

Select “select storage” from the “phonebook” menu, you can choose to save the contact to SIM card or to phone.

Phonebook manage

The main functions are as follows:

<table>
<thead>
<tr>
<th>Option</th>
<th>Introduction</th>
</tr>
</thead>
<tbody>
<tr>
<td>Delete all SIM</td>
<td>Delete all contacts saved in SIM card</td>
</tr>
<tr>
<td>Delete all phones</td>
<td>Delete all contacts saved in phonebook</td>
</tr>
<tr>
<td>Copy SIM to phone</td>
<td>Copy the contacts from SIM card to phonebook</td>
</tr>
<tr>
<td>Copy phone to SIM</td>
<td>Copy the contacts from phonebook to SIM card</td>
</tr>
<tr>
<td>Move SIM to phone</td>
<td>Move the contacts from SIM card to phonebook</td>
</tr>
<tr>
<td>Move phone to SIM</td>
<td>Move the contacts from phonebook to SIM card</td>
</tr>
</tbody>
</table>

Own number

Select “own number” from the “phonebook” menu, you can save your own number in the cell phone. You can save two “own numbers”: line 1 and line 2.

Note: You can store your phone numbers with descriptive names. Changes made with this option do not affect the actual subscriber number of your SIM card.

1.2 Call record

This device can record not only missed calls, received calls and dialed calls but also the last call timer and all timer. Every record contains phone number or name (if the number is saved before). You can check the details of every record. If the storage is over stored, the pioneer record will be deleted automatically.

The picture below is the menu tree of call record:

Dialled calls

You can check the number list of 100 latest dialed numbers. Enter “dialed calls”, you can see the time and date of the dialed number.

- Dial: dial this number
- IP-Dial: use IP number to dial this phone number
- Delete: delete the record
- Save: save the number to phonebook
- Send message: send message to this number

Received calls

You can check the number list of 100 latest received numbers. Enter “received calls”, you can see the time and date of the received number.

Miss calls

You can check the number list of 100 latest missed numbers. Enter “missed calls”, you can see
the time and date of the missed number.

- **Delete records**
  You can clean dialed calls, received calls and missed calls.

- **Call timer**
  Call timer is to monitor the approximate duration of your incoming and outgoing calls. And you can clear timers.

- **Call charge**
  If your service is supported, you can check your charge through this function.

1.3 **Shield wall**
You can set black list to shield the call and message from the black list.

1.4 **Group**
Enter “group” from “P-book” menu, then you can manage your contact by group. You can operate the device as follows:

- **New**
Enter “group” and select “< New >”. Input the name of group and save the group. The maximum number that you can create is 9.

- **Managing group**
Select the group and you can do as follows:

<table>
<thead>
<tr>
<th>Option</th>
<th>Introduction</th>
</tr>
</thead>
<tbody>
<tr>
<td>Delete</td>
<td>Delete the group</td>
</tr>
<tr>
<td>Change Name</td>
<td>Edit the name of the group</td>
</tr>
<tr>
<td>Employees</td>
<td>Add or delete the member of the group. You can add no more than 30 members.</td>
</tr>
<tr>
<td>Send SMS</td>
<td>Send SMS by group</td>
</tr>
</tbody>
</table>

**Note:** The VIP group is used to save the number of important people. This group cannot be deleted and the name of this group cannot be changed.

1.5 **Call setup**
This menu includes IP setup, call waiting, call barring, redial, VIP calls only, set volume, set answer key.

- **IP setup**
  Set up the IP number. Once make a long-distance call, the number will appear automatically.

- **Call waiting**
  Set up call waiting or not.

- **Call forward**
  If you use call forward, the function will divert the phone call to the voice mail even your device has power off. (If you want to use this function, please connect your service provider.)
  You can follow the steps below:
  1. Select “call forward” from “call setup” menu.
  2. You can select “conditional”, “conditional”, “cancel all”.
  3. If you select “conditional”, the call will be diverted to another phone you set. You can operate the phone as follows:
     - Delete all call forward
     - To voice mailbox: divert your call to voice mailbox
     - To phone number: divert your call to another phone number, you can search the phone number from P-book.
     - Query status: query the status of call forward
  4. If you select “conditional”, the call will be diverted on some special condition.
     - When busy: when your phone is busy
     - When no answer: when there is no one to answer the call
     - When not reachable: when you are not reachable

- **Call barring**
  This function restricted for dialing. Select “call barring” from the “call setup”.
  You can follow the steps below:
  - **Outgoing bar**
    Restrict dialed call and you can set as “international call”, “international call to home”, “all calls” or “off”.
  - **Incoming bar**
    Restrict received call and you can set as “when roaming”, “all calls” or “off”.
  - **Cancel all**
    Cancel all restriction

When the restriction has been set, you shall input code every time you dialed the number.
2. Messages

Messages include SMS, MMS, Email, Voice mail and Cell broadcast.

2.1 SMS

Select "SMS" from the Messages menu, you can see the menu as follows:

- Edit new SMS
- Inbox
- Outbox
- Draftbox
- Template list
- Show SMS Capacity
- Delete SMS
- Messages setup

Select "Edit new SMS" from the SMS menu to edit messages.

If you click "inside key" when editing message, you can "add phonebook" or "add template". If you select "add phonebook", you can add the number from phonebook. If you select "add template", you can add message from template list.

When finish editing the message, click "select" to input phone number. You can "input new", "search name" and "muti send" the message.
Select "input new" and "search name", you can choose "tend", "save", "tend and save", "multi send", "edit current phone No" and "delete current phone No".
Select "multi send", you can input new number or search from phonebook and group.

**Inbox**

When you receive new message, you can see "[ " on the top of the screen. Received message will be saved in inbox automatically.

Select "inbox", the screen will display the messages in the inbox. "[ " means the message has been read.
"[ " means the message has not been read.

You can read the message and edit the message as follows:

- Delete: delete this message
- Reply: reply the message to the sender
- Call: call the sender
- Forward: transmit the message to others
- Copy: copy the message between SIM card and phone
- Move: move the message between SIM card and phone

Note: The cell phone can store 100 messages, and different SIM card has different capacity for saving the number of messages. If the inbox is full of message, you cannot receive new message until the old message has been deleted.

**Outbox**

Sent and saved messages are stored in outbox. Select one message and you can do as follows:

- Send: send the message to others and you can edit the message before send it
- Save: save the message to draft box
- Delete: delete this message
- Send and save: send the message and save it to draft box
- Edit: edit the message
- Send immediately: send the message

**SMS Draft box**

Messages that have not been sent are stored here. Select one message and you can do as follows:

- Send: send the message to others and you can edit the message before send it
- Save: save the message to draft box
- Delete: delete this message
- Edit: edit the message

**Templates list**

The cell phone has preset 10 messages. Each template contains no more than 50 characters. The templates list cannot be delete or add.

**Show SMS Capacity**

Show the capacity of SIM card and phone.

**Delete SMS**

You can clean inbox, clean outbox and clean draft box.

**Messages setup**

<table>
<thead>
<tr>
<th>Option</th>
<th>Introduction</th>
</tr>
</thead>
<tbody>
<tr>
<td>SMS center</td>
<td>Before sending a message, you shall enter the number of message center. The number is provided by your service provider.</td>
</tr>
<tr>
<td>Expiry period</td>
<td>Select how long the message center reserves your message if the first attempt fails (network service). If the message cannot be sent within the validity period, the message is deleted from the message center.</td>
</tr>
<tr>
<td>Delivery Report</td>
