Safety Precautions

- Don't attempt to modify or dismantle this Digital camcorder in any method, so as to avoid any damage to the camcorder or electric shock.
- When the camcorder is not to be used for a long time, please take out the battery, so as to avoid energy loss or any damage to the camcorder.
- Don't put or store the camcorder in circumstances with high temperature, so as to avoid any damage to the camcorder.
- For the consideration of safety, please keep the product and its accessories away from kids or animals, so as to avoid any accident.
- In case any liquid or foreign substance enters the camcorder, please stop using it temporarily, and shut it down and disconnect the power, and then resort to assistance from your local distributor.
- Don't operate the camcorder with wet hands, so as to avoid electric shock.
- Don't use the flash lamp before people or animals at a short distance less than 1cm, since too close flashing may cause sight hurt to the objects being shot.
- It is normal that the surface temperature of the camcorder may rise after being used for a period of time.
- Don't touch the lens during usage.

★ Transmit data to PC

Open "My Computer" on the desktop. There is a removable disk icon: if there is no SD/MMC card, the internal memory is the removable disk; if there is a SD/MMC card, it is the removable disk. In the memory mode, you can use Windows interface to access data in the recorder, including cut/copy/delete files in the recorder.

★ Requisite software installation and usage

You can use PC to use and operate the memory offered by the camcorder as well as its web cam function. Before the use, please install the software driver.

◆ Install driver

To use the video communication function, please install the driver for your current operating system. Click the corresponding driver in the installation CD.

Note: Before installing the driver to the PC, do not connect the camcorder to the USB port of the PC, so as to avoid driver installation error;

◆ Media Converter

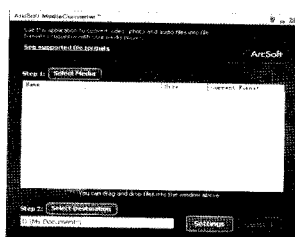

You can use your PC to convert movies, audio files and pictures and then download to your DV recorder. Before that, please install the media converter tool.

◆ Software installation

Click the "Install Media Converter" button in the software installation interface. After the installation, there will be a shortcut icon on the desktop. Directly click the icon to run the software.

★ Requisite software installation and usage

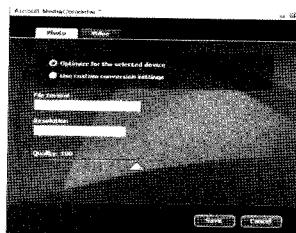

- The media converter runs as follows:

1. Click the "Select media file" button to open the file selection dialogue box. Select your desired video file to convert and confirm;
2. Click the "Select target file" button to open the file selection dialogue box. Select the folder to save the converted video file and confirm.
3. Click the "Convert" button to start the conversion.

◆ Senior setting:

- Click the "Setting" button to pop up the above window.:

Click "Video", "Audio", or "Photo" button to toggle video/audio/photo setting windows.

★ Troubleshooting

- ◆ I cannot take a photo or video or record voice?
Change the resolution, image quality or frame rate setting, or change another storage card with sufficient free space; check whether the storage card is locked; delete some files.
- ◆ The indicator is not on when the camcorder is being charged?
Reload the battery according to correct polarity; make sure that the AC power works properly; re-plug the power adapter.
- ◆ The flash lamp cannot flash?
In shooting pictures, if the battery is low, the flash lamp will not work.
- ◆ How to take good photos?
Please make use of the tripod. In dark places, please use the flash lamp or lights to compensate light.
- ◆ The picture in the viewfinder with dirty mark?
Please clean out the lens.
- ◆ Camcorder shows no memory space for record vide?
When the memory space less than 4MB, the camcorder will show memory space is full and can not record video.
