where you drive. Always obey traffic rules. Also, if using your phone while driving, give full attention to driving. Driving safely is your first responsibility. Use hands-free operation, if available. Pull off the road and park before making or answering a call if driving conditions require.

- Follow any restrictions. Do not use the phone where blasting is in progress.
- Use only in the normal position as explained in the product documentation. Special positions where kids could not access.
- Use only approved enhancements and batteries. Do not contact incompatible products.
- Please do not use your mobile phone near low signal or gondola electronic equipment. Radio wave interference may cause the malfunctioning of such electronic equipment or other problems. Special Tips must be paid near the following equipment: hearing aids, pacemakers and other electronic medical equipment, smoke detectors, automatic doors and other automatic control installations. To find out the effect of mobile phones on a pacemaker or other piece of electronic medical equipment please contact the manufacturers or local sales agents of the equipment.
- To avoid the mobile phone malfunctioning, or catching fire, please do not violently impact, jet or throw your mobile phone.
- Please do not place the batteries, mobile phone or charger in a microwave oven or high-pressure equipment. Otherwise, it could lead to unexpected accidents such as damage to the circuitry or fire.
- Please do not use your mobile phone near flammable or volatile gases, otherwise it could cause malfunctioning or fire.
- Please do not subject your mobile phone to high temperatures, high humidity or dusty places, otherwise it may lead to the malfunction of your mobile phone.
- To avoid your mobile phone falling and malfunctioning or being damaged, please do not place your phone on uneven or slippery surfaces.

1.3.2 Phone Safety

- Do not disassemble or modify the mobile phone, as it will lead to damage to the phone such as battery leakage or circuit failure.
- Please do not subject the LCD to impact or use the screen to strike things, as this will damage the LCD board and cause leakage of the liquid crystal. There is a risk of blindness if the liquid crystal substance gets into the eyes. If this occurs rinse eyes immediately with clear water (under no circumstances rub your eyes) and go immediately to a hospital for treatment.
- Under any circumstances using the mobile phone in certain model cars may negatively effect the internal electronic equipment. In order to ensure your safety under such circumstances please do not use the mobile phone.
- If your car is equipped with an airbag, do not place your phone on top of it or within the contact area of the airbag in order to avoid seriously harming the driver or passenger when the airbag inflates.

- Please do not use needles, pens, tips, or other sharp objects on the keypad as this may damage the mobile phone or cause it to malfunction.
- Avoid letting the phone come into close contact with magnetic objects such as magnetic cards as the radiation waves of the mobile phones may cause the information stored on floppy disks, pay cards and credit cards.
- Please keep small metal objects, such as thumbtacks, far away from the receiver.
- When the receiver is in use it becomes magnetic and may attract these small metal objects and thus there may cause injury or damage the mobile phone.
- Avoid having the mobile phone come into contact with water or other liquids. If liquids enter the phone, this could cause a short circuit, battery leak or other malfunctions.
- As much as possible, please use the mobile phone in a place away from landline telephones, television, radio, and automated office equipment in order to avoid affecting both the equipment and the mobile phone.

1.3.3 Battery Safety

- Do not disassemble or modify the battery, as this will cause the battery to leak, overheat, crack and catch fire.
- Do not dispose of old batteries with everyday domestic garbage. Please dispose of old batteries at the directed places with specific rules for their disposal.
- Please do not throw batteries into a fire, as this will cause the battery to leak, overheat, crack and catch fire.
- Please do not put the battery near heat or extremely cold objects or dress to short-circuit the battery. Also, do not put the battery near necklaces or other metal objects, as this will cause the battery to leak, overheat, crack and catch fire.
- Please do not touch the contact points of the battery, as this will cause the battery to leak, overheat, crack and catch fire.
- If the liquid in the batteries gets into the eyes, there is a risk of blindness. If this occurs do not rub the eyes, but immediately rinse eyes with clear water and go to the hospital for treatment.
- Please do not use or place the batteries near high temperature places such as near a fire or heating vessel, as this will cause the battery to leak, overheat, crack and catch fire.
- If the battery overheats, changes colour, or becomes distorted during use, charging, or storage, please stop using and replace it with a new battery.
- If the liquid from the battery comes in contact with skin or clothing this could cause burning of the skin. Immediately use clear water to rinse and seek medical tips if necessary.
- If the battery leaks or gives off a strange odour, please remove the battery from
the vicinity of the open fire to avoid a fire or explosion.

Please do not let the battery become wet as this will cause the battery to overheat, smoke and explode.

Please do not use or place batteries in places of high temperature such as in direct sunlight, as this will cause the battery to look and remain, lower performance, and shorten the battery’s life.

Please do not continuously charge for more than 24 hours.

1.3.4 Charger Safety

- Please use AC 220 volts. The use of any other voltage will cause battery leakage, fire and cause damage to the mobile phone and charger.
- It is forbidden to short-circuit the charger, as this will cause electrical shock, smoking and damage to the charger.
- Please do not use the charger if the power cord is damaged, as this will cause fire or electrical shock.
- Please immediately clean any dust gathered on the electrical outlet.
- Please do not place vessels with water near the charger in order to avoid water splashing onto the charger and causing an electrical shortage, leakage or other malfunctions.

If the charger comes in contact with water or other liquid, the power must immediately be switched off to avoid an electrical short or shock, fire or malfunction of the charger.

Please do not disassemble or modify the charger, as it will lead to bodily burns, electrical shock, fire or damage to the charger.

Please do not use the charger in the bathroom or other excessively moist areas, as this will cause electrical shock, fire or damage to the charger.

Please do not touch the charger with wet hands, as this will cause electrical shock or fire.

Do not modify or place heavy objects on the power cord, as this will cause electrical shock or fire.

Before cleaning or carrying out maintenance please unplug the charger from the electrical outlet.

When unplugging chargers, do not pull on the cord, but rather pull on the body of the charger, as pulling on the cord will damage the cord and lead to electrical shock or fire.

1.3.5 Cleaning and Maintenance

- The mobile phone, battery and charger are not water resistant. Please do not use them in the bathroom or other excessively moist areas and likewise avoid allowing them to get wet in the rain.
- Use a soft, dry cloth to clean the mobile phone, battery and charger.
- Please do not use alcohol, thinner, benzene or other solvents to wipe the mobile phone.

A dirty outlet will cause poor electrical contact, loss of power and even inability to recharge. Please clean regularly.

1.3.6 General Matters

Phone:

- Please use the mobile phone in the environment with a temperature between 5°C – 40°C, and a humidity between 35% – 65%.
- As much as possible, please use the mobile phone in a place away from baseline telephones, televisions, radios, and automated office equipment in order to avoid affecting both the equipment and the mobile phone.

Battery:

- Please place the battery in a cool, shady and well-ventilated place out of direct sunlight.
- The life of all mobile phone batteries is limited. The usable time of batteries decreases with frequent charging. When charging becomes ineffective this means that the battery is at the end of its life and the battery should be replaced with a new one of the designated type.
- Do not dispose of old batteries with everyday domestic garbage. Please dispose of old batteries at the directed place with specific rules for their disposal.

Charger:

- Please, do not charge in the following places, in sunlight, on the outside temperature, less than 5°C or higher than 40°C, A moist or humid place, dirty place or places with excessive vibration (this will cause malfunctioning), near televisions, radios, electronic products.

2.2. Install of SIM card, T-flash card

2.2.1. SIM card

Before using your mobile phone you must insert a SIM card into the phone. The SIM card is your key to entering the digital GSM/GPRS network. The SIM card is provided by network provider.

The information recorded on the metal area of the SIM card is all the data related to establishing a connection with the network, together with the names and numbers in your phone book and messages. Your SIM card can be removed from your mobile phone and inserted in any other GSM/GPRS mobile phone to be read (a new mobile phone will automatically read the SIM card).

To prevent losing or damaging the data stored on the card, you should avoid touching the metal area on the card and keep the SIM card in a place far away from electricity or magnets. Once the SIM card is damaged, you will be unable to enter the GSM/GPRS network.

Warning: Before removing the SIM card you must turn off the mobile phone. Do not insert or remove the SIM card while the phone is connected to an external power source, as the SIM card could be damaged.

2.2.2. Install and Remove the SIM

The SIM card is temporarily located in a plastic card. Before inserting into the phone, you must carefully remove it.

- Turn off the phone; remove the battery and unplug other external power sources.
- Insert the SIM card into the SIM slot as shown in the following picture.
- When you need to remove the SIM card, remove the SIM card as shown in the following picture.

Note: The above pictures are taken from real mobile phone.
2.3.1. T-flash Card

Remove the battery, while the T-flash card metal surface downward, align the T flash card with the T card socket and insert it. If you want to remove the T flash card, please move the socket to the open position, and take them out.

Tip: If you have some problem with the T flash card, please check whether the T flash card is inserted properly or not and whether there is a good connection between the T card and the socket or not.

Note: The above pictures are taken from real mobile phone.

2.3.2. Battery Charging

Plug the charger connector into the side of the phone.

Plug the charger into the electrical outlet. At this time the charge level icon will repeatedly flash at the top right corner of the mobile phone's screen. When the battery level icon indicates that the battery is full and does not flash anymore, this means that the battery is fully charged. When charging is complete, unplug the charger connector from the electrical outlet and the mobile phone.

If the mobile phone automatically shuts down, or indicates that the "Battery is low," you should immediately charge the battery. If the battery has not been entirely used up before charging, the mobile phone will automatically decrease the recharging period.

Tip: Please use the appointed charger to make sure the handset can work properly.

2.4. Security Code

- PIN code
  - PIN (Personal Identification Number) code is to avoid illegal usage of your SIM card.
  - If you do not have a, please contact your network provider. If you successfully enter your PIN number three times incorrectly, your SIM card will be locked and your phone will ask for PUK number. You need to enter the PUK number to unlock the SIM card. The PIN number and PUK number may have been provided to you together with the SIM card by your service provider. If you do not have it, please contact your network provider.

- PIN2 code
  - To On/Off the some function (e.g. Call counter), you need to eat the PIN2 number.
  - If you do not have it, please contact your network provider. If you successfully enter your PIN2 number three times incorrectly, this function will be unable to use, and you need PUK2 number to unlock. For details, please contact your network provider.
When you want to change the locked PIN code, you need to input the PUK code.

PUK code may have been provided to you together with the SIM card. If you do not have it, please contact your network provider. If you successfully enter your PUK number ten times incorrectly, your SIM card will be useless. Please contact your network provider for new SIM card. You can not change the PUK code. If you lost the code, please contact your network provider.

- **PUK2 code**
  When you want to change the locked PIN code, you need to input the PUK2 code.
  If you successfully enter your PUK2 number ten times incorrectly, you will not use the relative functions. Please contact your network provider for new SIM card. You can not change the PUK code. If you lost the code, please contact your network provider.

### Quick Start

#### 3.1 Feature function

Your mobile phone has various rich practical convenient functions besides basic voice calls.

**Phone Book:**
- To search for a desired phonebook entry quickly by name;
- To add up to 500 phonebook entries to mobile phone. Every local phonebook entry can include three telephone numbers; To save a phone book entry to SIM card or mobile phone freely;
- To edit, send a short message to some telephone number of the phonebook entry, copy the phone book entry between SIM card and mobile phone, set one key dial-up, blacklist and giving;
- To set the personalized ring for each group and group filter.

**Messaging:**
- To save up to 10 SMS on the device;
- To start, forward, delete, edit, reply the EMS and use template message;
- The max size of one EMS is 10KB. The MMS contains multimedia contents (including images, video, sound and text). You can convert the MMS and check the messages status in the SIM card and handset. You can also select where you prefer to save those messages.

**Call History:**
- Your mobile support the following functions about call history are available;
- To save all information about your calls;
- To dial the number in call log;
- To save the number in call history to phone book or add to blacklist;
- To delete one record and delete all records about call;
- To save automatically and check GPRS account;
- To save automatically and check GPRS account.

### Setting

- **Setting:** You may make the following personalized settings according to your usage occasion. Phone settings, Call settings, Network settings, Security settings and so on. In every menu you can make settings that configure your usage preferences for your mobile phone, for example date and time, auto outoff, speed dial, call barring, phone lock and so on.
- **Multimedia:** Your phone supports these functions such as: Camera, Video recorder, Video player, Audio player, ebook, sound recorder and so on.
- **File manager:** To manage the contents of the folders.
- **Fun&Games:** Your phone provides various kinds of game for entertainment.
- **User Profile:** Your mobile phone provides many different profiles for you to set your mobile phone’s ring tone, according to situation and environment.
- **Organiser:** The mobile phone supports themes, Calendar, To do list, World clock, Stopwatch.
- **Wap Service:** Your mobile phone supports Wireless Application Protocol (WAP) service. You can access many different WAP services.
- **Extract:** The mobile phone supports Calculator, Blue tooth, Units Converter, Currency Converter and so on.
- **Shortcut:** You can set different shortcuts for some relative key.
- **Input method:** Your phone provides various input methods for you to choose from like English, Number, Symbols, Chinese for your convenience.

### Calling a Call

- During a call, press the left soft key “Options” to enter the call menu. In the call menu you can perform the following operations: pause, end, call, phonebook, SMS and so on.
- **Reject a call:** To reject an incoming call, press the hang up key.
- **Answer a Call:**
  - When you have an incoming call, the phone will give corresponding information like: ring, vibrate, and so on.
  - If the network supports, the handset will show the name or number of the caller. And then you can pick up the call by pressing the dial key or click the “Answer” button in the screen.
- **Ending a Call:**
  - During a call, press the hang up key to end a call.

### Emergency Calls

- Without a SIM card, you can also transmit emergency calls. Different network operator have different number, please ask your network operator for the detail.

### Calling Fixed Line Extensions

- Some fixed phone extensions cannot be called directly. You must first go through the switchboard before you can dial the extension. When you enter the telephone number,
you may add the pause code "#" between the switchboard number and the extension number. This phone will automatically connect you with the extension. The "#" is entered by holding down the # Key at this time the screen will display the letter ("#")

You can make a fixed line extensions call by pressing the keys in this order: Area code, Switchboard number, Extension number and Dial key.

3.8 Call History
Your mobile phone can store records of the most recently missed, received, refused and dialled calls.
Tips: The incoming calls form number in the blacklist will be saved in the refused call.

3.9 Call divert
In call diversion, the network service permits you to divert the calls, under certain preset situations, certain incoming calls to a telephone number designated by you. You can set and cancel the incoming call diversion function of your mobile phone. This service requires network support. Please contact your network provider to activate this service.

3.10 Call waiting
If call waiting is activated, you can answer the second call during the first call.

3.11 Call barring
Enter the "Call Barring" submenu to set any of the following call barring groups to increase the security of your phone from unauthorised usage. (Outgoing Calls, Incoming calls, incoming calls when roaming, outgoing calls when roaming) Some network providers may not be able to provide Network Call Barring service. For details, please contact your network provider.

3.12 Power off
On the standby mode, hold down the "hang up" key as power off your phone.

4. Function Menu
4.1 Structure of the Function Menu
The function menu has the following default structure:

1-1 Phone book
1-1-1 Quick Search
1-1-2 Search entry
1-1-3 Add New Entry
1-1-4 Copy All
1-1-5 Delete

1-9-3 Alarm
4.1 SMS

Select the "Message" menu to enter the SMS menu. This phone is equipped with short text messaging and commonly known as SMS. Messaging is a Network Support feature and may be billed. Contact your service provider for more details on billing.

4.2 SMS Center

4.2.1 SMS

Select "Message" menu to enter the SMS menu.

The new incoming messages including the SMS and MMS are saved in the "Inbox" folder. Enter the "Inbox" sub-menu. Your mobile phone will display a list of the messages in the "Inbox". Press the Navigation key to scroll to the message you wish to read. By pressing the "Options", you can carry out the following operations on the current message:

- Reply: To reply to the sender.
- Delete: To delete the viewed message.
- Forward: To forward the current message to another person. Copy to phone to save the current SMS from SIM card into mobile phone. Otherwise this option won't appear.
- Copy to SIM: To save the current SMS from mobile phone into SIM card. Otherwise this option won't appear.
- Move to phone: To move the message to the SIM Card from handset.
- Move to SIM: To move the message to the handset from SIM Card.
- Chat: You can use message to chat with the others by setting up a separately chatting room.
- Copy all: Copy the messages from SIM Card or handset to another.
- Move all: Move the messages from SIM Card or handset to another.
- Use number: To extract the numbers in content of MMS and save them to phonebook or dial.
- Use link: Make use of the link from message.

Outbox:

Enter the "Outbox" sub-menu. Press "OK" to read the message. By pressing "Options", you can carry out the following operations on the current message:

- Send: To send the current message.
- Edit: To edit the current message.
- Delete: To delete the current message.
- Delete all: To delete all of the message in the outbox.
- Store to phone: To save the current SMS from SIM card into mobile phone. Otherwise this option won't appear.
