1. Guidelines for Safe and Efficient Use

Please read this information before using your mobile phone. These instructions are intended for your safety. Please follow these guidelines.

- Do not use your phone in an area where a potentially explosive atmosphere exists such as chemical plant, gas station.
- Keep out of children’s reach.
- Use earphone to make or answer a call during driving for an emergency. Otherwise please pull off the road and park before making or answering a call if driving conditions so require.
- Do not use your phone on plane. Please turn off Auto Power before boarding.
- Mobile phones may affect the operation of cardiac pacemakers, hearing aid and other medical electronic equipments. Care shall be taken.
- The warranty covers only original components and parts.
- Do not attempt to disassemble or modify your phone. Please contact designated service station in case of phone failure.
- Do not charge your phone without battery mounted.
- Charge your phone in an area where ventilation and heat-emission is excellent and where is far away from combustible and explosible material.
- Do not make your phone close to magnetic material such as magnetic disk and credit card to avoid...
N70 user guide

demagnetization.

- Do not expose your phone to liquid. In case of exposure to liquid, disassemble the battery and contact our designated service station.
- Do not use your phone in too high or too low temperature; do not expose your phone to extreme sunshine and high humidity.
- Do not clean your phone with liquid or cloth soaked with detergent.
- Please abide by corresponding rules and laws when you take a picture or record with your phone.
- Do not drop, throw or strike your phone to keep shell and components well.

**Warning**: The company shall not be responsible for phone failure caused by not abiding by the above guidelines or improper use.

In case of discrepancy in this manual and your phone, please refer to your phone.
The company shall preserve the right to modify this manual at any time without notification.

About your device

The wireless device described in this guide is approved for use on the (E) GSM 900, 1800, 1900 networks. Contact your service provider for more information about networks.

When using the features in this device, obey all laws and respect local customs, privacy and legitimate rights of others, including copyrights.

Copyright protections may prevent some images, music (including ringing tones), and other content from being copied, modified, transferred, or forwarded.

Your device may have preinstalled bookmarks and links for third-party internet sites. You may also access other third party sites through your device. Third-party sites are not affiliated with Nokia, and Nokia does not endorse or assume liability for them. If you choose to access such sites, you should take precautions for security or content.

To use any features in this device, other than the alarm clock, the device must be switched on. Do not switch the device on when wireless device use may cause interference or danger.

Please make a copy for all the information stored in the phone.

Please read the user menu to get detailed safety instruction before you are connecting with other device, don’t connect with incompatible devices.
Networks

To use the phone you must have service from a wireless service provider. Many of the features require special network features. These features are not available on all networks; other networks may require that you make specific arrangements with your service provider before you can use the network services. Your service provider can give you instructions and explain what charges will apply.

Some networks may have limitations that affect how you can use network services. For instance, some networks may not support all language-dependent characters and services.

Your service provider may have requested that certain features be disabled or not activated in your device. If so, these features will not appear on your device menu. Your device may also have a special configuration such as changes in menu names, menu order, and icons. Contact your service provider for more information.

This device supports WAP 2.0 protocols (HTTP and SSL) that run on TCP/IP protocols. Some features of this device, such as MMS, browsing, and e-mail require network support for these technologies.

10 Functional of the N70 please make a reference to Product
Assemble SIM card

When you register as a subscriber with a network operator, you get a SIM (Subscriber Identity Module) card.

With SIM card you can use all functions of the phone. The SIM card keeps parameters used for communications and your personal data including PIN (Personal Identity Number), phonebook, SMS and other system service.

Warning: Do not bend or scratch SIM card; do not expose SIM card to static electricity, dust or water; please contact operator for help in case of SIM lost.

Turn off your phone before inserting SIM card.

Please assemble SIM card as illustrated in pictures below:

Warning: SIM is tiny; please keep out of children's reach since small children may swallow them!

Assemble battery

Use only original batteries and fittings intended for use with your phone. Suggest placing your battery in protection box when it is not used. Please assemble battery as illustrated in pictures below. A new battery may achieve its best performance after continuous full discharge for several times.

Charge your battery in time since over-discharge will damage your battery.

When battery is charged full, cut down power supply first, and then remove the charger. Connect the charger as illustrated in picture below.

Gradual increase of battery bar appears on the screen when charging, and static full battery icon appears after the battery is fully charged.

It is normal that battery heats during charging.

11 Functional of the N70 please make a reference to Product
Battery usages

Battery performance may be affected by many factors such as wireless network configuration, signal strength, operating temperature; functions or settings, phone components, voice and data transmissions or other application modes.

To enable best battery performance, please abide by following rules:
- A new battery or one that has not been used for a long time shall be fully charged;
- The battery should be charged in temperature close to room temperature;
- It’s normal for the battery that has been used for long time to take longer time to be charged full. When the talk-time or standby time is noticeably shorter, it’s time to replace your battery.

We recommend that you use only batteries approved by our company. Poor quality components will be harmful to your phone and dangerous!
- When the battery is empty or has not been used for a long time, it may take some time before the battery icon appears on the screen after being connected to charger.

Note: take care of environment and your safety and do not dispose randomly!
Warning: any short circuit may lead to explosion, fire or personal injury!

Switch on and off the phone

Don’t switch on the phone in some forbidden area.

You can switch on and off the phone by pressing the power button as showed in the picture.
You can lock the screen by touch the button lightly.

If the phone request for input the PIN, please input the right PIN (It may displayed as **** after input), then choose the “OK”.

When the first time you switch on the phone and it is on the standby mode, it would request you whether get the network service from the ISP. Please affirm or refuse.

**Volume turnner**

You can set the volume by the side button while you are talking, listening the music or other multimedia. And this button also control the volume of ring tone, alarm and other voice.

**Antenna**

There is a internal antenna in the phone. Don’t touch the antenna area when it transmit or receive the signal if necessary. It could infect the talking and may cause the phone working under more power request state by touching the antenna.

**USB**

[Functional of the N70 please make a reference to Product...](#)
While the phone is turned off, it could work as a flash memory. When the phone is connected with the computer via the data cable, the computer will display a removable disk. Choose any one of the disk, then you can exchange the data. At the same time connect with computer, the USB is charging the phone.

Swing for shift the music

You can shift the music by swinging the phone while the audio player interface. Clockwise swing will shift to last song, anticlockwise swing will shift to next song.
