Fast Manual Instructions for Standard DVR

1 Statement

Thanks for purchasing from us. Please feel free to contact our service whenever you need help. This manual is applicable for Standard DVR series (8ch), which also works for other channels.

Only a few instructions for product operations are included, for more information, please read the CD or scan the two-dimension code at first page.

Any enhancement in product features shall be added into the manual consistently without further notice.

2 Appearance & interface Instructions

2.1 Front-end panel

3 Boot up/shut down & User login

3.1 HDD installation (Skip this if you don’t need storage); Install the HDD (Skip this if you don’t need storage);

3.2 Boot up:

Connect to power, the indicator turns on, DVR boots up.

Note: 1. Use matched adapter to avoid abnormal situation or damage.

2. Shut down power switch (some might have power switches)

3.3 Shut down

To shut down the device, there are soft-off and hard-off.

soft-Off: Go to<MainMenu>->Logout->Shutdown;

hard-off: Plug the power on the rear panel.

Note: 1. Power recovery. When DVR is shut down abnormally, reboot it, all recordings will be saved automatically and restore to the previous status.

2. Replace the HDD: Shut down the power before replacing.

3.4 System Login

When DVR boots up, the user must login and the system provides the corresponding functions with the user name view. There are two user settings. The name are admin, default. Admin is default with no password.

Password protection: If the password is continuously wrong three times, the alarm will start. If the password is continuous wrong five times, the account will be locked. Through rebooting or wait half an hour, the account will be unlocked automatically.

4 Network settings

Go to [Main Menu] > [System] > [Network], as follows:

[IP address]: default is 192.168.1.10;

[Subnet Mask]: default is 255.255.255.0;

[Gateway]: default is 192.168.1.1.

Note: IP address of the speed dome must share the same network segment with the router and conform to its IP instead of conflicting with other IP to ensure the device access to network. Go to [main menu] > [system] > [network], select DHCP Enable (Router should enable DHCP).

5 Record settings

DVR must contain HDD, as follows:

5.1 HDD management

After installing HDD, boot up the DVR, go to<main menu>-><advanced>-><Storage> to format the HDD. Then set the HDD as read-write.

Note: At least one read-write disk is needed for normal recording.

5.2 Video settings

Go to<main menu>-><record>-><Record Conf>.

6 Playback

There are two ways for you to play the video files in the HDD

1. In the right shortcut menu

2. <Main Menu> -> <Record> -> <Playback>

Note: The HDD which saves the video files must be set as read-write or read-only state.
**Public Network Access (Cloud Operation)**

Cloud technology realizes one step on the Internet, which greatly facilitates the customers in public network monitoring. For first use, please start here. If not, just skip.

9.1 PC access

1. Enter http://xmeye.net to login.

9.2 Mobile Access

Network environment: WIFI, 3G
Mobile system: Android, Apple
Software Name: VmEyeCloud
Software Download: Google Market, app store

**Channel Management**

When connected to the network, login DVR to start remote monitoring via IE broswer.

8.1 DVR connection

Open IE browser, enter IP address, take 192.168.1.10 as an example, input http://192.168.1.10 to connect.

8.2 DVR login

Enter user name and password, (default user name is admin, no password). Change the administrator password timely after login, as follows:

Note: Plug-ins need to be installed if you login via IE browser, IE is default to intercept plug-in. Please set IE security level. Go to <internet options> -> <security> -> <Customized Level> -> <ActiveX >, enable them all. Or go to our official website to download and install plug-ins (http://www.xmeye.net); Or install IE plug-in _V1.1.0.78.exe via CD.

8.3 Mobile Access

Network environment: WIFI, 3G
Mobile system: Android, Apple
Software Name: VmEyeCloud
Software Download: Google Market, app store

Note: When the device can access to the public network, you can realize public network monitoring via VmEyeSuper.
