How to setup when the PTZ can’t be controlled

1. get the PTZ protocol, PTZ band, and PTZ address of your PTZ camera while you reboot it.

2. access the URL link: [http://192.168.1.128/logo.html](http://192.168.1.128/logo.html) (the IP address of your PTZ camera), adjust the Protocol, band and address to be same as which you get before. Then submit.

3. To see whether the PTZ work.
