3. Preparation before Use

Install Your SIM Card

When you replace your mobile phone's memory, you can only use two different numbers and two different networks at the same time. You can choose whether to turn off the SIM card provided by the service provider you identified.

Write down your SIM card, and store it in a safe place since it contains your personal information, including PIN and personal identification number. Remember to store it in a safe place to prevent loss or theft.

Warning: Do not insert or remove your SIM card while your mobile phone is turned on. Use caution when inserting or removing the SIM card to avoid injury or damage to your mobile phone.

Please keep your SIM card in a cool, dry place, away from moisture or dust. If your SIM card is lost, please contact your service provider immediately for replacement.

Please turn on your mobile phone before installing the SIM card. Be sure the SIM card is inserted into the SIM card slot in the area shown in the picture.

Insert the SIM card according to the instructions. Please install the SIM card into the SIM 1 or SIM 2 slot as shown.

Note: You can use one SIM card at a time. When you have two SIM cards, please insert them into SIM 1 and SIM 2, respectively, then setup your number on your mobile phone.

Note: SIM cards are a key object. Please do not make it available to children, so as to prevent children from being gouged or swallowed by children.

Install Memory Card

Because the mobile phone is not provided with additional memory, memory card is required for additional functions. This phone uses TF cards with a maximum size of 32GB. Insert the TF card into the TF card slot on the side of the mobile phone. Insert the microSD card to expand memory.

Note: The SIM card and nano SIM card must be inserted into the SIM card slot.

Insert Battery

Your mobile phone is a high-maintenance device with excellent battery characteristics. When the battery is inserted, your mobile phone will be powered on automatically. Please insert the battery according to the following instructions.

Please install the battery into the mobile phone and press the end of the battery until it clicks securely.

Note: Please charge your mobile phone as described, and ensure the battery is charged. The battery will not be damaged or damaged by overcharging.
