

Your phone can store recent call record and all call time since you use the phone.

4.1.5.3 Menu in Calling

In calling case, press option key and then enter calling menu. The operation methods of calling menu and function menu are the same.

This call can only be seen during the course of calling, and functions such as call waiting, call hold, multi-conference need the support of network, please contact your network supplier.

In calling menu, you can implement the following operations:

- Pause Hold the current call or resume the hold call.
 - End current call.
 - New call Dial a new number.
 - Phone Book Enter browsing phone book status.
 - SMS Enter SMS menu.
 - Record Record call voice.
 - Mute/resumption Do not send (or send) the local voice.
 - DTMF Press left soft key open, or close DTMF.
 - Multi-Call Switch Exchange the holder with the active counterpart.
 - Conference Begin teleconference.
 - Call Transfer Transfer the current call to other phone.
 - Finish Single Line Finish the current active call.
 - All Over Finish this call.
 - Phone Book Enter phone book menu.
 - DTMF Turn on/off DTMF.
- *Note: some menu options only happen under some specific circumstances. Such as: "Switch" only happens when there exists the calling and pending call at the same time.

4.6 Function Menu

The usage of function menu.

4.6.1 Selection by Rolling Direction Keys

In standby status, click to enter main menu, or press middle navigation key to enter main function menu.

In all main menu or submenu, press up/down key to roll to the function needed, and press left soft key to enter the function option, right soft key to return current menu.

4.6.2 Exit Menu

In function menu, normally, you can press right soft key to exit a menu. Press hang up key return to standby interface.
