1 Important safety precautions
Failure to comply with the following precautions may be dangerous or illegal. For more detailed safety information, see "Health and Safety information".

Drive safely at all times
Do not use a hand-held phone while driving. Park your vehicle first.

Switch off the phone when refuelling
Do not use the phone at a refuelling point (service station) or near flares or chemicals.

Switch off in an aircraft
Wireless phones can cause interference. Using them in an aircraft is both illegal and dangerous.

Switch off the phone near all medical equipment
Hospitals or health care facilities may be using equipment that could be sensitive to external radio frequency energy. Follow any regulations or rules in force.

Interference
All wireless phones may be subject to interference, which could affect their performance.

Be aware of special regulations
Meet any special regulations in force in any area and always switch off your phone whenever it is forbidden to use it or when it may cause interference or danger.
2. About this Guide

This User's Guide provides you with condensed information about how to use your phone. This touch screen mobile phone is designed by G3GPRS network. Exception all the basic call function, it also provides the Chinese & English typing, phonebook, 64-channel polyphonic ring tones, an incoming all picture, localsim clock, camera, music playback, video playback, T-flash card, U disk, voice recording, calculator, Auto power off, GPRS, MMS, hand-free talking to bring your convenience. Besides, this mobile phone also adopts the specialized UI design, the completely function could satisfy with all your different requirements. This mobile phone is accorded with the G3GPRS technical criterion, and gets the authority certificate. We reserve its rights to alter, change or modify the specification without any notice.

continues...
If you key in an incorrect PIN code ten times in succession, the SIM card cannot be used anymore. Contact your service provider for a new card.

3.10.4 Phone code
Phone code protects you against unauthorized use. It is not on when you buy the phone. You can change the phone code to any four to eight digit personal code.

4 Quick Guide

4.1 Making Calls

What the network provider's icon appears on the screen, you can make or answer phone calls. The info bar on the upper left screen indicates the network's signal strength (wherein 4-scale info bar indicates the strongest signal).

Voice quality varies greatly with obstacles. Therefore, moving within a limited area may improve the signal strength.

4.1.1 Dialing mode
In the dialing mode, the signal indicator, battery power indicator and other icons are still available on the screen. A flashing line will indicate the caller's position.

In the dialing mode, there are two ways to make a call:
- Direct dial a new number: In the main menu, choose "Dial" to go to dialing mode, have number on the screen, and make a new call.
- Dial a number from phonebook: In standby mode, press "Phonebook" to go into phonebook menu, and choose the contact number you want, and press "Call" or "Ok" to make a call.

4.1.2 Calling status
In the calling status, input the number and choose "call1" or "call2" to go to the calling mode. To press "end active" to hang up a call. Then the main screen displays: animation picture, signal and battery power indicator, and recipient's phone number if the number does not exist in Phonebook or the

recipient's name.

Press the "clear" icon to clear the number in front of cursor.

Press the "start" key to dial a phone number.

Press the "call1" or "call2" to choose the call from "Sim1" or "Sim2".

4.1.3 Answering a call
When a call is coming in, the phone will bring you into incoming call screen. The prompt for answering to current ringing or vibrating alert settings.

4.1.4 Call Register
The speaking phone also can store your last call and all calls' duration. You can review the following items in the "Call Register":
- Missed calls
- Dialed calls
- Received calls
- Delete call records

4.1.5 Making a domestic call

The simplest way to make a call is to enter the telephone number with press the numeric keys (01234567890) to make a call, then press the "call1" or "call2" to start a call. To change the telephone number, press the "call1" or "call2" to start a call. During dialing, the screen will show an animation picture for the calling. Once the other party answers your calling, the screen will show the call status information.

After the call is over, press the "end active" key to disconnect the phone call.

For home calls, zone code: phone number + the Dial key.

4.1.6 Calling an extension number
For some fixed telephones, you cannot directly call an extension number. You should first connect to the exchange and then dial the extension. If you insert a pause character "P" between the exchange number and the extension number when you enter the telephone number, the mobile phone will complete the dialing for you. That is, it will dial the extension automatically. To enter "P", long press, or short press for the running three times the "key (then the character "P" will appear on the screen).
For extension call.
Zone code + exchange number + "P" + extension number + the Dial key
4.1.7 Making an international call
To make an international call, press "C" key until "+" appears before the
phone number on the screen. This will allow you to make a phone call from
any country even when you do not know the local prefix number for a
international call (for example, 00 for the PRC).
After the prefix number, enter the whole number of the called country's zone
code. As a rule, the zone code for Germany is 49, British is 44 and Sweden 46,
etc.
Like a usual international call, the "0" should be removed from the city's zone
code.
For fixed phone call, "+" zone code of a country + the telephone number
+ the Dial key.
4.1.8 Calling options
This function only works during to answer a call. During a call, there are
several options on the screen. Press "L" key to edit the number dialed in a call
function. Press "T" key to verbose the video content, and press "C" to
charge. Press "O" key to hold the current call. Press "P" to call the "keypad"
and "D" menu to enter the call menu.
There are some options can be chosen:
Magic sound effect: set the current call sound effect.
Presence: Presenting the current call, meanwhile to dial another call
(needs to return support).
End: End the current call
A new call: you can suspend one of current "conference call", and
meanwhile to dial another call.
Phonebook: Enter the phonebook menu
Message: Enter the message menu
Voice rec. Take a voice record during a call

= Key tone volume
In the talking mode, press [volume] to adjust the key tone volume.
